The Desegregation of Public Libraries in the Jim Crow South Shirley A. Wiegand,Wayne A. Wiegand,2018-04-14 In The Desegregation of Public Libraries in the Jim Crow South, Wayne A. and Shirley A. Wiegand tell the comprehensive story of the integration of southern public libraries. As in other efforts to integrate civic institutions in the 1950s and 1960s, the determination of local activists won the battle against segregation in libraries. In particular, the willingness of young black community members to take part in organized protests and direct actions ensured that local libraries would become genuinely free to all citizens. The Wiegands trace the struggle for equal access to the years before the Supreme Court's Brown v. Board of Education decision, when black activists in the South focused their efforts on equalizing accommodations, rather than on the more daunting—and dangerous—task of undoing segregation. After the ruling, momentum for vigorously pursuing equality grew, and black organizations shifted to more direct challenges to the system, including public library sit-ins and lawsuits against library systems. Although local groups often took direction from larger civil rights organizations, the energy, courage, and determination of younger black community members ensured the eventual desegregation of Jim Crow public libraries. The Wiegands examine the library desegregation movement in several southern cities and states, revealing the ways that individual communities negotiated—mostly peacefully, sometimes violently—the integration of local public libraries. This study adds a new chapter to the history of civil rights activism in the mid-twentieth century and celebrates the resolve of community activists as it weaves the account of racial discrimination in public libraries through the national narrative of the civil rights movement.

Christianity in China Xiaoxin Wu,2015-07-17 Now revised and updated to incorporate numerous new materials, this is the major source for researching American Christian activity in China, especially that of missions and missionaries. It provides a thorough introduction and guide to primary and secondary sources on Christian enterprises and individuals in China that are preserved in hundreds of libraries, archives, historical societies, headquarters of religious orders, and other repositories in the United States. It includes data from the beginnings of Christianity in China in the early eighth century through 1952, when American missionary activity in China virtually ceased. For this new edition, the institutional base has shifted from the Princeton Theological Seminary (Protestant) to the Ricci Institute for Chinese-Western Cultural Relations at the University of San Francisco (Jesuit), reflecting the ecumenical nature of this monumental undertaking.

Treatise on Geomorphology ,2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline. The number of peer-reviewed papers published in geomorphic journals has grown steadily for more than two decades and, more importantly, the diversity of authors with respect to geographic location and disciplinary background (geography, geology, ecology, civil engineering, computer science, geographic information science, and others) has expanded dramatically. As more good minds are drawn to geomorphology, and the breadth of the peer-reviewed literature grows, an effective summary of contemporary geomorphic knowledge becomes increasingly difficult. The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics, to graduate students starting a literature review for their thesis work, and professionals seeking a concise summary of a particular topic. Information on the historical development of diverse topics within geomorphology provides context for ongoing research; discussion of research strategies, equipment, and field methods, laboratory experiments, and numerical simulations reflect the multiple approaches to understanding Earth's surfaces; and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research. Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces. This Treatise on Geomorphology provides a useful synthesis of the state of the discipline, as well as highlighting productive research directions, that Educators and students/researchers will find useful. Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field. Undergraduate students looking for term paper topics, to graduate students starting a literature review for their thesis work, and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor-in-Chief, Prof. J. F. Shroder of the University of Nebraska at Omaha, is past president of the QG&G section of the Geological Society of America and present Trustee of the GSA Foundation, while being well respected in the geomorphology research community and having won numerous awards in the field. A host of noted international geomorphologists have contributed state-of-the-art chapters to the work. Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor-in-Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14-volume masterpiece. From the foundations and history of geomorphology through to geomorphological innovations and computer modelling, and the past and future states of landform science, no stone has been left unturned!

Climate and Society in Europe Christian Pfister,Heinz Wanner,2021-09-06 A richly illustrated book on the history of climate change in Europe. Two perspectives, one unique book: two leading experts, a historian and a climatologist, co-author a new standard work on climate history. An overview of the connection between climatic and social developments over the last 1000 years. For the first time, a historian and a climatologist with knowledge of climate history have worked closely together to create a unique book, combining climate reconstructions based on documented data in their human-historical context with temporally highly resolved analyses of climate and glaciers. Here we can clearly see how changes in climate affected the environment and people of Europe over many centuries, with important lessons for the future. A wonderfully engaging and well-documented account by two of Europe's leading climate scientists. Prof. Dr. Raymond Bradley, Director, Climate System Research Center, University of

