**Operation Squarepeg** Reg Newell,2017-11-16 In late January 1944 a force of New Zealand soldiers and Allied specialists undertook a daring behind the lines reconnaissance of the Japanese-held Green Islands of Papua New Guinea. The New Zealand Army's largest amphibious operation of World War II followed two weeks later. The Japanese contested the invasion with air power and inflicted heavy damage on the American cruiser USS St. Louis. After landing, the New Zealanders pushed inland and encountered fanatical Japanese defenders entrenched in thick jungle. Allied engineers--including the famed Seabees--then built airfields, roads and shipping facilities. The seizure of the Green Islands completed the encirclement of the main Japanese base in the South Pacific at Rabaul. A memorable but overlooked action of the Pacific War, Operation Squarepeg involved a diverse force of Allied sailors, soldiers and airmen that included Charles Lindbergh and future U.S. president Richard Nixon.

The Bottom Line Pamela Parry,2020-07-24 The first step any company must take before it can begin ISO 14001 implementation is to secure 100 percent, enthusiastic commitment from top management. Top management is persuaded if ISO 14001 impacts the bottom line. This practical, how-to book helps you build a business case for ISO 14001. Implementing ISO 14001 brings a corporate culture change, resulting in cost savings, reduced waste, and enhanced relationships with

community regulators and other stakeholders. The author explores these issues with top people in the field who have already implemented the system. She addresses: what steps did they take? has the business case been supported by experience? what are the tangible cost savings? Through these interviews you understand what elements or cost savings can be transferred to your company. You will learn how to convince senior management to implement ISO 14001 - and what business benefits your company will see through the eyes of experts who have been down that path. Once you have top management on board, you must deliver. The Bottom Line: How to Build a Business Case for ISO 14001 shows you how to implement ISO 14001 and how it will profitably affect your bottom line.

**Open Markets, Free Trade and Sustainable Development** Mahendra Pal Singh,Wolfram Cremer,Niraj Kumar,2019-07-27 This book explores the dilemmas posed by globalisation in various

aspects of law. It covers diverse themes, ranging from the impact of different legislative measures, bilateral and regional agreements in the context of trade, investment and mobility of labour, to concerns about sustainability, equity, regional balance and social security in the light of globalisation. Although it focuses mainly on India and the European Union, the issues raised and challenges discussed are of a general nature, and as such relevant in the broader context. The chapters address contemporary problems in trade, investment and labour mobility, which have emerged through the complex interaction of market, state policies and socio-environmental concerns, and are expressed on national and global platforms in the context of evolving legal system. The book is a valuable resource for students, researchers and academics engaged in comparative legal studies, particularly those interested in studying the interplay of globalisation with various areas and aspects of law at national as well as international levels. It also appeals to anyone interested in law and policy studies.

**Catastrophic Injuries in Sports and Recreation** Charles H. Tator, 2008-01-01 Catastrophic Injuries in Sport and Recreation is an essential reference guide to safe participation in a wide variety of sports and recreational activities. A masterful achievement of methodology, it is the first complete epidemiological study and analysis of all catastrophic injuries in all sports and recreational activities that occurred within a large defined geographical area with a large population: ten million people within the province of Ontario between 1986 and 1995. Concentrating on injuries that resulted in death or long term disability, the contributors identify both the personal risk factors for participants

and the societal risk factors that are important causes for these kinds of injuries. Providing detailed analysis of 2154 case studies, the contributors demonstrate what went wrong in each event, and show how each injury could have been prevented. Recommending specific prevention strategies for a wide range of injuries, *Catastrophic Injuries in Sport and Recreation* is a practical medical reference for athletes and doctors alike.

*The Peacebuilding Elements of the Belfast Agreement and the Transformation of the Northern Ireland Conflict* Cornelia Albert, 2009 The aim of this book is to analyse whether the implementation of the peacebuilding elements of the Belfast Agreement contributed to the transformation of the protracted Northern Ireland Conflict. Therefore, this book deals with the following sections of the Agreement: Rights, Safeguards and Equality of Opportunity, Decommissioning, Security, Policing and Justice, and Prisoners. The author comes to the conclusion that the majority of the peacebuilding elements contributed to the transformation of the Northern Ireland Conflict. The results of the study were obtained in conducting interviews, in consulting surveys, and in studying reports and other relevant literature on the recent developments in Northern Ireland.

