Introduction to Conservation Genetics Richard Frankham, Jonathan D. Ballou, David Anthony Briscoe, 2010 This impressive author team brings the wealth of advances in conservation genetics into the new edition of this introductory text, including new chapters on population genomics and genetic issues in introduced and invasive species. They continue the strong learning features for students - main points in the margin, chapter summaries, vital support with the mathematics, and further reading - and now guide the reader to software and databases. Many new references reflect the

expansion of this field. With examples from mammals, birds ...

Insect Conservation Michael J. Samways, Melodie A. McGeoch, Tim R. New, 2009-11-26 With up to a quarter of all insect species heading towards extinction over the next few decades, there is now a pressing need to summarize the techniques available for measuring insect diversity in order to develop effective conservation strategies. *Insect Conservation* outlines the main methods and techniques available to entomologists, providing a comprehensive synthesis for use by graduate students, researchers and practising conservationists worldwide. Both modern and more 'traditional' methodologies are described, backed up by practical background information and a global range of examples. Many newer techniques are included which have not yet been described in the existing book literature. This book will be particularly relevant to postgraduate and advanced undergraduate students taking courses in insect ecology, conservation biology and environmental management, as well as established researchers in these fields. It will also be a valuable reference for nature conservation practitioners and professional entomologists worldwide.

Grabbing Back Alexander Reid Ross, 2014-06-09 Land grabs are a global phenomenon of our times, driven by the ever increasing demands of both global corporations and the governments with which they are allied. But as this powerful and timely book demonstrates, ordinary citizens, small

farmers and ordinary citizens around the world are standing up to defend their own with passion and ingenuity, and they are recording successes that are both extraordinary and inspiring. —Oliver Tickell, Editor, *The Ecologist*. Climate change ravages the earth, while wealthy elites try to grab as much of the world's diminishing resources as possible. As Vandana Shiva writes, land is life. But land, and the struggle to possess it, is also power—colonial and corporate power, to be sure, but also the power of the dispossessed to rise up and call for an end to the global land grab. *Grabbing Back* maps this struggle, bringing together analyses that uncover the politics of cultivation and control. In this unprecedented collection, on-the-ground activists join forces with critically acclaimed scholars to document the commodification and consumption of space, from foreclosed homes to annihilated rainforests, from ecotourism in Sri Lanka to the tar sands of Montana, and to outline the strategies and tactics that might the destruction. With contributions by Vandana Shiva, Noam Chomsky, Max Rameau, Grace Lee Boggs, Michael Hardt, Ahjamu Umi, Ben Dangl, and many others. More Praise for *Grabbing Back*: “Part of the reason that knowledge about the current global land grab is so uncertain is the paucity of perspectives and analysis in defining the problem. This book fills the gap admirably.” —Raj Patel, author of *Stuffed and Starved* The acquisition, control, and exploitation of land, as well as the simultaneous dispossession of land-based and peasant communities, is central to the processes of both colonialism and capitalism. As Fanon reminds us, egalitarian governance and stewardship of land is fundamental to the struggle for liberation and self-determination for all oppressed peoples. This makes *Grabbing Back* a necessary study for anticapitalist and anticolonial movements. —Harsha Walia, author of *Undoing Border Imperialism* Grab back this sparkling mosaic of essays as a treasure of our new-old knowledge commons. Together these pieces replace dichotomies with dialectics, making explicit the inseparability of land and collective life. Together they restore the vital concept of

social ecology in resistance to relentless and increasingly apocalyptic capitalism, with emphasis on its second contradiction: its impossibility on a finite resource base. —Maia Ramnath, author of *Decolonizing Anarchism* “As the forces of thanatos leave no stone unturned in their quest to dominate the entire planet, this anthology provides a much needed antidote. Weaving together accounts from around the world, the authors advocate building grassroots movements aimed at subverting capital’s incessant assault on our lives and land.”—George Katsiaficas, author of *Asia’s Unknown Uprisings* “Never perhaps has the land question been so crucial for anti-capitalist movements, as we are witnessing a global process of enclosure that privatizes lands, waters, forests, displacing millions from their homes, and placing monetary gates to what we rightly considered our commonwealth. It is essential then that we understand what motivates this drive and its effects in all their social and spatial dimensions. *Grabbing Back* takes us through this process, identifying the “reasons” and actors behind this global land-grab and, most important, introducing us to the struggles that people are making across the world to resist being evicted from their lands and to reclaim the earth. ” —George Caffentzis, Committee for Academic Freedom in Africa

Diplomacy And The Independence Of Bangladesh: Portrayal Of Mujib's Statesmanship

Abul Kalam, 2022-09-16 Diplomacy and the Independence of Bangladesh is unique in itself, penned by a social scientist with extensive upbringing in studies on diplomacy, strategic fields, peace research, modern history, and international relations. A witness to the momentous events of Bangladesh's struggle for emancipation, as they unfolded during Pakistani rule in East Pakistan, the author also sets in conceptual designs for objective appraisals of the farsighted statesmanship of its founder, Sheikh Mujibur Rahman, with added reflections on shifting dimensions of diplomacy and their ramifications for mankind's waning civilizational journey.

Shinners, Dissos and Dissenters: Irish republican media activism since the Good Friday Agreement

Paddy Hoey, 2018-01-17 Shinners, dissos, and dissenters is a long-term analysis of the development of Irish republican media activism since 1998 and the tumultuous years that followed the end of the Troubles. It is the first in-depth analysis of the newspapers, magazines and online spaces in which strands of Irish republicanism developed and were articulated in a period in which schism and dissent underscored a return to violence for dissidents. Based on an analysis of Irish republican media outlets as well as interviews with the key activists that produced them, this book provides a compelling snapshot of a political ideology in transition as it is moulded by the forces of the Peace Process and often violent internal ideological schism that threatened a return to the 'bad old days' of the Troubles.
