Evidence-based Otitis Media Richard M. Rosenfeld, 2003 Evidence-Based Otitis Media offers one-stop shopping for the best current evidence to guide management decisions at the individual, organizational, and societal levels. This text details the importance of evidence-based data in interpreting the ever-enlarging body of literature on otitis media. The editors have assembled an impressive group of experts on all aspects of otitis media and addressed comprehensively many issues related to methodology, clinical management, and consequences of this disease. The eight chapters comprising the methodology section provide the necessary background and detail to allow physicians and other health professionals to understand and appreciate the value of evidence-based medicine. Updates include: the incorporation of new original research, systemic reviews, and evidence reports to existing chapters. New chapter topics include: evidence-based medicine, professional evidence reports, molecular and translational research, complementary and alternative medicine, bacteriologic efficacy of antimicrobials, vaccine prevention, international management perspectives, meta-analysis of speech and language sequelae, suppurative complications, host susceptibility to sequelae, and judicious use of systemic and topical antimicrobials. FEATURES: \*Maturation of evidence-based medicine as a foundation for clinical care is reflected throughout the text. \*Extensive evidence tables summarize study characteristics and quantitative outcomes for clinically relevant endpoints \*Internationally distinguished contributors selected based on both their clinical expertise and their ability to write for an evidence-based text

**Experimenting the Human** G Douglas Barrett, 2023-01-13 An engaging consideration of what experimental music can tell us about being human. In Experimenting the Human, G Douglas Barrett argues that experimental music speaks to the contemporary posthuman, a condition in which

science and technology have challenged the centrality of the human amid the uneven temporality of postwar capitalism. Experimental music addresses this condition, Barrett contends, not by adhering to the formal strictures of musical modernism but by producing extra-formal meaning through its immanent transdisciplinary involvements with postwar science, technology, and art movements. Hear Alvin Lucier use his brain waves to play percussion. Picture Pamela Z sculpting the sound of her voice using her wearable BodySynth system. Imagine Pauline Oliveros reflecting her voice off of the moon using radio signals. What these musical artworks have in common is an engagement with the notion that the human has been increasingly challenged through cultural, biological, medical, economic, and technoscientific means. This book brings together music studies, art history, and media studies to provide new perspectives on cybernetics, artificial intelligence, neuroscience, robotics, and radio astronomy. Through a unique meeting of experimental music, posthumanism, and contemporary art, *Experimenting the Human* provides fresh insights into the perennial question of what it means to be human.

**Faith-based Grants** Beverly A. Browning,2005 Both church or ministry leaders and their members are under the impression that the President and Congress have allocated millions and millions of public funds for faithbased organizations?for any purpose, religious or non-religious and that the faithbased grant tree is full of unrestricted, no strings attached ?ready to pick? fruits?also

known as grant awards. In this book, my goal is to help churches and ministries across the United States?large and small, denominational and non-denominational?understand how to align institutions and congregations to receive the abundance intended under the Federal government?s faithbased grants initiative.

*International Organizations in Global Environmental Governance* Frank Biermann,Bernd Siebenhüner,Anna Schreyögg,2009-01-28 This book provides a comparative study of the role of international organizations in environmental governance. Whilst a growing body of literature considers global governance in a number of policy areas, this volume delivers one of the first comprehensive accounts of international organizations in relation to environmental policy. Providing the reader with key insights within this area of global governance, the book focuses on policies developing in relation to climate change, biodiversity and international environmental funding.

Presenting a compelling and up-to-date account of developments within this burgeoning policy area, the volume:

- includes a range of case studies including the World Bank, UNEP and the OECD
- presents quantitative and qualitative research that advances understanding of international organizations in the field of international relations
- delivers contributions from a range of internationally renowned academics and specialists within the field

International Organizations in Global Environmental Governance will be of interest to students and scholars of international relations theory, international economics, environmental policy, organizational theory and environmental studies.

