### **Hollywood or History?** Scott L. Roberts, Charles J.

Elfer, 2021-01-01 The challenges of teaching history are acute where we consider the world history classroom. Generalized world history courses are a part of many, if not most, K-12 curricular frameworks in the United States. While United States history tends to dominate the scholarship and conversation, there are an equally wide number of middle-level and secondary students and teachers engaged in the study of world history in our public schools. And the challenges are real. In the first place, if we are to mark content coverage as a curricular obstacle in the history classroom, generally, then we must underscore that concern in the world history classroom and for obvious reasons. The curricular terrain to choose from is immense and forever expanding, dealing with the development of numerous civilizations over millennia and across a wide geographic expanse. In addition to curricular concerns, world historical topics are inherently farther away from most students' lives, not just temporally, but often geographically and culturally. Thus the rationale for the present text, *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach World History*. The reviews of the first volume *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach United States History* strategy have been overwhelmingly positive, especially as it pertains to the application of the strategy for practitioner. Classroom utility and teacher practice have remained our primary objectives in developing the *Hollywood or History?* strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history. We believe that students' connection to film, along with teachers' ability to use film in an effective manner, will

help alleviate some of the challenges of teaching world history. The book provides 30 secondary lesson plans (grades 6-12) that address nine eras in world history.

*The Joy of Digital Photography* Jeff Wignall, 2006 Jeff Wignall--author of the bestselling *Joy of Photography*--knows how to encourage photographers of all skill levels: his easy-to-grasp explanations of technique and equipment, and his inspirational attitude have distinguished *The Joy of Digital Photography* from any other digital manual. And now the best book on the subject is getting an update, to include all the newest technology and software. Everything is covered and illustrated with top-of-the-line images: digital vision; digital tools (cameras, lenses, accessories); common problems and solutions; exposure and flash; working with light; handling weather seasons and mood; travel and landscape photography; portraiture; sports photography; post-production, including seeing, sharing, and storing digital images; basic desktop printing; the digital darkroom; a Photoshop primer; sharing the image; and much, much more.

**Modernism and Fascism** R. Griffin, 2007-05-22 Intellectual debates surrounding modernity, modernism and fascism continue to be active and hotly contested. In this ambitious book, renowned expert on fascism Roger Griffin analyzes Western modernity and the regimes of Mussolini and Hitler and offers a pioneering new interpretation of the links between these apparently contradictory phenomena.

*Text and Image in the City* Catherine Armstrong, John Hinks, 2017-03-07 The essays in this collection discuss how the city is 'textualized', and address many aspects of how texts and images are written and produced in, and about, cities. They demonstrate how urban texts and images provoke reactions, in city-dwellers, visitors, civic and political actors, that, in turn, impact upon the shape of the city itself. Many kinds of urban texts - both manuscript and print - are discussed, including chapbooks,

periodicals, poetry, graffiti and street-signs. The essays derive from a range of disciplines including book history, urban history, cultural history, literary studies, art history and urban planning, and explore some key questions in urban cultural history, including the relationship between text, image and the city; the function of the text or image within an urban environment; how urban texts and images have been used by those in positions of power and by those with little or no power; the ways in which urban identity and values have been reflected in 'street literature', graffiti and subversive texts and images; and whether theories of urban space can help us to understand the relationship between text, image and the city. As such, this volume will serve to enhance the reader's understanding of the nature of urbanism from a historical perspective, the creation and representation of urban space, and the processes of urbanization. It investigates how the creation, distribution and consumption of urban texts and images actively affect the shaping of the city itself - a mutually constitutive process whereby text, image and city create and sustain each other.

Teaching the Bible Mark Roncace, Patrick Gray, 2012-11-05

While books on pedagogy in a theoretical mode have proliferated in recent years, there have been few that offer practical, specific ideas for teaching particular biblical texts. To address this need, *Teaching the Bible*, a collection of ideas and activities written by dozens of innovative college and seminary professors, outlines effective classroom strategies—with a focus on active learning—for the new teacher and veteran professor alike. It includes everything from ways to incorporate film, literature, art, and music to classroom writing assignments and exercises for groups and individuals. The book assumes an academic approach to the Bible but represents a wide range of methodological, theological, and ideological perspectives. This volume is an indispensable resource for anyone who teaches classes on the Bible.

**More Everyday Engineering** Richard H. Moyer, Susan A. Everett, 2016-08-01 What makes a windup toy get up and go? How does an earbud operate? And why does the line you're waiting in always seem the slowest? Get middle-schoolers engaged in the fascinating science behind familiar items with **More Everyday Engineering**. Like **Everyday Engineering**, this compilation brings together activities based on the "Everyday Engineering" columns from NSTA's award-winning journal *Science Scope*. Thirteen hands-on investigations focus on three aspects of engineering: designing and building, reverse engineering to learn how something works, and constructing and testing models. Like the original collection, this book is easy to use. Each investigation is a complete lesson that includes in-depth teacher background information, expected sample data, a materials list, and a student activity sheet for recording results. The activities use simple, inexpensive materials you can find in your science classroom or at a dollar store. Whether you're a teacher, parent, or enrichment-program leader, go beyond the usual bridge-building and egg-drop activities. Spark curiosity with appealing activities that will help middle schoolers understand that engineering truly is a part of their everyday lives.

