Tapping State Government Information Sources Lori L. Smith, Daniel C. Barkley, Daniel D.

Cornwall, Eric W. Johnson, J. Louise Malcomb, 2003-11-30 Each state government produces large varieties and quantities of useful information that are largely unknown outside their state of origin. This book leads the public to the most useful information sources produced by each state, as well as to depository libraries that will facilitate more effective research. For each of the 50 states, important publications are detailed, along with information on how to obtain them. The publications' topics range from crime statistics to vital statistics, business statistics, health information, statistical abstracts, education directories, state budgets, economic indicators, state laws and legal information, and more. Tapping State Government Information Sources has a broader focus than previously published books in this subject area, most of which have focused solely on depository laws, useful state publications, or indexes to state publications. This book covers all three. The first chapter describes print and

electronic sources that provide information about all 50 states. Each state's resources are then described in individual chapters. When possible, information about how to order a copy of the source is given, as are Web addresses for titles that are available online. At the beginning of each state chapter, the state's legal definition of public document or its equivalent is given, which may be of interest to librarians in states that are reexamining their own depository laws.

Lessons in Corporate Governance from the Global Financial Crisis L. P. Yong, Leonard Peng-Kin Yong, 2009 *Lessons in Corporate Governance from the Global Financial Crisis* poses and attempts to answer key questions about the Global Financial Crisis (GFC). Did it have to happen? What caused it and, more importantly, why? Could it have been avoided? Could it happen again? This book covers issues such as importance of the fiduciary duties of board members, risk management, influence of hedge funds, impact on members' pension funds, currency hedging, role of government regulation and the extensive use of financial derivatives.

Koenig and Schultz's Disaster Medicine Kristi L. Koenig, Carl H. Schultz, 2016-02-16 As societies become more complex and interconnected, the global risk for catastrophic disasters is increasing. Demand for expertise to mitigate the human suffering and damage these events cause is also high. A new field of disaster medicine is emerging, offering innovative approaches to optimize disaster management. Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources. This definitive work brings together a coherent and comprehensive collection of scientific observations and evidence-based recommendations with expert contributors from around the globe. This book identifies essential subject matter, clarifies nomenclature, and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises. It also describes in-depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical, biological, and radiological agents.

Air Power in UN Operations Professor A Walter Dorn, 2014-08-28 Air power for warfighting is a story that's been told many times. Air power for peacekeeping and UN enforcement is a story that desperately needs to be told. In rich detail this volume describes: aircraft transporting vital supplies to UN peacekeepers and massive amounts of humanitarian aid to war-affected populations; aircraft serving as the 'eyes in sky' to keep watch for the world organization; and combat aircraft enforcing the peace. Rich poignant case studies illuminate the past and present use of UN air power, pointing the way for the future.

IMF Financial Operations 2015 International Monetary Fund. Finance Dept., 2015-10-05 IMF Financial Operations 2015 provides a broad introduction to how the IMF fulfills its mission through its financial activities. It covers the financial structure and operations of the IMF and also provides background detail of the financial statements for the IMF's activities during the most recent financial year. This publication (currently in its second edition) updates a previous report entitled Financial Organization and Operations of the IMF, first published in 1986 and last issued in 2001 (the sixth

edition). That 2001 report reflected the seismic shifts in the global economy and in the IMF's structure and operations that occurred after the fall of the Soviet Union and the various currency and financial crises of the 1990s. This revised and updated report covers more recent developments, including measures taken in response to the global financial crisis of 2007–09 and the institutional reforms aimed at ensuring that the IMF's governance structure evolves in line with developments in the global economy, measures to enhance the financial safety net for developing economies, as well as reforms to the IMF's income model.

Report of the Workshop on Data and Knowledge in Deep-Sea Fisheries in the High Seas Food and Agriculture Organization of the United Nations, 2008 The goals of the expert consultation were to advise FAO on the development and implementation of a global record of fishing vessels and to respond to the request from FAO's Committee on Fisheries to further develop the concept as described in the feasibility study. A comprehensive global record, a potential additional tool to combat illegal, unreported and unregulated fishing, is envisioned as a global database gathering data from many sources in one location.--Publisher's description

Acquisition Strategies in European Emerging Markets K. Meyer,S. Estrin,2006-11-28 This study investigates mergers and acquisitions in emerging economies. Combining a questionnaire survey with eleven case studies in Poland, Hungary and Lithuania, it develops a dynamic perspective of international acquisitions, and a refined acquisition typology. Implications are derived for managers and policy makers, and for scholarly research.

Cert Basic Training Instructor's Guide Government Publishing Office,2017-11-15 FEMA's Community Emergency Response Team (CERT) Basic Training Instructor Guide is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows you and others interested from your community to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together

to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. The purpose of the CERT Basic Training is to provide you and others in your community who complete this course with the basic skills that they will need to respond to their community's immediate needs in the aftermath of a disaster, when emergency services are not immediately available. This course will be beneficial to individuals who desire the skills and knowledge required to prepare for and respond to a disaster. Instructors for these community courses usually range from skilled fire and rescue instructors that have completed the CERT Train-the Trainer course and are knowledgeable about the CERT model, different types of hazards that present greatest risks for communities, local building structures that may present greatest hazard in disaster events, community's emergency operation plans, and licensed Paramedics or Emergency Medical Technicians and nurses for providing hands-on knowledge relating to disaster medical operations
