Creating Connections in Teaching and Learning Lindy Abawi, Joan Conway, Robyn Henderson, 2011-12-01 This book explores the wide range of contexts in which research into creating connections in learning and teaching may take place. Creating connections can encompass making links, crossing divides, forming relationships, building frameworks, and generating new knowledge. The cognitive, cultural, social, emotional and/or physical aspects of understanding, meaning-making, motivating, acting, researching, and evaluating are explored as constituent forms of creativity in relation to such connections. From this exploration the authors identify varied connective contexts and means which include the learner, the educator, the organisation, and the relevant community. The crossing of divides, forming learner-educator relationships, bringing together diverse groups of learners, establishing networks and partnerships among educators, and establishing links between organisations and communities are all considered as connections which can be created by and within the learning and teaching dynamic. By examining the factors which help to facilitate and/or restrict the possibilities for creating connections in educational contexts, implications for and outcomes of learning and/or teaching arise from the connections created. The final chapter of this book will explicate the realisations that have emerged for educators and researchers working to create connections. These offer suggestions for future directions and enunciate what and how connections might contribute to both educational institutions and the broader society.

Corporate Social Responsibility Daniel Brennan,2011-01-01 The current theory of corporate social responsibility (CSR) is developing along three interwoven lines - oral, social, and environmental. Although everybody recognizes that although CSR is of growing concern in a globalized economy, it being at the top of the board of director's agenda and also good for business, there is no sign of consensus on its rules, structures, or procedures. Now, this collection of essays by leading jurists, businesspeople, and academics takes a giant step toward a more cohesive and durable set of principles that can contribute to a cleaner environment and a better society while respecting and protecting the interests of all stakeholders.

The Green Book Elizabeth Rogers,Thomas M. Kostigen,2007-06-19 Ellen DeGeneres, Robert Redford, Will Ferrell, Jennifer Aniston, Faith Hill, Tim McGraw, Martha Stewart, Tyra Banks, Dale Earnhardt, Jr., Tiki Barber, Owen Wilson, and Justin Timberlake tell you how they make a difference to the environment. Inside *The Green Book*, find out how you can too: - Don't ask for ATM receipts. If everyone in the United States refused their receipts, it would save a roll of paper more than two billion feet long, or enough to circle the equator fifteen times! - Turn off the tap while you brush your teeth. You'll conserve up to five gallons of water per day. Throughout the entire United States, the daily savings could add up to more water than is consumed every day in all of New York City. - Get a voice-mail service for your home phone. If all answering machines in U.S. homes were replaced by voice-mail services, the annual energy savings would total nearly two billion kilowatt hours. The resulting reduction in air pollution would be equivalent to removing 250,000 cars from the road for a year! With wit and authority, authors Elizabeth Rogers and Thomas Kostigen provide hundreds of solutions for all areas of your life, pinpointing the smallest changes that have the biggest impact on the health of our precious planet.

Advancing East Asian Regionalism Melissa Curley,Nicholas Thomas,2012-10-12 Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis. The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples, but also challenged the viability of regional organizations, such as ASEAN, to adapt and respond to the changing circumstances. Advancing East Asian Regionalism looks at the ways in which ASEAN has expanded since the crisis, and evaluates the potential of East Asia to come together in a regional formation - one capable of representing the region as a whole - akin to the European Community. It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism. Coupling case study material on regionalism, institutions, and sectoral cooperation, with theoretical debates on regionalization, this book is an invaluable resource that pushes our understanding of East Asian regionalism forward.

Sovereignty Under Challenge Nathan Glazer,2017-09-20 Sovereignty-the authority of a state to wield ultimate power over its territory, its citizens, its institutions-is everywhere undergoing change as states respond in various ways to the challenges posed, from above and below. Above the state is the widening net of international institutions and treaties dealing with human rights, trade, investment, and monetary affairs; and below it are rising claims within states from long-resident groups discontented with the political order and from new migrants testing its authority. Sovereignty under Challenge deals with a range of such challenges and responses, analyzed in authoritative studies by leading scholars. The introductory chapter sets forth the theme that sovereignty is asserted clearly, but often unpredictably, when governments respond to challenge. It suggests ways of classifying these responses as variables that help explain the changing

nature of sovereignty. Part 1, *The Citizen and the State*, treats the rising tide of dual citizenship and the concerns this arouses in the United States; the work of national human rights commissions in Asia; and the challenge posed to the state by the Falungong movement in China. The two chapters in Part 2, *The Government as Decision-Maker*, examine Japan's response to global warming and the problems of the World Health Organization in orchestrating collaboration among Southeast Asian states in implementing infectious disease control. Part 3, *Sovereignty and Culture*, looks at conflicts engendered by outside change on indigenous economic, cultural, and legal institutions in India, Fiji, Indonesia, and Malaysia. The chapters in Part 4, *Sovereignty and the Economy*, analyze the economic and cultural instability induced by Chinese migration to Russia's far east; the impact on state sovereignty brought about by transnational regulatory campaigns and social activism; the question of indigenous land rights in the Philippines; and the impact of transnational corporations on information technology in Asia. A concluding chapter offers a global assessment of the current status of state sovereignty.

Voting Technology Paul S. Herrnson, Richard G. Niemi, Michael J. Hanmer, Benjamin B. Bederson, Frederick G. Conrad, Michael W. Traugott, 2009-03-19 Voting difficulties hung over America's presidential election in 2000 like a dark cloud. Hanging chads, a butterfly ballot, and the Supreme Court remain the most vivid memories of that political donnybrook. Passage of 2002's Help America Vote Act sparked further interest in the physical process of casting a ballot, yet several recent contests still produced confusion at the polls. A solution to at least some of those problems may be found in new technology, but such innovations carry their own concerns and questions. *Voting Technology* is the first book to investigate in a scientific and authoritative manner how voters respond to the new equipment. The authors—an interdisciplinary group of experts in American elections, political behavior, human-computer interaction, and human factors psychology—assess five commercially available voting systems, each one representing a specific class based on shared design principles, as well as a prototype system not currently available. They evaluate the systems against different criteria (including ease of use, speed, and accuracy) using field experiments, laboratory experiments, and expert reviews. The results reveal the good and bad about the new systems, including specific features that contribute to clarity, confusion, or error. Going beyond the concern with spoiled ballots, they determine whether voters actually cast their ballots for the candidates they intended to support. They address fundamental questions of whether voters like and trust the equipment and whether the various systems are equally usable by all voters. Their research also opens up an entirely new line of inquiry by asking about the interaction between ballot format and voter behavior. The concluding chapter pulls together best practices that will guide manufacturers of voting systems, ballot designers, election officials, political observers, and of course, voters. In a political system based on free exercise of personal choice, the least we can

do is make sure our choices are being accurately recorded and counted.