**Nanomedical Device and Systems Design** Frank Boehm, 2016-04-19 Nanomedical Device and Systems Design: Challenges, Possibilities, Visions serves as a preliminary guide toward the inspiration of specific investigative pathways that may lead to meaningful discourse and significant advances in

nanomedicine/nanotechnology. This volume considers the potential of future innovations that will involve nanomedical devices and systems. It endeavors to explore remarkable possibilities spanning medical diagnostics, therapeutics, and other advancements that may be enabled within this discipline. In particular, this book investigates just how nanomedical diagnostic and therapeutic devices and systems might ultimately be designed and engineered to accurately diagnose and eradicate pathogens, toxins, and myriad disease states. This text utilizes an author conceptualized exemplar nanodevice and system, the Vascular Cartographic Scanning Nanodevice (VCSN), to explore various prospective design considerations that might facilitate and enable selected functionalities of advanced autonomous nanomedical devices. It showcases a diverse group of expert contributing authors, who describe actual laboratory-based research aimed at the advancement of nanomedical capabilities. It also articulates more highly conceptual nanomedical possibilities and visions relating to the implementation of nanomedical technologies in remote regions and the developing world, as well as nanomedicine in space applications, human augmentation, and longevity. Investigates nanomedical diagnostic and therapeutic strategies that might be applied in remote regions and the developing world Discusses how nanomedicine might be utilized in space applications, inclusive of spacesuits, spacecraft, future human habitats on the Moon and Mars, and deep space Covers how nanomedicine may be implemented in selected forms of human augmentation and toward the potentially radical extension of the human life span This book benefits undergraduate and graduate students who are studying nanotechnology/nanomedicine, as well as medical administrative, scientific research, and manufacturing professionals in this industry.

Media Depictions of Brides, Wives, and Mothers Alena Amato Ruggiero, 2012-09-27 Media Depictions of Brides, Wives, and Mothers, edited by Alena Amato Ruggiero, explores how television, film, the internet, and other media variously perpetuate gender stereotypes. The contributors to this volume bring a variety of feminist rhetorical and media criticism approaches from across the communication discipline to their analyses of how media shape our expectations of the performance of women's domestic roles.

Second Generation Biometrics: The Ethical, Legal and Social Context Emilio Mordini, Dimitros Tzovaras, 2012-05-02 While a sharp debate is emerging about whether conventional biometric technology offers society any significant advantages over other forms of identification, and whether it constitutes a threat to privacy, technology is rapidly progressing. Politicians and the public are still discussing fingerprinting and iris scan, while scientists and engineers are already testing futuristic solutions. Second generation biometrics - which include multimodal biometrics, behavioural biometrics, dynamic face recognition, EEG and ECG biometrics, remote iris recognition, and other, still more astonishing, applications - is a reality which promises to overturn any current ethical standard about human identification. Robots which recognise their masters, CCTV which detects intentions, voice responders which analyse emotions: these are

only a few applications in progress to be developed. This book is the first ever published on ethical, social and privacy implications of second generation biometrics. Authors include both distinguished scientists in the biometric field and prominent ethical, privacy and social scholars. This makes this book an invaluable tool for policy makers, technologists, social scientists, privacy authorities involved in biometric policy setting. Moreover it is a precious instrument to update scholars from different disciplines who are interested in biometrics and its wider social, ethical and political implications.

**Reconstructing Earth's Climate History** Kristen St. John, R. Mark Leckie, Kate Pound, Megan Jones, Lawrence Krissek, 2021-10-05 Reconstructing Earth's Climate History There has never been a more critical time for students to understand the record of Earth's climate history, as well as the relevance of that history to understanding Earth's present and likely future climate. There also has never been a more critical time for students, as well as the public-at-large, to understand how we know, as much as what we know, in science. This book addresses these needs by placing you, the student, at the center of learning. In this book, you will actively use inquiry-based explorations of authentic scientific data to develop skills that are essential in all disciplines: making observations, developing and testing hypotheses, reaching conclusions based on the available data, recognizing and acknowledging uncertainty in scientific data and scientific conclusions, and communicating your results to others. The context for understanding global climate change today lies in the records of Earth's past, as preserved in archives such as sediments and sedimentary rocks on land and on the seafloor, as well as glacial ice, corals, speleothems, and tree rings. These archives have been studied for decades by geoscientists and paleoclimatologists. Much like detectives, these researchers work to reconstruct what happened in the past, as well as when and how it happened, based on the often-incomplete and indirect records of those events preserved in these archives. This book

uses guided-inquiry to build your knowledge of foundational concepts needed to interpret such archives. Foundational concepts include: interpreting the environmental meaning of sediment composition, determining ages of geologic materials and events (supported by a new section on radiometric dating), and understanding the role of CO<sub>2</sub> in Earth's climate system, among others. Next, this book provides the opportunity for you to apply your foundational knowledge to a collection of paleoclimate case studies. The case studies consider: long-term climate trends, climate cycles, major and/or abrupt episodes of global climate change, and polar paleoclimates. New sections on sea level change in the past and future, climate change and life, and climate change and civilization expand the book's examination of the causes and effects of Earth's climate history. In using this book, we hope you gain new knowledge, new skills, and greater confidence in making sense of the causes and consequences of climate change. Our goal is that science becomes more accessible to you. Enjoy the challenge and the reward of working with scientific data and results! *Reconstructing Earth's Climate History, Second Edition*, is an essential purchase for geoscience students at a variety of levels studying paleoclimatology, paleoceanography, oceanography, historical geology, global change, Quaternary science and Earth-system science.

Medieval Art and the Look of Silent Film Lora Ann

Sigler, 2019-06-27 The heyday of silent film soon became quaint with the arrival of talkies. As early as 1929, critics and historians were writing of the period as though it were the distant past. Much of the literature on the silent era focuses on its filmic art--ambiance and psychological depth, the splendor of the sets and costumes--yet overlooks the inspiration behind these. This book explores the Middle Ages as the prevailing influence on costume and set design in silent film and a force in fashion and architecture of the era. In the wake of World War I, designers overthrew the artifice of prewar style and manners and drew

upon what seemed a nobler, purer age to create an ambiance that reflected higher ideals.