Massachusetts, Amherst (USA) This unique book provides new fascinating insights into the interaction of past climate and society in Europe. It can be highly recommended to climatologists, historians and geoscientists, but also to students and the broad public. Prof. Dr. Rudolf Brázdil, Department of Geography, Masaryk University, Brno (Czech Republic) The authors offer a truly interdisciplinary combination of history and science in order to explore the complex relationships of climate and society over the past millennium. They demonstrate convincingly that climate change is nothing new while at the same time revealing the character of the unprecedented climatic epoch mankind now faces. Prof. Dr. Jan de Vries, Professor Emeritus of History and Economics, University of California, Berkeley (USA) Christian Pfister is Professor Emeritus of Economic, Social and Environmental History at the University of Bern, Switzerland. He was founding president of the European Society for Environmental History (ESEH). Heinz Wanner is Professor Emeritus of Geography and Climatology. He was co-chair of the international Past Global Changes (PAGES) project and a member of the UN Intergovernmental Panel on Climate Change (IPCC). Both scientists work at the renowned Oeschger Centre for Climate Change Research at the University of Bern.

Learning That Lasts Ron Berger,Libby Woodfin,Anne Vilen,2016-02-17 A practical guide to deeper instruction—a framework for challenging, engaging, and empowering students of all ages For schools to meet ambitious new standards and prepare all students for college, careers, and life, research has shown unequivocally that nothing is more important that the quality of daily instruction. Learning That Lasts presents a new vision for classroom instruction that sharpens and deepens the quality of lessons in all subject areas. It is the opposite of a 'teacher-proof' solution. Instead, it is predicated on a model of instruction that honors teachers as creative and expert planners of learning experiences for their students and who wish to continuously grow in their instructional and content knowledge. It is not a theoretical vision. It is a model of instruction refined in some of the nation's most successful public schools—schools that are beating the odds to create remarkable achievement—sited primarily in urban and rural low-income communities. Using case studies and examples of powerful learning at all grade levels and in all disciplines, Learning That Lasts is a guide to creating classrooms that promote deeper understanding, higher order thinking, and student independence. Through text and companion videos, readers will enter inspiring classrooms where students go beyond basics to become innovators, collaborators, and creators. Learning That Lasts embraces a three-dimensional view of student achievement that includes mastery of knowledge and skills, character, and high-quality work. It is a guide for teachers who wish to make learning more meaningful, memorable, and connected to life, and inspire students to do more than they think possible.

Genealogist's Address Book. 6th Edition Elizabeth Petty Bentley,2009-02 This book is the answer to the perennial question, What's out there in the world of genealogy? What organizations, institutions, special resources, and websites can help me? Where do I write or phone or send e-mail? Once again, Elizabeth Bentley's Address Book answers these questions and more. Now in its 6th edition, The Genealogist's Address Book gives you access to all the key sources of genealogical information, providing names, addresses, phone numbers, fax numbers, e-mail addresses, websites, names of contact persons, and other pertinent information for more than 27,000 organizations, including libraries, archives, societies, government agencies, vital records offices, professional bodies, publications, research centers, and special interest groups.

Picturing Performance Thomas F. Heck,R. L. Erenstein,1999 There has long been a need to introduce performing-arts enthusiasts and students to the fascinating field of iconography, both as manifested in art history and in its more pragmatic or applied forms. Yet relatively little systematic effort has been made to collect and interpret centuries of such visual evidence in the light of the best available art-historical information, combined with corroborating textual documentation and insights from the histories of performance disciplines. Aspiring iconographers of the performing arts need to be aware that there are often several levels of interpretation which great works of visual art will sustain. This book explores these levels of interpretation: a surface or literal reading, a deeper reading of the work which seeks to enter the mind of the artist and asks how and why he put a given work together, and the deepest reading of the work relating it to the artistic traditions and culture in which the artist lived. In expounding on these levels of iconographic interpretations four discourses by scholars active in the study of visual records are given in relation to traditions, techniques, and trends: performance in general (Katritzky), music (Heck), theatre (Erenstein), and dance (Smith). Effort is made to keep abreast of modern technology influencing iconographic representations as on the Internet and virtual reality.Thomas F. Heck is Professor of Musicology and Head of the Music and Dance Library at the Ohio State University.
