Facilities for Rehabilitation Services NHS Estates,2004 This publication contains guidance on the planning and design of facilities for rehabilitation services provided within acute general hospitals, as well as in a range of community settings. It adopts a modular approach to the topic, which describes facilities for separate elements of a general rehabilitation service that can be put together as circumstances require and according to local needs, to achieve good management and value for money in capital and revenue terms. Recognition is given to the need to make decisions locally, as close to the patient as possible, and the involvement of service users and representatives in the planning and design process is encouraged. Sections cover: general service considerations; environment and design considerations, operational aspects including health and safety, catering and domestic services, health records service and IT; general planning issues including parking, entrance and reception areas, clinical and therapeutic spaces; engineering considerations; and cost information. It also includes case studies of four different settings and a patient's perspective of using the services of a rehabilitation unit. This publication supersedes the previous edition (ISBN 0113224516) published in 2000.

Our Molecular Future Douglas Mulhall,2010-01-28 This is a vital book for those who care about the environment, society and deploying new technology to check the destructive power of humankind.- Allan Thornton, President, Environmental Investigation Agency, Washington, DC., and recipient of the Albert Schweitzer MedalThis book will shake conventional environmental wisdom to its roots. ... A landmark work that should be read by environmentalists and businesspersons alike.- Patrick Moore, cofounder, Greenpeace; president, GreenspiritIn Our Molecular Future [Mulhall] neatly outlines why our increasing ability to manipulate single atoms and molecules is a concern, and lays out the opportunities and threats this technology presents. And it's surprisingly readable, unlike most of the nanobabble in the science journals. In the end, as Mulhall admits, he poses more questions than he answers. But that's a good place to start.-New ScientistI just finished reading Douglas Mulhall's outstanding new book Our Molecular Future . . . and I highly recommend it. Put this one at the top of your list! . . . In an easy to read format, with very few forays into geek-speak, Mulhall presents his well considered and thoroughly researched theories. Overall, an excellent overview for those who wish to understand how disruptive and enabling technologies may save us from ourselves and from mother nature. And along the way you will learn a lot about how nanoscale technologies may enhance our lives, provide abundance for all, and greatly raise the standard of living for everyone. . . . Rating: five stars out of five.- Rocky Rawstern, Nanotech NowWhat Alvin Toffler's Future Shock was to the 20th century, Our Molecular Future will be to the 21st century.'What will happen to our jobs, health care, and investments when the molecular revolution hits?How might artificial intelligence transform our lives?How can molecular technologies help us cope with climate changes, earthquakes, and other extreme natural threats?Our Molecular Future explores some intriguing possibilities that answer these questions and many others. Douglas Mulhall describes the exponential changes that are about to be wrought by the nanotechnology and robotic revolutions, which promise to reduce the scale of computing to the nanometer—a billionth of a meter—while increasing computing power to almost unimaginable levels.The resulting convergence of genetics, robotics, and artificial intelligence may give us hitherto undreamed-of capacities to transform our environment and ourselves. In the not-so-distant future, our world may include machines that scour our arteries to prevent heart disease, cars and clothes that change color at our whim, exotic products built in our own desktop factories, and enhancements to our personal financial security despite greatly accelerated obsolescence.But while technology is making these fantastic leaps, we may also encounter surprises that throw us into disarray: climate changes, earthquakes, or even a seemingly improbable asteroid collision. These extremes are not the nightmare scenarios of sensationalists, Mulhall stresses, nor are many of them human induced. Instead, they may be part of nature's cycle—recurring more often than we've

thought possible. The good news is that this convergence of catastrophe and technological transformation may work to our advantage. If we're smart, according to Mulhall, we can use molecular machines to protect ourselves from nature's worst extremes, and harness their potential benefits to usher in an economic renaissance. This visionary link between future technology and past disasters is a valuable guide for every one of us who wants to be prepared for the twenty-first century. Further Praise for OUR MOLECULAR FUTURE: A provocative and profoundly convincing message from the future. - Graham Hancock, archaeological journalist and author of Fingerprints of the Gods In a breezy, journalistic style, Our Molecular Future takes us on a tour through some of the issues that will preoccupy ma

**Rough Sets, Fuzzy Sets, Data Mining and Granular Computing** Hiroshi Sakai, Mihir Chakraborty, Aboul-Ella Hassanien, Dominik Slezak, William Zhu, 2009-11-30 Welcome to the 12th International Conference on Rough Sets, Fuzzy Sets, Data Mining and Granular Computing (RSFDGrC 2009), held at the Indian Institute of Technology (IIT), Delhi, India, during December 15-18, 2009. RSFDGrC is a series of conferences spanning over the last 15 years. It investigates the meeting points among the four major areas outlined in its title. This year, it was co-organized with the Third International Conference on Pattern Recognition and Machine Intelligence (PReMI 2009), which provided additional means for multi-faceted interaction of both scientists and practitioners. It was also the core component of this year's Rough Set Year in India project. However, it remained a fully international event aimed at building bridges between countries. The first section contains the invited papers and a short report on the above-mentioned project. Let us note that all the RSFDGrC 2009 plenary speakers, Ivo Düntsch, Zbigniew Suraj, Zhongzhi Shi, Sergei Kuznetsov, Qiang Shen, and Yukio Ohsawa, contributed with the full-length articles in the proceedings. The remaining six sections contain 56 regular papers that were selected out of 130 submissions, each peer-reviewed by three PC members. We thank the authors for their high-quality papers submitted to this volume and regret that many deserving papers could not be accepted because of our urge to maintain strict standards. It is worth mentioning that there was quite a good number of papers on the foundations of rough sets and fuzzy sets, many of them authored by Indian researchers. The fuzzy set theory has been popular in India for a longer time. Now, we can see the rising interest in the rough set theory.

Burning Center, Porous Borders Eleazar S. Fernandez, 2011-10-17 Burning Center, Porous Borders articulates what the church is and is called to be about in the world, a world now globalized to the point that the local is lived globally and the global is lived locally. The church must respond creatively and prophetically to the challenges-economic disparity, war and terrorism, diaspora, ecological threat, health crisis, religious diversity, and so on-posed by our highly globalized world. It can do so only if the church's spiritual center burns mightily. Conversely, it can burn mightily in the spirit of Christ only if its borders are porous and allows the fresh air/spirit of change to blow in and out. While there is much rhetoric about change, the most common response to change is to continue doing business as usual. This is particularly the case in the face of perceived global threats. In spite of the hoopla and euphoria of the global village, walls of division and exclusion are rising, hearts are constricting, and moral imagination shrinking. In response to this context, Burning Center, Porous Borders proposes alternative ways or images of being a church: burning center and porous borders, wall-buster and bridge-builder, translocal (glocal), mending-healer, radical hospitality, community of the earth-spirit, household of life abundant, dialogians of life, and community of hope. In Burning Center, Porous Borders congregational vitality and progressive praxis kiss and embrace!
