**Successful ICT Projects in FrontPage** Robert S. U. Heathcote,Bonie Ngowi,2002 This book is designed to help students on an 'A' Level, Advanced VCE or similar course to design and implement a Web site using Microsoft FrontPage 2002. FrontPage is a suitable software package for the project component in 'AS' level and Advanced VCE courses. Parts 1 to 2 of the book take the reader through the steps in creating and publishing a Web site both with and without the use of a wizard. Part 3 gives advice on all stages of project work from the definition of a suitable problem through to documentation. The book was written primarily for 'AS' and 'A' Level Information and Communication Technology students and contains in Appendix B the AQA mark scheme for 'AS' Module 3: Coursework. It will also be suitable for students on many other courses at different levels since the mark scheme, with minor variations, is one which applies to projects in many ICT courses. For a second year project in an 'A' Level course, data collected from a Web site can be exported and used in an Access database. This aspect could be developed further to fulfil the requirements of, for example, Module 6 of the AQA ICT specification.A sample project is included to show students how a complete project report may be laid out.

**Voices of Ancient Egypt** Rosalie David,2014-10-28 Supporting the current trends toward document-based teaching, this book introduces the reader to the multifaceted world of ancient Egypt through revealing excerpts from 51 texts written by Egyptians themselves. A wealth of evidence survives to tell the stories of ancient Egypt, including monuments, artifacts, paintings, sculptures, human remains, and literature. But there is yet another way to access this fascinating culture—through original writings that span the period from circa 3100 BCE to 400 CE. This book's 51 documents include schoolboys' letters and exercises, prayers, hymns, love poems, narratives, historical inscriptions, medical and mathematical texts, and religious and funerary inscriptions. Most of the texts are penned by Egyptians, but another perspective is added through the inclusion of commentary about Egypt by the Greek historian Herodotus. The documents are divided into sections to shed light on numerous aspects of Egyptian life including domestic values and household provision, economics, intellectual concerns, government and warfare, recreational life, and religious beliefs and practices. Each section provides historical context and discusses the meaning and significance of the individual excerpt. The work highlights related themes and ideas to encourage students to explore the legacy of ancient Egypt in an essay, paper, drama production, or class presentation.

Exploring the Postsecular ,2010-05-17 This book examines contemporary relations between religion, politics and urban societies from a theoretical perspective. **The Global Achievement Gap** Tony Wagner,2014-03-11 Despite the best efforts of educators, our nation's schools are dangerously obsolete. Instead of teaching students to be critical thinkers and problem-solvers, we are asking them to memorize facts for multiple choice tests. This problem isn't limited to low-income school districts: even our top schools aren't teaching or testing the skills that matter most in the global knowledge economy. Our teens leave school equipped to work only in the kinds of jobs that are fast disappearing from the American economy. Meanwhile, young adults in India and China are competing with our students for the most sought-after careers around the world. Education expert Tony Wagner has conducted scores of interviews with business leaders and observed hundreds of classes in some of the nation's most highly regarded public schools. He discovered a profound disconnect between what potential employers are looking for in young people today (critical thinking skills, creativity, and effective communication) and what our schools are providing (passive learning environments and uninspired lesson plans that focus on test preparation and reward memorization). He explains how every American can work to overhaul our education system, and he shows us examples of dramatically different schools that teach all students new skills. In addition, through interviews with college graduates and people who work with them, Wagner discovers how teachers, parents, and employers can motivate the &net; generation to excellence. An education manifesto for the twenty-first century, *The Global Achievement Gap* is provocative and inspiring. It is essential reading for parents, educators, business leaders, policy-makers, and anyone interested in seeing our young people succeed as employees and citizens.
