Super-Scenic Motorway Anne Mitchell Whisnant, 2006-10-02 The most visited site in the National Park system, the 469-mile Blue Ridge Parkway winds along the ridges of the Appalachian mountains in Virginia and North Carolina. According to most accounts, the Parkway was a New Deal Godsend for the needy, built without conflict or opposition by landscape architects and planners who traced their vision along a scenic, isolated southern landscape. The historical archives relating to this massive public project, however, tell a different and much more complicated story, which Anne Mitchell Whisnant relates in this revealing history of the beloved roadway.

A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01 Acclaim for the first edition: "This is undoubtedly a useful collection of essays for environmental policy-makers and anyone interested in the relationship between national government and transnational forces. . . the collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment." *International Sociology* *Review of Books* "The Handbook of Globalisation and Environmental Policy is a very important book. More than 40 experienced authors, including some of the most important international thought leaders of our time, have confronted a crucial question: How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability? Through close examination of numerous case studies, a balanced perspective that takes government, business and civil society into account, and fresh interdisciplinary thinking about a range of policy tools, the Handbook offers a treasure-trove of new concepts and new perspectives. The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums, national governments can, in fact, increase their capacity to shape their own destiny." *Lawrence Susskind, Massachusetts Institute of Technology, US* "In an increasingly interdependent world, global forces affect both the design and effectiveness of environmental policy. This Handbook provides an unusually creative and comprehensive guide, not only to the nature of these forces and their impacts, but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy." *Tom Tietenberg, Colby College, US* In the current era of globalisation, national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies. This comprehensive, revised Handbook pushes the frontiers of theoretical and empirical knowledge, and provides a state-of-the-art examination of the multifaceted effects of globalisation on environmental governance. Including substantially revised as well as new contributions from leading authorities, the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy. It covers themes including national regimes, trade rules, types of goods, federalism, innovation, standards, citizen-consumers, developing countries, policy networks, partnerships, and carbon trading. The Handbook's depth and scope will appeal to a broad and varied readership, across academics, students, and policy-makers interested in public and private governance, environmental economics, international relations, environmental politics and law, sociology, and political science.

Integrating Services in South Asia Rupa Chanda, 2010-12-01 In this era of globalization, every region and country in the world is pursuing some kind of integration to further its economic, geo-political, and strategic interests. This book explores the prospects for and challenges to services integration in South Asia through an in-depth analysis of services such as telecommunications, energy, tourism, health, and education. Identifying trends in performance, policy issues, and the status of intra-regional trade and investment initiatives, the book argues the case for services integration under the South Asian Free Trade Area (SAFTA). It also stresses the need to address cross-cutting issues of regional mobility of service providers, taxes, transport, trade, research and development, and regulatory cooperation. Expanding the existing work on South Asian integration to cover services from an intra-regional perspective, this book is an important reference for future academic and policy work in South Asia. The industry, country, and regional level statistics provided by the book serve as a useful resource for taking stock of output, employment, trade, and investment in services in this region.

House of Representatives of the United States N. O. Sneider, 2001 There is no doubt that the House of Representatives exists and functions in the United States. The fact that few understand how it does exist and function is the subject of this new book. The chapters in this book detail the sometimes arcane procedures and processes of this grunt-type chamber. These are the folks who do the heavy lifting of lawmaking. The Senate may be considered august, especially to its own members, but it is the House which forms the backbone of American democracy at the federal level.

The Great Race Levi Tillemann, 2016-01-19 The Great Race recounts the exciting story of a century-long battle among automakers for market share, profit, and technological dominance—and the thrilling race to build the car of the future. The world's great manufacturing juggernaut—the \$3 trillion automotive industry—is in the throes of a revolution. Its future will include cars Henry Ford and Karl Benz could scarcely imagine. They will drive themselves, won't consume oil, and will come in radical shapes and sizes. But the path to that future is fraught. The top contenders are two traditional manufacturing giants, the US and Japan, and a newcomer, China. Team America has a powerful and little-known weapon in its arsenal: a small group of technology buffs and regulators from California. The story of why and how these men and women could shape the future—how you move, how you work, how you live on Earth—is an unexpected tale filled with unforgettable characters: a scorned chemistry professor, a South African visionary who went for broke, an ambitious Chinese ex-pat, a quixotic Japanese nuclear engineer, and a string of billion-dollar wagers by governments and corporations. “To explain the scramble for the next-generation auto—and the roles played in that race by governments, auto makers, venture capitalists, environmentalists, and private inventors—comes Levi Tillemann's The Great Race..Mr. Tillemann seems ideally cast to guide us through the big ideas percolating in the world's far-flung workshops and labs” (The Wall Street Journal). His account is incisive and riveting, explaining how America bounced back in this global contest and what it will take to command the industrial future.

Educating the Muslims of America Yvonne Y Haddad, Farid Senzai, Jane I Smith, 2009-02-26 As the U.S. Muslim population continues to grow, Islamic schools are springing up across the American landscape. Especially since the events of 9/11, many have become concerned about what kind of teaching is going on behind the walls of these schools, and whether it might serve to foster the seditious purposes of Islamist extremism. The essays collected in this volume look behind those walls and discover both efforts to provide excellent instruction following national educational standards and attempts to inculcate Islamic values and protect students from what are seen as the dangers of secularism and the compromising values of American culture. Also considered here are other dimensions of American Islamic education, including: new forms of institutions for youth and college-age Muslims; home-schooling; the impact of educational media on young children; and the kind of training being offered by Muslim chaplains in universities, hospitals, prisons, and other such settings. Finally the authors look at the ways in which Muslims are rising to the task of educating the American public about Islam in the face of increasing hostility and prejudice. This timely volume is the first dedicated entirely to the neglected topic of Islamic education.

What Can You Do with Your Bible Training? Brandon C. Benziger, Adam W. Day, 2023-06-23 Employment in the field of biblical studies has changed significantly in recent years, and the coronavirus pandemic has only exacerbated the resulting challenges. The purpose of this anthology is to inform and inspire evangelical students and graduates of biblical studies programs about the wide variety of training-related vocational paths they can pursue, both conventional and unconventional. The book does this by listing and categorizing twenty-five relevant pathways, sharing the stories and insights of insiders within each pathway, and calling for further creativity in putting one's biblical training to work. Each contributor shares (1) how they settled into their represented occupation, (2) the ways in which they have used their biblical training in that occupation, (3) the joys and trials of their work, and (4) advice for those who would like to follow in their footsteps. The volume stands in the tradition of several nuts-and-bolts-like resources within the guild (e.g., Nijay Gupta's *Prepare, Succeed, Advance* and Ben Witherington's *Is There a Doctor in the House?*), and it seeks to develop that tradition considerably.

Intentional Responsive Adult Practices: Supporting Kids to Not Only Overcome Adversity but to Thrive Erik K Laursen, PhD, 2018-07-12 This book draws on positive psychology as well as strengths-based and solution-focused practices to empower adults to help children instead of reacting to their behavior. Erik K. Laursen, PhD, who has spent his career helping high-risk children and their families, identifies ten intentional responsive adult practices to give children the tools they need to overcome adversity. Learn how to: support young people to grow and develop throughout childhood, adolescence, into young adulthood; provide supportive relationships where children and young people thrive; and help children overcome social and emotional problems that are significant barriers to well-being. While numerous books, articles, and courses focus on the long-term effects of childhood trauma, this knowledge alone does not give us the tools we need to help children thrive. By learning how to reflect and intentionally respond to children's pain, which is the focus of this book, you'll be able to help young people transform their lives.