*Emerging Risks in a World of Heterogeneity* Masayuki Tadokoro, Susumu Egashira, Kazuya Yamamoto, 2018-02-03 This uniquely interdisciplinary volume analyzes the challenges posed by the heterogeneity of the world where radically different players are crammed into increasingly limited political, commercial, social, and ecological space. The rapid rise of Communist Party-ruled China is posing serious challenges to the postwar politico-economic architecture dominated by the United States. Russia, once expected to become a partner of the liberal Western international order, has started behaving in an increasingly unilateral fashion. The developing world is more characterized by failed governance rather than convergence to liberal democracies as was hoped by many Western

authors. Given links provided by low-cost carriers, the Internet, and trade and investment, we simply cannot shield ourselves from influences, whether benign or malign, from neighbors on this planet. The authors, including political scientists, economists, social physicists, and experts on complexity theory and informatics, examine how interactions among actors with different properties can cause problems, and they analyze risks resulting from the interactions. While employing a variety of approaches to address topics such as economic interdependence among democracies and authoritarian states, the development assistance regimes, internal conflicts in developing countries, and cyber security, the whole volume presents a clear overview of challenges and risks the world is facing. This work makes a valuable contribution to students of social sciences as well as to practitioners interested in the emerging global order.

Middle Powers in Global Governance Emel Parlar Dal, 2018-05-01 This volume summarizes, synthesizes, updates, and contextualizes Turkey's multiple roles in global governance. As a result of various political, economic, cultural and technological changes occurring in the international system, the need for an effective and appropriate global governance is unfolding. In such an environment, Turkey's and other rising/middle powers' initiatives appear to be indispensable for rendering the existing global governance mechanisms more functional and effective. The authors contribute to the assessment of changing global governance practices of secondary and/or middle power states with a special focus on Turkey's multiple roles and issue-based global governance policies.

International Cooperation, Competition Authorities and Transnational Networks Mateusz Błachucki, 2023-11-30 This book presents a comprehensive study of the emergence, functioning and evolution of international cooperation among competition authorities. It presents an in-depth look at network cooperation taking place within international organisations, as well as networks based on binding international agreements and various informal networks, among others. It further identifies and analyses the forms of international cooperation among national competition authorities (NCAs) that are taking place within transnational competition networks. The book classifies these forms of

cooperation by grouping them into three stages – soft, developed and enhanced cooperation – discussing each in detail. It thus reflects the evolution of the international cooperation process and provides insights as to its possible development. This work will be of interest to researchers, academics and advanced students in the fields of competition law, public administration, international relations and those interested in international competition law and its contribution to global public governance.

China's Education Aid to Africa Wei Ye, 2023-05-31 China's rise as an aid provider in Africa has caught global attention, with China's activity being viewed as the projection of soft power of a neo-colonialist kind in an international relations context. This book, which focuses on China's education aid—government scholarships, training, Confucius Institutes, dispatched teachers, etc., reveals a much more complicated picture. It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China's soft power projection, how much of China's aid is bound up with an education-for-economic-growth outlook, mirroring China's own recent experiences of economic development, and how China's aid—prioritized to reflect the commercial sector's interests—is out of step with most international development aid, which is dominated by education agendas and the campaigns of international organizations and traditional donors; this leaves China easily exposed to the charge of neo-colonialism. This situation also reveals insufficient knowledge production of China and in South-South Cooperation. Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform.

Tax, Inequality, and Human Rights Philip G. Alston, Nikki R. Reisch, 2019-04-11 For the first time, *Human Rights and Tax in an Unequal World* brings together works by human rights and tax law experts, to illustrate the linkages between the two fields and to reveal their mutual relevance in tackling economic, social, and political inequalities. Against the backdrop of systemic corporate tax avoidance, the widespread use of tax havens, persistent pressures to embrace austerity policies, and growing gaps between the rich and poor, this book encourages readers to understand fiscal policy as human rights policy, with profound consequences for the wellbeing of citizens around the world. The essays collected examine where the foundational principles of tax law and human rights law intersect and diverge; discuss the cross-border nature and human rights impacts of abusive practices like tax avoidance and evasion; question the role of states in bringing transparency and accountability to tax policies and practices; highlight the responsibility of private sector actors for the consequences of tax laws; and critically evaluate certain domestic tax rules through the lens of equality and non-

discrimination. The contributing scholars and practitioners explore how an international human rights framework can anchor debates around international tax reform and domestic fiscal consolidation in existing state obligations. They address what human rights law requires of state tax policies, and what a state's tax laws and loopholes mean for the enjoyment of human rights within and outside its borders. Ultimately, tax and human rights both turn on the relationship between the individual and the state, and thus both fields face crises as the social contract frays and populist, illiberal regimes are on the rise.
