Innovative Learning Analytics for Evaluating Instruction Theodore W. Frick, Rodney D. Myers, Cesur Dagli, Andrew F. Barrett, 2021-07-19 Innovative Learning Analytics for Evaluating Instruction covers the application of a forward-thinking research methodology that uses big data to evaluate the effectiveness of online instruction. Analysis of Patterns in Time (APT) is a practical analytic approach that finds meaningful patterns in massive data sets, capturing temporal maps of students' learning journeys by combining qualitative and quantitative methods. Offering conceptual and research overviews, design principles, historical examples, and more, this book demonstrates how APT can yield strong, easily generalizable empirical evidence through big data; help students succeed in their learning journeys; and document the extraordinary effectiveness of First Principles of Instruction. It is an ideal resource for faculty and professionals in instructional design, learning engineering, online learning, program evaluation, and research methods.

Connecting People with Jobs: The Labour Market, Activation Policies and Disadvantaged Workers in Slovenia OECD, 2016-10-28 This report examines the use of activation policies in Slovenia to improve labour market outcomes for long-term unemployed people, low-skilled workers, older workers, and workers who were made or are at risk of becoming displaced.

The Role of the Public Sector Greve, Bent, 2022-08-05 At last – a textbook on the public sector for students of social policy, public policy, political science and sociology. This book explains why we have a public sector and what tasks it is expected to perform.

Heart Replacement Tetsuzo Akutsu, Hitoshi Koyanagi, 2012-12-06 The 6th International Symposium on Artificial Heart and Assist Devices met in Tokyo in July 1996, bringing together researchers and specialists from around the world. The symposiums proceedings in this volume comprise papers from nine sessions, each opening with contributions by leading scientists: TAH, heart transplantation, biomaterials, VAS, clinical application, pathophysiology, engineering, new approaches, and special sessions. Of special note is the inclusion, for the first time, of pathophysiology related to clinical use of assist devices. The clinical application section includes a paper by Dr. Michael DeBakey on the progress made in recent years. With descriptions of the scientific exhibition, accompanied by photographs of all artificial heart devices and systems displayed by major laboratories and manufacturers, Artificial Heart 6 presents the latest information on developments in the field of artificial heart, biomaterials, and heart transplantation.

De Gruyter Handbook of Contemporary Welfare States Bent Greve, 2022-09-05 Globalisation, regionalisation, new technology, demography, voters' expectations and re-structuring of societies are expected to influence welfare state development for years to come. This handbook analyses how different welfare state models and regimes will be able to cope with contemporary and future challenges, providing a variety of evidence based tools that make it essential reading for students, researchers and policy makers alike.

Connecting People with Jobs: Key Issues for Raising Labour Market Participation in Australia OECD, 2017-03-09 This report on Australia is the third country study published in a series of reports looking into strategies to encourage greater labour market participation of all groups in society with a special focus on the most disadvantaged.

Economic Dignity Gene Sperling, 2021-10-12 "Timely and important . . . It should be our North Star for the recovery and beyond." –Hillary Clinton "Sperling makes a forceful case that only by speaking to matters of the spirit can liberals root their belief in economic justice in people's deepest aspirations—in their sense of purpose and self-worth." –The New York Times When Gene Sperling was in charge of coordinating economic policy in the Obama White House, he found himself surprised when serious people in Washington told him that the Obama focus on health care was a distraction because it was "not focused on the economy." How, he asked, was the fear felt by millions of Americans of being one serious illness away from financial ruin not considered an economic issue? Too often, Sperling found that we measured economic success by metrics like GDP instead of whether the economy was succeeding in lifting up the sense of meaning, purpose, fulfillment, and security of people. In *Economic Dignity*, Sperling frames the way forward in a time of wrenching change and offers a vision of an economy whose guiding light is the promotion of dignity for all Americans.

Social and Labour Market Policy Bent Greve, 2018-02-02 Social and Labour Market Policy: The Basics is an engaging and accessible introduction to the subject, which explores the broad historical, social and economic factors which have affected the differing types of social and labour market policies found in welfare states. Drawing links between social policy and labour market policy the book explores key introductory topics including: Defining what we mean when we speak of social policy and labour market policy Historical origins including Bismarckian and Beveridgian reforms The range of social issues social policy aims to address, e.g. housing policy and child provision Showing how social policy enhances well-being Ideas and ideology and the effects of globalisation The functioning of the labour market. Social and Labour Market Policy: The Basics provides readers with an understanding of their importance to the development of contemporary society. This book is suitable for students of social policy as well as students taking a social policy module as part of a wider course within politics, social work, health care, sociology and economics. Researchers interested in the field will also benefit from reading this book.

The Oxford Handbook of Exercise Psychology Edmund O. Acevedo, 2012-04-13 Awareness of the importance of exercise and physical activity to optimal physical and mental health has never been greater. It is widely acknowledged that physical inactivity is a leading cause of death, yet statistics show less than 50% of Americans participate in regular physical activity. This information highlights the public health challenge of increasing participation in physical activity to enhance physical health and to buoy the psychological benefits associated with physical activity. The Oxford Handbook of Exercise and Psychology is an authoritative and comprehensive presentation of the breadth and depth of empirical contributions utilizing state-of-the-science theories and approaches in exercise psychology. Chapters are authored by leading investigators across the globe who have made significant scientific contributions addressing the behavioral aspects of physical activity. Sections of the book address the effects of physical activity on mental health; knowledge gathered utilizing psychobiological perspectives; behavioral factors that impact exercise motivation; scientific contributions addressing the physical activity benefits with special populations, including individuals with physical disabilities, older adults and cancer patients; and promising

areas for additional investigation. Each chapter presents a summary of scientific advancements in the topic area as a foundation for future investigation. Fueled by a broad range of disciplines and interdisciplinary approaches, the field of exercise psychology is growing, and this comprehensive handbook will be the perfect resource for students, researchers, and physicians interested in exercise motivation and the mental health benefits of physical activity.

