Burden of Proof: Using Known Concepts to Reveal Eternal Truths Brandon Russell,2015-11-28 Where is the proof? Why believe in something if there is no evidence? Also, why believe in something when there is evidence that runs contrary to a particular belief? This is basic logic and a reason why most deny a deity. Most who deny a deity argue there is no evidence. Also they point to scientific evidence to validate their skepticism.However, what if there is evidence and evidence that is overwhelming? Those who deny a deity have every right to demand evidence. Yet, what will they do when they are provided proof? The Bible advocates a God who is sovereign. If this is true everything points to his existence.God is not hiding, he wants to be known. BURDEN OF PROOF: Using Known Concepts to Reveal Eternal Truths, was written to identify the evidence of God's existence.The author answers forty thought-provoking questions that highlight the eternal truths of Scripture. Thus proving that the burden of proof does not lie with those who believe in God but with those who don't.

The Informal American City Vinit Mukhija,Anastasia Loukaitou-Sideris,2014-05-02 An examination of informal urban activities—including street vending, garage sales, and unpermitted housing—that explores their complexity and addresses related planning and regulatory issues. Every day in American cities street vendors spread out their wares on sidewalks, food trucks serve lunch from the curb, and homeowners hold sales in their front yards—examples of the wide range of informal activities that take place largely beyond the reach of government regulation. This book examines the "informal revolution" in American urban life, exploring a proliferating phenomenon often associated with developing countries rather than industrialized ones and often dismissed by planners and policy makers as marginal or even criminal. The case studies and analysis in The Informal City challenge this narrow conception of informal urbanism. The chapters look at informal urbanism across the country, empirically and theoretically, in cities that include Los Angeles, Sacramento, Seattle, Portland, Phoenix, Kansas City, Atlantic City, and New York City. They cover activities that range from unpermitted in-law apartments and ad hoc support for homeless citizens to urban agriculture, street vending and day labor. The contributors consider the nature and underlying logic of these activities, argue for a spatial understanding of informality and its varied settings, and discuss regulatory, planning, and community responses. Contributors Jacob Avery, Ginny Browne, Matt Covert, Margaret Crawford, Will Dominie, Renia Ehrenfeucht, Jeffrey Hou, Nabil Kamel, Gregg Kettles, Anastasia Loukaitou-Sideris, Kate Mayerson, Alfonso Morales, Vinit Mukhija, Michael Rios, Donald Shoup, Abel Valenzuela Jr. Mark Vallianatos, Peter M. Building a Cloud Computing Service Binh Nguyen, As the world moves towards a more globally and electronically connected future, access to the Internet is becoming more commonplace for business, educational, as well as entertainment purposes. Virtually everyone now has a small, mobile device of some sort which will allow them access to the Internet. The concept of Cloud Computing was born as a direct consequence of such connectivity and this has resulted in services advancing towards the Internet Cloud. This allows smaller devices to possess far greater functionality than ever before whether it is via websites and/or other secondary protocols. This document provides advice on how to build a cloud service whether that may be for commercial, educational, and/or more altruistic purposes. It is based on past experience, general knowledge, as well as personal research. It is not intended to be read by people who are new to computing. While it was originally intended only to cover technical aspects of building a cloud service-based company it has since expanded into a document that covers the actual business aspects of building a cloud service-based company as well. It uses Open Source technologies, but takes concepts from all fields. An appendix detailing the "how to commence the beginnings of a cloud service" has also been provided. You will need a at least two computers, enough network equipment to hook them up, an Internet connection as well as possibly a Linux distribution to install on your computer. Feedback/credit on any ideas that are subsequently put into action based on the content of this document would be appreciated. Any feedback on the content of this document is welcome. Emerging Military Technologies Wilson W.S. Wong,2013-01-07 This book examines emerging defense technologies such as directed energy weapons, nanotech devices, and bioscience applications that have the potential to dominate international relations in the future, just as nuclear weapons and space infrastructure-assisted conventional weapons do now. Emerging Military Technologies: A Guide to the Issues examines the

potential of the United States to bring new technologies to deployment in the service of America's security and defense. The work also discusses how other international actors may regard the United States' investment in these high-tech capabilities, identifying possible resultant counter actions, and presents several divergent viewpoints on what the future may bring. The book thoroughly explores three general categories of emerging technologies: autonomous computers, nanotechnology and biotechnology, and the interrelated topics of directed energy weapons and ubiquitous space access. Security studies expert Wilson W.S. Wong balances coverage of today's cutting-edge science and engineering with treatment of real-world concerns of effectiveness, military ethics, and international relations in the 21st century. An invaluable resource for members of the military and intelligence communities, this book also provides general readers with an accessible introduction to these highly technical topics.

Booklist, Starred Review Offers 175 actions readers can take to create a more sustainable global environment. You care about the environment—the world you live in, and the world you are going to leave behind for future generations. Perhaps you already avoid wasting energy and buying more things than you need – reducing your Ecological Footprint. Yet there is a limit, given your family and circumstances. What can you do that will truly help heal our planet? Our Environmental Handprints is the first book to fully explore your "Handprint" – how you can create sustainability in your life and in the world. Your Handprint is limited only by yourimagination. The good you do can be greater than your Footprint. It is time to put more energy into your Handprint! The smart beauty of the Handprint is that it can be self-perpetuating. Take planting a tree as an example. You put a seedling into the ground, water it, and then leave it alone. That tree will then grow itself and pull carbon dioxide from the air and create oxygen for us to breathe for as long as it lives. And, seeds from that tree create more trees. Here, Jon Biemer draws our attention to proven strategies across the spectrum. We make a difference with the choices we make about the clothing we buy, the investments we make, and even the food we choose to eat. Handprint Thinking applies to shelter (eco-remodeling and LEED buildings), motion (electric cars and living without a car), and earth-friendly energy. He provides 175 proven Handprint suggestions that will help readers align their interests, lifestyle, and motivations toward a more sustainable earth.
