*Child Rights in India* Asha Bajpai, 2018-02-15 Legislation is one of the most important tools for empowering children. It reflects the commitment of the state to promote an ideal and progressive value system. Recent years have seen several key developments in the law, policy, and practice related to child rights. Significantly, with the adoption of the United Nations Convention on the Rights of the Child in 1989, a rights-based approach has acquired prominence in the child rights discourse across the world. The book analyses the laws in the light of court judgments and policy initiatives taken in India. It also examines the interventions and strategies employed by non-governmental organizations in recommending legislative reforms in support of children. This fully revised third edition focuses on the new legal developments in India—such as the Juvenile Justice (Care and Protection of Children) Act, 2015; the new Central Adoption Resource Agency guidelines; the Right of Children to Free and Compulsory Education Act, 2009; and the National Food Security Act, 2013—thus attempting to integrate the law in theory and field practice.

**Challenges in Clinical Practice** Veronica Bishop, Irene Scott, 2017-03-14 Challenges in Clinical Practice aims to support nurses and other health care workers in taking the health care agenda forward. With the constant bombardment of changes in policy initiatives, and the accompanying challenges which face nurses and other health care professionals this book will be a welcome asset to a strained labour market. It addresses the key issues and critical challenges facing the health care services today such as clinical governance, managing change, supervision in practice and research based practice. Nurses represent the fastest growing users of IT and as such the importance and simplicity of IT in supporting current challenges is also explored. The demystification of IT is brilliantly executed here and useful samplers are provided. Central to all changes are the needs of clients and patients, and partnerships in care - the power bases of service provision. The complex realities of this are probed, sometimes disconcertingly, within this important text. Written and edited by key professionals in the field, this text is an invaluable resource for pre- and post-registration students, those in middle and senior management positions and all teaching staff within the health sector. It is essential reading for anyone who wants to accept the challenge of providing the best in health care services.

*The Bank Recovery and Resolution Directive* Patrick S. Kenadjian, 2013-07-31 The volume is a collection of articles based on presentations given at a conference titled “The Crisis Management Directive – Europe’s Answer for Too Big to Fail?” hosted by the Institute for Law and Finance on May 3, 2012.

Research Handbook on Crisis Management in the Banking Sector Matthias Haentjens, Bob Wessels, 2015-10-30 In this timely Handbook, over 30 prominent academics, practitioners and regulators from across the globe provide in-depth insights into an area of law that the recent global financial crisis has placed in the spotlight: bank insolvency law. Research Handbook on Crisis Management in the Banking Sector discusses the rules that govern a bank insolvency from the perspectives of the various parties that are affected by these rules. Thus, whilst many bank insolvency rules have been enacted only recently and their application is still clouded by a host of uncertainties, this book takes the perspectives of the relevant authorities, of the bank and of the bank’s counterparties. Providing a comprehensive approach to crisis management in the banking sector, this Handbook will prove a valuable resource for academics, postgraduate students, practitioners and international policymakers.

**Denmark** International Monetary Fund. Monetary and Capital Markets Department, 2014-12-18 This paper discusses findings and recommendations made in the Financial Sector Assessment Program Update for Denmark in the areas of crisis management, bank resolution, and financial-sector safety nets. The Danish resolution scheme has allowed the authorities to deal with mounting distress while minimizing costs for taxpayers. The scheme has enabled the orderly winding-up of the affected banks by providing for a transfer of all assets, and part of the liabilities, to the Financial Stability Company or third-party acquirers. The authorities are encouraged to further strengthen the resolution framework in line with the Bank Recovery and Resolution Directive and emerging international good practices.

**Losing Ground** John R. Nolon, Daniel B. Rodriguez, 2007 This book calls attention to the emerging issues involved in building on the edge of environmentally vulnerable places, explores why we do this, and proposes ways to mitigate its impact. The challenge of public policy is to acknowledge-and challenge-the conflicts inherent in modern planning philosophy, in the service of sensible environmental regulation.

*Fish Canning Handbook* Les Bratt, 2010-09-29 Canning continues to be an extremely important form of food preservation commercially, and canned fish represents a source of relatively inexpensive, nutritious and healthy food which is stable at ambient temperatures, has long shelf life and in consequence is eminently suitable for worldwide distribution. It is vitally important that all canning operations are undertaken in keeping with the rigorous application of good manufacturing practices if the food is to be safe at the point of consumption. This demands that all personnel involved in the management and operation of cannery operations have a competent understanding of the technologies involved, including the basic requirements for container integrity and safe heat sterilisation. This book provides a source of up to date and detailed technical information for all those involved in the production of canned fish, from students thinking of entering the industry, to regulatory authorities with responsibility for official inspection, trading companies and retail organisations who purchase canned fish, as well as the manufacturers themselves. An exhaustive range of topics are covered in 15 chapters, including: the current global market; processing, packaging and storage operations; food safety and quality assurance; international legal requirements and laboratory analysis.

