Introduction to Weapons of Mass Destruction R. Everett Langford,2004-02-19 Crucial information on nuclear, chemical, and biological weapons From the diseased animal carcass hurled over the wall of a besieged castle to the nuclear suitcase bomb carried by a clandestine operative, the threat of unconventional weapons has always been a feature of warfare. Today's danger comes mainly from the potential use of nuclear, biological, and chemical (NBC) weapons of mass destruction (WMD) by international terrorists or rogue states. False alarms and misinformation about these weapons have abounded in the jittery post-9/11 atmosphere. To understand and deal with the actual threat posed requires basing response plans, policy, and reporting on actual facts. Introduction to Weapons of Mass Destruction separates fact from fiction about NBC weaponry by providing clear, technically precise information. For each family of weapon, coverage in this handbook includes: * History and background information * Agent types and delivery mechanisms * Effects of exposure * Protection * Safe storage and handling * Decontamination * Medical treatments Drawing from a broad array of military, scientific, and safety resources, this text offers both accessibility to the general public and accuracy and depth for professional emergency responders. Additional resources include a bibliography of references and a list of addresses and telephone numbers of federal and military agencies and professional organizations of interest. With full coverage of WMDs, from high-tech, genetically modified organisms to rudimentary radiological dirty bombs, Introduction to Weapons of Mass Destruction is an essential reference for understanding and responding to these dangerous warfare agents.

The Hidden History of 9/11 Paul Zarembka,2011-01-04 How much insider trading occurred in the days leading up to 9-11? How compromised is the evidence against alleged hijackers? Why were there no military interceptions? To what extent does the testimony of more than five hundred firefighters differ from official reports of what happened at the World Trade Center buildings that day? How inseparably connected are Western covert operations to al-Qaeda? How is Islamophobia used to sustain US imperialism? What was the 9-11 Commission? With contributions from Nafeez Mosaddeq Ahmed, Four Arrows, David Ray Griffin, Jay Kolar, David MacGregor, Diana Ralph, Kevin Ryan, and Bryan Sacks, this path-breaking work examines 9-11 and its background, showing how much remains unknown and where further investigation and debate is needed.

Fulbright Labyrinths Virginia Hall-Milhouse, 2011-11 In this provocative work, Virginia Milhouse demonstrates how autoethnography combines creative and analytical practices to help bring to consciousness some complex social and political agendas hidden in narratorial writings. It demonstrates how an arts-based qualitative research method (narrative inquiry) can be fused with a scientific-based quantitative method (DMIS-IDI) and compliment, support and or correct each other. It also demonstrates how writing as a method of inquiry can be a viable way for researchers to learn about themselves and their research, as well as features standards for evaluating creatively and analytically constructed text. Further, the author's examination of the aesthetics of inner-readiness and in-betweeness will be very helpful to people doing this kind of self-reflexive fieldwork. The reader will also appreciate this author's recognition of the importance of combining qualitative and quantitative methodologies--something not many writers can do with great success. Also, this book will be a real contribution to sojourners and others traveling or living abroad. The work is very smart; and, is, beautifully and clearly written. The "labyrinth" quote at the beginning of her work is very fitting and certainly promises to illustrate those words.