*False Dawn* Lee Penn, 2004 The interfaith movement, which began with the 1893 World's Parliament of Religions in Chicago, has grown worldwide. Although this movement has been largely unknown to the public, it now provides a spiritual face for globalization, the economic and political forces leading us all from nationalism to 'One World'. The most ambitious organization in today's interfaith movement is the United Religions Initiative (URI), founded by William Swing, the Episcopal Bishop of California. Investigative reporter Lee Penn, a Catholic ex-Marxist, exhaustively documents the history and beliefs of the URI and its New Age and globalist allies, the vested interests that support these movements, and the direction they appear to be taking. The interfaith movement is no longer merely the province of a coterie of little-heeded religious idealists with grandiose visions. The URI's proponents have ranged from billionaire George Soros to President George W. Bush, from the far-right Rev. Sun Myung Moon to the liberal Catholic theologian Hans Küng, and from the Dalai Lama to the leaders of government-approved Protestant churches in the People's Republic of China. The interfaith movement, including the URI, is being promoted by globalist and New Age reformers who favor erosion of national sovereignty, marginalization of

traditional religions, establishment of 'global governance', and creation of a new, Earth-based 'global spirituality'—in effect, a one-world religion. Therefore, the URI and the interfaith movement are poised to become the spiritual foundation of the New World Order: the 'new civilization' now proposed by Mikhail Gorbachev, the last leader of the Soviet Union. In *The Reign of Quantity and the Signs of the Times*, French metaphysician René Guénon spoke of the 'anti-tradition' (the forces of materialism and secular humanism) finally giving way to the 'counter-tradition' (the satanic inversion of true spirituality), leading to the regime of Antichrist. The 'anti-tradition' weakens and dissolves traditional spiritualities, after which the 'counter-tradition' sets up a counterfeit in their place. Since Guénon's time, as is well known, anti-traditional forces have greatly advanced worldwide. It is less well-known that counter-traditional movements have also made great strides, and now stand closer to the centers of global political and religious power than ever before. The 'counter-tradition' is making inroads on the political and cultural Right, as much as it is doing on the Left. *False Dawn* painstakingly documents these trends, and speculates on their future development. In so doing, the author takes investigative reporting to the threshold of prophecy, and gives us a stunningly plausible picture of the global religious landscape of the 21st century. This extraordinary project is the literary equivalent of turning over a flat rock. There is much to be seen and learned here—all of it unsettling, disquieting, occasionally downright scary. 'William Murchison, Radford Distinguished Professor, Baylor University When a bishop of a Christian church happily worships alongside a Wiccan invoking other gods, something has gone horribly wrong. In *False Dawn*, Lee Penn has produced a comprehensive and critical history of the United Religions Initiative. This book sounds a clear warning: Anyone who makes theological truth subservient to utopianism denigrates all religions.' —Douglas LeBlanc, Editor, [GetReligion.org](http://GetReligion.org)

**The Future of Corporate Universities** Richard Dealtry, 2017-09-27 The corporate university is now a highly advanced real-time process for increasing your company's performance. This book offers a clear perspective on the use and reuse of your own corporate university application. It is a first class management guide to all the major areas to be addressed for a very successful and continuous outcome.

*Surveillance in Europe* David Wright, Reinhard Kreissl, 2014-09-19 Surveillance in Europe is an accessible, definitive and comprehensive overview of the rapidly growing multi-disciplinary field of surveillance studies in Europe. Written by experts in the field, including leading scholars, the Companion's clear and up to date style will appeal to a wide range of scholars and students in the social sciences, arts and humanities. This book makes the case for greater resilience in European society in the face of the growing pervasiveness of surveillance. It examines surveillance in Europe from several different perspectives, including: the co-evolution of surveillance technologies and practices the surveillance industry in Europe the instrumentality of surveillance for preventing and detecting crime and terrorism social and economic costs impacts of surveillance on civil liberties resilience in Europe's surveillance society. the consequences and impacts for Europe of the Snowden revelations findings and recommendations regarding surveillance in Europe Surveillance in Europe's interdisciplinary approach and accessible content makes it an ideal companion to academics, policy-makers and civil society organisations alike, as well as appealing to top level undergraduates and postgraduates.

The Cooperation Challenge of Economics and the Protection of Water Supplies Joan Hoffman, 2010-04-05 How can we build the institutions that will promote the cooperation needed to meet our intertwined environmental and economic needs? Efforts to meet these twin goals in New York City's watershed collaborations offer some guidance. The experience provides lessons in addressing scattered sources of pollution, encouraging environmentally compatible economic development, and coping with conflicts that are part of the collaboration process. It also yields insights into what we need to work effectively towards sustainable economic development. This book identifies many barriers to achieving the cooperation necessary to solving our water problems and discusses how watershed collaborations are a means to overcoming those barriers. Historical experience and lessons from other watershed collaborations informed the design of New York City's complex watershed collaboration which is shown to contain the elements of a green milieu that can foster sustainable economic development. The particular challenges to the collaboration's environmental and economic goals created by the watershed's rural economy, farming and forestry are described. The unusual inclusion of the analysis of the economic aspects and effects of

collaboration, of the relationship between collaboration and sustainable development, and of the processes of implementation and conflict make this book especially valuable to those interested in collaboration, regulation, environmental cooperation and conflict, watershed protection, economic development in general, and sustainable economic development in particular.

