Imperial Japan's Allied Prisoners of War in the South Pacific C. Kenneth Quinones, 2021-09-30 Three weeks after Imperial Japan's surrender, five men dressed in baggy khaki uniforms stared at the camera. They and two colleagues were the only survivors out of the 210 Allied airmen which Imperial Japan had imprisoned in "paradise." Joining them were 18 British soldiers, the only survivors of 600 of their countrymen similarly but separately imprisoned. Another 10,000 Allied soldiers and civilians were also imprisoned on the South Pacific island of New Britain. More than half died before liberation. What motivated such inhumane treatment? This book's quest for an answer traces the genesis of Bushido, Imperial Japan's martial code, and surveys the prisoners' recollections of their ordeal as the Battle for Rabaul raged around them from 1942 to March 1944.

Consequences of Contact Miki Makihara, Bambi B. Schieffelin, 2007-09-27 The Pacific is historically an area of enormous linguistic diversity, where talk figures as a central component of social life. Pacific communities also represent diverse contact zones, where between indigenous and introduced institutions and ideas; between local actors and outsiders; and involving different lingua franca, colonial, and local language varieties. Contact between colonial and post-colonial governments, religious institutions, and indigenous communities has spurred profound social change, irrevocably transforming linguistic ideologies and practices. Drawing on ethnographic and linguistic analyses, this edited volume examines situations of intertwined linguistic and cultural change unfolding in specific Pacific locations in the late twentieth and early twenty-first centuries. Its overarching concern is with the multiple ways that processes of historical change have shaped and been shaped by linguistic ideologies reflexive sensibilities about languages and language use held by Pacific peoples and other agents of change. The essays demonstrate that language and linguistic practices are linked to changing consciousness of self and community through notions of agency, morality, affect, authority, and authenticity. In times of cultural contact, communities often experience language change at an accelerated rate. This is particularly so in small-scale communities where innovations and continuity routinely depend on the imagination, creativity, and charisma of fewer individuals. The essays in this volume provide evidence of this potential and a record of their voices, as they document new types of local actors, e.g., pastors, Bible translators, teachers, political activists, spirit mediums, and tour guides, some of whom introduce, innovate, legitimate, or resist new ideas and ways to express them through language. Drawing on and transforming metalinguistic concepts, local actors (re)shape language, reproducing and changing the communicative economy. In the process, they cultivate new cultural conceptions of language, for example, as a medium for communicating religious knowledge and political authority, and for constructing social boundaries and transforming relationships of domination.

Natives and Exotics Judith A. Bennett, 2009-07-15 Ambitious in its scope and scale, this environmental history of World War II ranges over rear bases and operational fronts from Bora Bora to New Guinea, providing a lucid analysis of resource exploitation, entangled wartime politics, and human perceptions of the vast Oceanic environment. Although the war's physical impact proved significant and oftentimes enduring, this study shows that the tropical environment offered its own challenges: Unfamiliar tides left landing craft stranded; unseen microbes carrying endemic diseases disabled thousands of troops. Weather, terrain, plants, animals—all played an active role as enemy or ally. At the heart of Natives and Exotics is the author's analysis of the changing visions and perceptions of the environment, not only among the millions of combatants, but also among the Islands' peoples and their colonial administrations in wartime and beyond. Judith Bennett reveals how prewar notions of a paradisiacal Pacific set up millions of Americans, Australians, New Zealanders, and Japanese for grave disappointment when they encountered the reality. She shows that objects usually considered distinct from environmental concerns (souvenirs, cemeteries, war memorials) warrant further examination as the emotional quintessence of events in a particular place. Among native people, wartime experiences and resource utilization induced a shift in environmental perceptions just as the postwar colonial agenda demanded increased diversification of the resource base. Bennett's ability to reappraise such human perceptions and productions with an environmental lens is one of the unique qualities of this study. Impeccably researched, Natives and Exotics is essential reading for those interested in environmental history, Pacific studies, and a different kind of war story that has surprising relevance for today's concerns with global warming.

Java Network Programming Elliotte Rusty Harold, 2004-10-26 Java Network Programming, Third Edition, brings you up-to-date with the latest features of Java's network APIS. This book discusses all the changes and additions to networking in JDK 1.4 and 1.5 (now christened J2SE 5). It covers everything from networking fundamentals to remote method invocation (RMI), including chapters on TCP and UDP sockets, server sockets, URLs and URIs, multicasting, and special-purpose APIS such as JavaMail. This book shows you how to use JSSE to write secure networking applications and explains how to use the NIO APIs to write ultra high-performance servers. And it covers Java's support for network proxies, web cookies, and URL caching. Java Network Programming doesn't just explain the APIS: it shows you how to put them to work. This book is full of examples; it contains thousands of lines of working code (all of which are available online), implementing fully functional network clients and servers. Whether you want to write a special-purpose web server, a secure online order taker, a simple multicast agent, or even an email client, you'll find code that you can learn from and borrow. Whether you're an experienced network developer, a new Java programmer, or someone who just wants to see what's possible, you'll find that Java Network Programming, Third Edition is an important part of your library. Once you've started using the Java Networking APIs, the possibilities are only limited by your imagination.