Competitiveness and Private Sector Development Competitiveness in South East Europe 2021 A Policy Outlook OECD,2021-07-05 The future sustainable economic development and well-being of citizens in South East Europe depend on greater economic competitiveness. Reinforcing the region's economic potential in a post-COVID-19 context requires a holistic, inclusive and growth-oriented approach to policy making.

Command and Control of Disaster Operations Walter G. Green, III,2001 Originally written as a study guide to assist individuals preparing for the Certified Crisis Operations Manager examination, this volume provides a reference manual for emergency managers on the organizational structures, facilities, and procedures used to manage disaster response operations. The focus is on management of operations during the period immediately prior to disaster onset, the event impact, and the immediate post impact period. Topics covered include the Incident Command System, Command Posts, Emergency Operations Center facilities and organization, emergency plans and guidance documents, information management, interface procedures, communications, strategy and tactics, decision processes, risks and safety, media relations, documentation, stress management, and standards and ethics.

Middleware 2000 Joseph Sventek,Geoffrey Coulson,2003-06-29 Middleware is everywhere. Ever since the advent of sockets and other virtu- circuit abstractions, researchers have been looking for ways to incorporate high- value concepts into distributed systems platforms. Most distributed applications, especially Internet applications, are now programmed using such middleware platforms. Prior to 1998, there were several major conferences and workshops at which research into middleware was reported, including ICODP (International C- ference on Open Distributed Processing), ICDP (International Conference on Distributed Platforms) and SDNE (Services in Distributed and Networked - vironments). Middleware'98was a synthesis of these three conferences. Middleware 2000 continued the excellent tradition of Middleware'98. It p- vided a single venue for reporting state-of-the-art results in the provision of distributed systems platforms. The focus of Middleware 2000 was the design, implementation, deployment, and evaluation of distributed systems platforms and architectures for future networked environments. Among the 70 initial submissions to Middleware 2000, 21 papers were - lected for inclusion in the technical program of the conference. Every paper was reviewed by four members of the program committee. The papers were judged - cording to their originality, presentation quality, and relevance to the conference topics. The accepted papers cover various subjects such as caching, re?ection, quality of service, and transactions.

Connecting People with Jobs Towards Better Social and Employment Security in Korea OECD,2018-03-14 This report has a special focus on low-income groups, jobseekers and workers, and policies geared towards closing the considerable gaps these groups are facing around income and employment support in Korea. Shaping the Future of Work Thomas A. Kochan, Lee Dyer,2020-11-24 This book provides a clear roadmap for the roles workers and leaders in business, labor, education, and government must play in building a new social contract for all to prosper. It is a call to action for a collaborative effort to develop both high-quality jobs and strong, successful businesses while simultaneously overcoming the deep social and economic divisions that are all too apparent in society today. Written by two leading and trusted experts in the field of employment and work from MIT and Cornell University, this book is a practical, action-oriented guide. Readers will feel empowered to take actions needed to shape a better future of work for themselves, their employees, their co-workers, and others they may represent. It emphasizes the need to fix America's broken social contract and reimagine a new one. The most important message of this book is that we have the ability to shape the work of the future by harnessing the power of new technologies. The book is essential reading for business executives, labor leaders and workforce advocates, government policy makers, politicians, and anyone who is interested in using emerging knowledge and technologies to drive innovation, creating high-quality jobs, and shaping a more broadly shared prosperity.

Part-Time for All Jennifer Nedelsky,Tom Malleson,2023-05-26 An innovative view of how everyone doing part-time work and part-time caregiving would promote flourishing families, free time, equality, and the true value of care. The way that Western countries approach work and care for others is fundamentally dysfunctional. The amount of time spent at work places unsustainable stress on families, particularly in the face of rising inequality, while those who perform care are underpaid and their labor undervalued. In Part-Time for All, Jennifer Nedelsky and Tom Malleson propose a plan to radically restructure both work and care. As such, they offer a solution to four pressing problems: the inequality of caregivers; family stress from competing demands of work and care; chronic time scarcity; and policymakers who are ignorant about the care that life requires--the care/policy divide. Nedelsky and Malleson argue that no capable adult should do paid work for more than 30 hours per week, so that they can contribute substantial amounts of time to unpaid care for family, friends, or other communities of care. While the authors focus primarily on human-to-human care, they also include care for the earth as a vital part of this shift. All of the elements of Nedelsky and Malleson's proposal already exist piecemeal in various countries. What is needed is to integrate the key reforms and scale them up. The result is an actionable plan to motivate widespread take-up of part-time work and part-time care. Highlighting how these new norms can create synergies of institutional transformation while fostering a cultural shift in the value of care and work, this care manifesto identifies the deep changes that are needed and lays out a feasible path forward.