Raising the Bar Claude Fussler, Aron Cramer, Sebastian van der Vegt, 2017-09-08 This book, produced by a unique team of business experts and UN agencies, is designed to fill a critical void-between the support of more than 1,000 organisations for the globally recognised Principles of the United Nations Global Compact and the need for this support to be translated into the day-to-day running of business to create value and improve performance. The ten Global Compact Principles cover human rights, labour standards, environmental responsibility and anti-corruption. But what does it mean to implement the Compact and its principles? How can the broad brush strokes of the Principles form the basis of management change? And how should companies establish benchmarks and performance indicators for implementation? For many companies, the journey is just starting. How can they ensure that they align with the Global Compact in ways that continue to reward their other business objectives? How should they embrace and capitalise on the Global Compact's potential for bringing together business, the public sector, trade unions and civil society in new partnerships? The aim of this book is to answer these questions by providing a performance model clearly grounded on the total quality management approach to assist businesses in putting the Global Compact into practice. Raising the Bar collects together and categorises a wealth of corporate responsibility tools, good practice and case studies in a structure familiar to anyone aware of business excellence models and demonstrates that values create value-leadership commitment to the Global Compact can impact both the boardroom and the shop floor, public image and balance

sheet. Full of graphics and designed with accessibility in mind, the book will be a goldmine for managers looking for inspiration on how their businesses can be good corporate citizens and real proof that good business is also good for the bottom line.

*International Cooperation on WMD Nonproliferation* Jeffrey W. Knopf, 2016-02-15 International efforts to prevent the spread of weapons of mass destruction (WMD)—including nuclear, biological, and chemical weapons—rest upon foundations provided by global treaties such as the Nuclear Non-Proliferation Treaty (NPT) and the Chemical Weapons Convention (CWC). Over time, however, states have created a number of other mechanisms for organizing international cooperation to promote nonproliferation. Examples range from regional efforts to various worldwide export-control regimes and nuclear security summit meetings initiated by U.S. president Barack Obama. Many of these additional nonproliferation arrangements are less formal and have fewer members than the global treaties. *International Cooperation on WMD Nonproliferation* calls attention to the emergence of international cooperation beyond the core global nonproliferation treaties. The contributors examine why these other cooperative nonproliferation mechanisms have emerged, assess their effectiveness, and ask how well the different pieces of the global nonproliferation regime complex fit together. Collectively, the essayists show that states have added new forms of international cooperation to combat WMD proliferation for multiple reasons, including the need to address new problems and the entrepreneurial activities of key state leaders. Despite the complications created by the existence of so many different cooperative arrangements, this collection shows the world is witnessing a process of building cooperation that is leading to greater levels of activity in support of norms against WMD and terrorism.

**The Rise of Japanese NGOs** Kim D. Reimann, 2009-12-04 Looking at domestic politics,

transnational diffusion, the state's relationship with civil society and societal actors, this book demonstrates how and why NGOs active in global issues have become more visible in Japan. It is suitable for postgraduate students and academics working in political science, international relations, and sociology.

**Gender and Public Relations** Christine Daymon, Kristin Demetrious, 2013-08-15 Although there is a small body of feminist scholarship that problematizes gender in public relations, gender is a relatively undefined area of thinking in the field and there have been few serious studies of the socially constructed roles defining women and men in public relations. This book is positioned within the critical public relations stream. Through the prism of 'gender and public relations', it examines not only the manipulatory, but also the emancipatory, subversive and transformatory potential of public relations for the construction of meaning. Its focus is on the dynamic interrelationships arising from public relations activities in society and the gendered, lived experiences of people working in the occupation of public relations. There are many previously unexplored areas within and through public relations which the book examines. These include: the production of social meaning and power relations advocacy and activist campaigns for social and political change the negotiation of identity, diversity and cultural practice celebrity, bodies, fashion and harassment in the workplace notions of managing reputation and communicating policy. In extending the field of inquiry, this edited collection highlights how gender is accomplished and transformed, and, thus how power is exercised and inequality (re)produced or challenged in public relations. The book will expand thinking about power relations and privilege for both women and men and how these are affected by the interplay of social, cultural and institutional practices. Winner of the Outstanding Book PRide Award, awarded by the National Communication Association (NCA).