Fireworks MX Zero to Hero Charles Brown, Joyce J. Evans, 2013-11-11 Fireworks MX Zero To Hero is intended for the majority of readers who don't need to be told when to jump, or ask how high. If you're new to Fireworks MX, this book will provide you with a fast learning curve to get you swiftly up to speed, and progressing towards the creativity you want to achieve; and if you already have some familiarity with any version of Fireworks, it'll provide many, many exercises and case studies that will extend your knowledge of techniques, tips, and tricks. In addition, the book serves as a handy reference to a reader of any level. Structured into three distinctive sections, the aim of this book is to provide as much knowledge and as many skills and techniques as can fit into 450 pages. Section One: Fireworks MX Primer. This section will get you familiar with the major tools and functionality of Fireworks MX, by example, and simple-to-understand explanation, and in fewer than 200 pages. Section Two: Projects. Here you're introduced to case studies and examples that will give you practical, hands-on experience and provide exposure to the more complex tools in Fireworks MX—learning by experience. As well as practicing your new found skills, this is also the place where you'll learn many tips and tricks of the trade. You can view an exercise from this section here. Section Three: Real-World. In this section we look at Fireworks MX as it's used in the real world of professional design not just as a standalone application, but as part of the formation of the designers creative toolbox.

Digital Images for the Information Professional Melissa Terras,2016-12-05 In the past decade, the way image based media is created, disseminated, and shared has changed exponentially, as digital imaging technology has replaced traditional film based media. Digital images have become the pervasive photographic medium of choice for the general public. Most libraries, archives, museums, and galleries have undertaken some type of digitisation program: converting their holdings into two dimensional digital images which are available for the general user via the Internet. This raises issues for those aiming to facilitate the creation and preservation of digital images whilst supplying and improving user access to image based material. Digital Images for the Information Professional provides an overview of the place of images in the changing information environment, and the use, function, and appropriation of digital images in both institutional and personal settings. Covering the history, technical underpinnings, sustainability, application, and management of digital images, the text is an accessible guide to both established and developing imaging technologies, providing those within the information sector with essential background knowledge of this increasingly ubiquitous medium.

Offshore Madeline Gleeson,2016-05-01 What has happened on Nauru and Manus since Australia began its most recent offshore processing regime in 2012? This essential book provides a comprehensive and uncompromising overview of the first three years of offshore processing since it recommenced in 2012. It explains why offshore processing was re-established, what life is like for asylum seekers and refugees on Nauru and Manus, what asylum seekers, refugees and staff in the offshore detention centres have to say about what goes on there, and why the truth has been so hard to find. In doing so, it goes behind the rumours and allegations to reveal what is known – and what still is not known – about Australia’s offshore detention centres.

Cityscapes and Perceptual Dialectology Jennifer Cramer,Chris Montgomery,2016-02-22 This edited collection presents papers relating to the state of the art in Perceptual Dialectology research. The authors take an international view of the field of Perceptual Dialectology, broadly defined, to assess the similarities and contrasts in non-linguists’ perceptions of the dialect landscape. The volume is global in focus, and chapters discuss data gathered in the United States, the United Kingdom, the Republic of Ireland, France, Germany, Austria, and South Korea. The common methods used by many of the contributors means that readers will be able to draw comparisons from the breadth of the volume. The primary focus of this volume is geared toward an examination of dialect perceptions in and of cities, with an additional goal of presenting empirical, theoretical, and methodological advancements in Perceptual Dialectology. Authors’ contributions to the collection examine how the urban setting influences perceptions of linguistic variation and, in the course of examining the connections between place and perceptions, explore several interrelated themes of linguistic variation, including the differences in the perception of rural and urban areas, processes of perception and language change, and the relationship between perception and ‘reality’.

Web Cartography Jan-Menno Kraak,Allan Brown,2003-09-02 Maps and atlases are created as soon as information on our geography has been clarified. They are used to find directions or to get insight into spatial relations. They are produced and used both on paper as well as on-screen. The Web is the new medium for spreading and using maps. This book explains the benefits of this medium from the perspective of the user, and the map provider. Opportunities and pitfalls are illustrated by a set of case-studies. A website accompanies the book and provides a dynamic environment for demonstrating many of the principles set out in the text, including access to a basic course in Internet cartography as well as links to other interesting places on the Web. Professor Kraak looks at basic questions such as I have this data what can I do with it? and discusses the various functions of maps on the web. Web Cartography also looks at the particularities of multidimensional web maps and addresses topics such as map contents (colour, text and symbols), map physics (size and resolution), and the map environment (interface design/site contents).
