Revolutionary Wealth Alvin Toffler,Heidi Toffler,2007-06-12 Since the mid-1960s, Alvin and Heidi Toffler have predicted the far-reaching impact of emerging technological, economic, and social developments on our businesses, governments, families, and daily lives. In *REVOLUTIONARY WEALTH*, they once again demonstrate their unparalleled ability to illuminate current trends and anticipate what they mean for the future. *REVOLUTIONARY WEALTH* focuses on how wealth will be created—and who will get it—in the twenty-first century. As the knowledge-based economy (a reality the Tofflers predicted forty years ago) continues to replace the industrial-based economy, they argue, money is no longer the sole determinate of wealth. The Tofflers explain that we are becoming a nation of “prosumers,” consuming what we ourselves produce, and argue that we have all taken on “third jobs”—work we unwittingly do without pay for some of the biggest corporations in the country. Using fascinating examples from our daily lives, they illustrate how our everyday activities—from parenting and volunteering to blogging, painting our houses, and improving our diets—contribute to a non-monetary economy that is largely hidden from economists. Writing with the same insight and clarity that made their earlier books bestsellers, the Tofflers present fresh, groundbreaking new ways of thinking about wealth.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
