Network Access, Regulation and Antitrust Diana L. Moss, 2005-03-04 The rapid growth of network industries has generated much comment amongst academics and policy makers. This timely volume takes an interdisciplinary, case study-based approach to examining network issues and experiences in order to develop recommendations that can inform antitrust, regulatory and legislative policy. Legal, economic, political and institutional aspects of network access are analyzed. The first part of the volume focuses on five topics that are central to reasoned analysis of the access problem. The second part presents ten case studies of network access in the energy, transportation, telecommunications, internet and banking industries. The volume concludes with comparisons and contrasts across the cases and policy recommendations. *Network Access, Regulation and Antitrust* will prove invaluable to students of business, economics, law and economics and industrial economics, policy makers and academics working in the field.

A Complete Guide to Literary Analysis and Theory Michael Ryan, 2022-11-25 *A Complete Guide to Literary Analysis and Theory* offers an accessible introduction to all the current approaches to literary analysis. Ranging from stylistics and historicism to post-humanism and new materialism, it also includes chapters on media studies and screen studies. The Guide is designed for use in introductory literature courses and as a primer in theory courses. Each chapter summarizes the main ideas of each approach to the study of literature in clear prose, providing lucid introductions to the practice of each school, and conducts readings using classic and modern works of literature from around the world. The book draws on examples from a wide range of works from classics such as F. Scott Fitzgerald's *The Great Gatsby* and Shakespeare's *King Lear* to contemporary works such as Ocean Vuong's *On Earth We're Briefly Gorgeous* and Amanda Gorman's *The Hill We Climb*. This wide-ranging introduction is ideal for students encountering literary study for the first time, as well as more advanced students who need a concise summary of critical methods. It strives to make complex ideas simple and provides readings that undergraduates should be able to understand and enjoy as well as training them to conduct analyses of their own.

Encore! Brian Leahy Doyle, 2009 *In Encore! The Renaissance of Wisconsin Opera Houses*, Brian Leahy Doyle chronicles the histories of ten Wisconsin opera houses and theaters, from their construction to their heydays as live performance spaces and through the periods when many of these stages went dark. All but one of the featured theaters has been restored to its original splendor. Just as the beginnings of these theaters were often the result of the efforts of local citizens, Doyle discovers that their restoration is due to the commitment of dedicated and passionate people. More than one of these revived theaters has spurred the revitalization of its surrounding downtown business district as well.

The Business of Opera Anastasia Belina-Johnson, Derek B. Scott, 2016-03-23 The study of the business of opera has taken on new importance in the present harsh economic climate for the arts. This book presents research that sheds new light on a range of aspects concerning marketing, audience development, promotion, arts administration and economic issues that beset professionals working in the opera world. The editors' aim has been to assemble a coherent collection of essays that engage with a single theme (business), but differ in topic and critical perspective. The collection is distinguished by its concern with the business of opera here and now in a globalized market. This includes newly commissioned operas, sponsorship, state funding, and production and

marketing of historic operas in the twenty-first century.

Reference Guide to Famous Engineering Landmarks of the World Lawrence Berlow, 2015-04-22 More than 650 landmarks are covered, ranging from ancient monuments such as Stonehenge, to contemporary engineering feats such as the World Trade Center in New York City. The concisely-written entries describe when the landmark was built, who built it, why it was built, its dimensions, how it was constructed, and any problems encountered during construction. Additional features include: numerous photographs; biographies of important builders and designers; glossary; chronology of dates in civil engineering from 3000 BC to the present; listings of tallest buildings, longest bridges, and highest dams, and a geographical index which locates the structures by country.

Once Upon A Time Terrence L. Gargiulo, 2007-06-30 Terence Gargiulo's 'breakthrough' communications and storytelling are amply demonstrated with dozens of corporate examples. And the best part? Gargiulo shows us, step by step, how to create this storytelling communication magic in our own organizations. The competencies assessed by the instrument represent the nine essential communication behaviors that need to be developed and cultivated in all of today's leaders and managers: Modeling, Telling, Selecting, Indexing, Synthesizing, Reflecting, Eliciting, Listening and Observing. Once Upon a Time will show you how to develop exceptional communication skills, and it will serve as an invaluable resource for helping others do the same. Stories are a natural part of how we communicate. Yet many of us are unaware of the different ways we use stories. This book will take the intuitive aspects of communicating through stories and break it down into repeatable practices and essential competencies. The story-based activities in the second half of the book will give you powerful, easy to lead, structured, experiential exercises that can be used in a variety of settings and for lots of different purposes that go beyond training.

Scheherazade's Children Philip F. Kennedy, Marina Warner, 2013-11-08 Scheherazade's Children gathers together leading scholars to explore the reverberations of the tales of the Arabian Nights across a startlingly wide and transnational range of cultural endeavors. The contributors, drawn from a wide array of disciplines, extend their inquiries into the book's metamorphoses on stage and screen as well as in literature—from India to Japan, from Sanskrit mythology to British pantomime, from Baroque opera to puppet shows. Their highly original research illuminates little-known manifestations of the Nights, and provides unexpected contexts for understanding the book's complex history. Polemical issues are thereby given unprecedented and enlightening interpretations. Organized under the rubrics of Translating, Engaging, and Staging, these essays view the Nights corpus as a uniquely accretive cultural bundle that absorbs the works upon which it has exerted influence. In this view, the Arabian Nights is a dynamic, living and breathing cross-cultural phenomenon that has left its mark on fields as disparate as the European novel and early Indian cinema. While scholarly, the writers' approach is also lively and entertaining, and the book is richly illustrated with unusual materials to deliver a sparkling and highly original exploration of the Arabian Nights' radiating influence on world literature, performance, and culture.

Screen Design Manual Frank Thissen, 2003-09-11 The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples, and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists, along with the comprehensive design of the book, support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning > www.frank-thissen.de Key Topics: - Interactive media - Text for the screen - Effective use of pictures - Video, animation, and sound - Screen layout - Orientation and navigation - Interaction - Emotions and metamessages - Intercultural communication

Internet Governance Lee A. Bygrave, Jon Bing, 2009-01-22 The question of governance of the Internet is increasing in significance. The United Nations' World Summit on the Information Society, held in two phases in 2003 and 2005, provoked heated debate, and the resultant meetings of the Internet Governance Forum that followed this have been the subject of growing public and media interest. Yet governance of the Internet is multifaceted, complex, and far from transparent, and there has been little written about the subject which is detailed, systematic, and non-polemical. This book focuses on the issues involved in the ongoing development of Internet governance, and the challenges associated with developing and applying governance structures at a global level based on bottom-up, consensus-seeking decision-making procedures, without direct foundation in a treaty framework. Leading academics and practitioners studying and working in the area of Internet governance explore such issues as how the engineering of infrastructure matters, how legitimacy is gained and retained by governance organizations, and whether elements of such organizations can provide a model for other organizations to emulate. They examine the tensions inherent in Internet governance, such as government control versus digital libertarianism; commercialism versus civil society ideals; interests of developed countries versus interests of developing countries. The book

will be of interest to academics, researchers, and students of Information and Communications Technology, legal aspects of ICT, and Organization Studies, as well as legal practitioners, government bodies, NGOs, and others concerned with Internet governance.