**Central Bank Regulation and the Financial Crisis** Miao Han,2015-10-20 The respective legal frameworks that control central banks are shaped by whether they are market oriented or government controlled. However such stark distinction between these two categories has been challenged in view of the varying styles of crisis management demonstrated by different central banks during the crisis. This book uses comparative analysis to investigate how the global financial crisis challenged the role played by central banks in maintaining financial stability. Focusing on four central banks including the US Federal Reserve System, the Bank of England, the Bank of Japan and the People's Bank of China, it illustrates the similarities between the banks prior to the crisis, and their similar policy responses in the wake of the crisis. It demonstrates how each operated with varying levels of independence while performing very differently and facing different tasks. The book identifies some central explanatory variables for this behavior, addressing the mismatch of similar risk management solutions and varying outcomes. Central Bank Regulation and The Financial Crisis: A Comparative Analysis explores the legal challenges within central bank regulation presented by the global financial crisis. It emphasizes the importance of, and the limitations involved in, legal order and argue that in spite of integration and globalization, significant differences exist in central banks' approaches to risk management and financial stability.

**Planning for Community-based Disaster Resilience Worldwide** Adenrele Awotona,2016-10-14 We are witnessing an ever-increasing level and intensity of disasters from Ecuador to Ethiopia and beyond, devastating millions of ordinary lives and causing long-term misery for vulnerable populations. Bringing together 26 case studies from six continents, this volume provides a unique resource that discusses, in considerable depth, the multifaceted matrix of natural and human-made disasters. It examines their bearing on the loss of human and productive capital; the conduct of national policies and the setting of national development priorities; and on the nature of international aid and bilateral assistance strategies and programs of donor countries. In order to ensure the efficacy and appropriateness of their support for disaster survivors, international agencies, humanitarian and disaster relief organizations, scholars, non-governmental organizations, and members of the global emergency management community need to have insight into best practices and lessons learned from various disasters across national and cultural boundaries. The evidence obtained from the numerous case studies in this volume serves to build a worldwide community that is better informed about the cultural and traditional contexts of such disasters and better enabled to prepare for, respond to, and finally rebuild sustainable communities after disasters in different environments. The main themes of the case studies include: • the need for community planning and emergency management to unite in order to achieve the mutual aim of creating a sustainable disaster-resilient community, coupled with the necessity to enact and implement appropriate laws, policies, and development regulations for disaster risk reduction; • the need to develop a clear set of urban planning and urban design principles for improving the built environment's capacities for disaster risk management through the integration of disaster risk reduction education into the curricula of colleges and universities; • the need to engage the whole community to build inclusive governance structures as prerequisites for addressing climate change vulnerability and fostering resilience and sustainability. Furthermore, the case studies explore the need to link the existence and value of scientific knowledge accumulated in various countries with decision-making in disaster risk management; and the relevance and transferability from one cultural context to another of the lessons learned in building institutional frameworks for whole community partnerships.

**Go Green at Home** Frank Y. Panol Ph. D.,2011-10 The central idea of this book is that saving energy and water saves the households money and simultaneously help reduce greenhouse gas emissions that cause global warming. It also aims to give readers better understanding of the green concept to enable informed participation in the current discourse pertaining to environment and climate change. The first chapter reviews environmental issues confronting the world in general and the U.S. in particular. Chapter 2 discusses federal energy efficiency programs that relate directly with energy saving and resource conservation efforts in households. Chapter 3 focuses on measures of saving energy at home including use of compact fluorescent lamps, taking advantage of residual heat in electric stoves, energy-efficient ways of using kitchen appliances, informed choice and use of home heating and cooling systems and others. Chapter 4 deals with conserving water inside and outside homes including use of high-efficiency toilets, low -low shower heads, etc. The economics of energy and water use efficiency, covered in Chapter 5, quantifies the savings derived from most of the measures discussed in Chapters 3 and 4. The goal is to show in dollar terms how much households could save by following green practices at home. The challenges of dealing with solid waste from households are examined in Chapter 6. Particular focus is given on Pay-As-You-Throw (PAYT) scheme in waste collection systems and fees as well as the three Rs in waste management - Reduce, Reuse and Recycle. Recognizing the impact of children on energy and water use at home, the author devotes Chapter 7 on educating and engaging children in green practices. Two framework proposals aimed at enhancing sustainability of green movement in the country are presented in Chapter 8 including establishment of green camps and providing tax incentives for going green at home. Proposal for establishing green camps is directed to private business sector or non-profit organizations and the government while the tax incentive proposal is directed solely to the government.
