Insanity and Genius Harry Eiss,2014-06-02 In his book about the discovery of the structure of DNA, James Watson wrote, “So we had lunch, telling ourselves that a structure this beautiful just had to exist.” Indeed, the quest most often asked by scientists about a scientific theory is “Is it beautiful?” Yes, beauty equals truth. Scientists know, mathematicians know. But the beauties, the truths of mathematics and science were not the truths that inspired the author as a child, and he intuitively knew that the truths he needed come from a different way of knowing, a way of knowing not of the world of logic and reason and explanation (though they have a value), but rather a way of knowing that is of the world expression, a world that enters the truths beyond the grasp of logic. That is what this book is all about. It is an exploration of the greatest minds of human existence struggling to understand the deepest truths of the human condition. This second edition updates the previous one, incorporating new publications on Van Gogh, recent discoveries in neurology, psychology, and the rapid developments in understanding DNA and biotechnology. We’ve come a long way already from that original discovery by Watson and his coauthor Francis Crick.

OECD Guidelines for the Testing of Chemicals, Section 4 Guideline No. 497: Defined Approaches on Skin Sensitisation OECD,2023-07-04 A Defined Approach (DA) consists of a selection of information sources (e.g in silico predictions, in chemico, in vitro data) used in a specific combination, and resulting data are interpreted using a fixed data interpretation procedure (DIP) (e.g. a mathematical, rule-based model). DAs use methods in combination and are intended to overcome some limitations of the individual, stand-alone methods.

OECD Guidelines for the Testing of Chemicals, Section 4 Test No. 470: Mammalian Erythrocyte Pig-a Gene Mutation Assay OECD,2022-06-30 This Test Guideline describes an in vivo erythrocyte Pig-a gene mutation assay (hereafter called the Pig-a assay) which uses an endogenous mammalian gene, the phosphatidylinositol glycan class A gene (Pig-a), as a reporter of somatic-cell gene mutation. In vivo gene mutation tests, such as the Pig-a assay, are especially relevant for assessing mutagenicity because physiological factors, such as absorption of the test chemical from the site of exposure, distribution of the test chemical throughout the test system via systemic circulation, and in vivo metabolism and DNA repair processes, all contribute to the mutagenic responses.

The chapters in the book are divided into five sections: I: Advances Chemical Thermodynamics II: Electronic Structure of Molecular Systems III: Molecular Interaction and Dynamics IV: Condensed Matter V: Playing with Numbers This book is an invaluable resource for all academics and researchers interested in theoretical, quantum or statistical, chemical physics or physical chemistry. It presents a selection of some of the most advanced methods, results and insights in this exciting area.

What Has Changed? Dafydd Fell,Henning Klöter,Bi-yu Chang,2006 In March 2000, for the first time in its history, Taiwan witnessed a democratic change in ruling parties. Given the contrasting stances on Taiwan's political and cultural belonging held by the defeated party, the KMT, and the new ruling party, the pro-independence DPP, the change was a historical turning point. Although there has been increasing interest in Taiwan Studies in the last decade, no single volume has yet addressed the complexity and impact of the change in ruling parties in Taiwan. This book aims to fill that gap by comparing the years before and after the DPP's transition to power. Although the analytical starting point is the regime change of 2000, the scope of topics goes beyond party politics. Designed to provide an all-encompassing view, the thirteen chapters examine and evaluate the extent to which the change in Taiwan's ruling party has resulted in a political, social, economic and cultural transformation of the island. They build a complex picture of the differences and the perhaps surprisingly high degree of continuities between the two regimes. The book addresses readers interested in interdisciplinary approaches to Taiwan's recent political, social, and cultural changes.

The Numeral Systems of Nigerian Languages Ndimele, Ozo-mekuri, Chan, Eugene S.L., 2016-04-30 The papers in this collection present the numeral systems of more than twenty Nigerian languages. The papers mainly emanate from a workshop on the numeral systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt, Nigeria. The workshop arose from awareness created by Dr. Eugene S.L. Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages. The quantum of mathematical computations - addition, multiplication, subtraction, or a combination of two or all of these - involved in the numeral systems of Nigerian languages is remarkable. The papers reveal that a variety of numeral systems do exist, such as: binary, decimal, incomplete decimal, duodecimal, quinary, quaternary, ternary, mixed, body-part tally systems, and much more. The book is a resource about how different languages manipulate their numeral systems.

Storymen Hannah Rachel Bell, 2009-11-04 What do the artistic works of acclaimed author Tim Winton and eminent Ngarinyin lawman Bungul (David) Mowaljarlai have in common? According to Hannah Rachel Bell they both reflect sacred relationship with the natural world, the biological imperative of a male rite of passage, an emergent urban tribalism, and the fundamental role of story in the transmission of cultural knowledge. In Bell's four decade friendship with Mowaljarlai, she had to confront the cultural assumptions that sculpted her way of seeing. The journey was life-changing. When she returned to teaching in 2001 Tim Winton's novels featured in the curriculum. She recognised an eerie familiarity and thought Winton must have been influenced by traditional elders to express such an 'indigenous' perspective. She wrote to him. This resulted in 4 years of correspondence and an excavation of converging world views - exposed through personal memoir, letters, paintings and conversations and culminating in Storymen.
