**Video Database Systems** Ahmed K. Elmagarmid, Haitao Jiang, Abdelsalam A. Helal, Anupam

Joshi, Magdy Ahmed, 2007-08-23 Great advances have been made in the database field. Relational and object- oriented databases, distributed and client/server databases, and large-scale data warehousing are among the more notable. However, none of these advances promises to have as great and direct an effect on the daily lives of ordinary citizens as video databases. Video databases will provide a quantum jump in our ability to deal with visual data, and in allowing people to access and manipulate visual information in ways hitherto thought impossible. **Video Database Systems: Issues, Products and Applications** gives practical information on academic research issues, commercial products that have already been developed, and the applications of the future driving this research and development. This book can also be considered a reference text for those entering the field of video or multimedia databases, as well as a reference for practitioners who want to identify the kinds of products needed in order to utilize video databases. **Video Database Systems: Issues, Products and**

Applications covers concepts, products and applications. It is written at a level which is less detailed than that normally found in textbooks but more in-depth than that normally written in trade press or professional reference books. Thus, it seeks to serve both an academic and industrial audience by providing a single source of information about the research issues in the field, and the state-of-the-art of practice.

**Network World** ,2000-03-13 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

**Poverty and Quality of Life in the Digital Era** Nikolaos E. Myridis,2022-08-23 This book proposes new solutions to the problem of poverty, and begins with providing analyses. It bases most of the analyses and solutions in the context of the digital era. The book also follows, in addition to a scientific

distribution, a spatial-geographical one: analyses of countries of the European Union as well as South Africa, while it referring to two main variables, television and art, as agents of poverty alleviation. The book places particular focus on how poverty is understood in the framework of Industry 4.0. It introduces a new expanded Multidimensional Poverty Index with more than 20 dimensions; moreover, it provides a mathematically based solution for the disposal of perishable food. Finally, it does not disregard the crucial aspect of the issue of poverty: that of education planning. This book is of interest to specialists in poverty research, from students to professionals and from professors to activists, without excluding engineers.

**Interactions in Online Education** Charles Juwah,2006-09-27 This is a collection of research and innovative case material drawn from leading practitioners and academics from around the world which scrutinises the role and effectiveness of interactivity and teases out the practical implications for both.

New Directions in Mobile Media and Performance Camille C. Baker,2018-09-03 New Directions in Mobile Media and Performance explores various performative projects and forms of expression that

have emerged since the onset of the smartphone. It focuses mainly on new concepts and developments that have emerged in mobile media performance. It showcases the intimate and phenomenological mobile aesthetic that has been unfolding within networked performance and media art projects for over a decade and a half. This aesthetic utilises the potential and affordances with each iteration and update of modern smartphones. Themes of embodiment, presence, liveness and connection through mobile, networked, and remote technology are revisited in the context of HD mobile cameras, selfies and live video streaming from the phone, as well as the impact of peer production, opensource and Maker culture on mobile media performance practices. It explores the surge in development of wearable devices in performance, as well as how the ‘quantified-self movement’ has affected performance works. It deals with concepts and developments in intermedial performance that incorporate mobile and wearable devices, especially from the artist’s, designer’s or dramaturge’s perspective as the creator and their creative process, working with technology as a collaborator, not just a tool or guide. The book demonstrates how artists have repurposed the device –

transforming it from merely a communication device, using voice and text only – to become a new collaborative medium, a full visual, synaesthetic, interactive and performative tool of deeper expression and social change. It discusses seminal works and the evolution of the medium, within intermedial digital art and performance practices as medium for artistic expression, creative process and staged performances. It focuses on projects and artists who have pushed mobile media performance beyond the conventional blackbox. Emerging visual, digital, interactive, tactile, gestural and theatrical or performance projects that incorporate mobile or wearable devices, used as vehicles for more challenging, experimental, experiential and immersive performative artworks are highlighted. The book also contextualises Baker's own media research and performance practice within the larger landscape with the field. It is bookended with interviews with the artists themselves on their creative process and intentions. It is the outcome of three years of research of artistic works around the world, interviews, in-person viewings of performances, as well as incorporating and reflecting on her own ongoing practice and projects in context.

**The Wild West of Film** Otessa Marie Ghadar, 2013-10-24 Award winning filmmaker and web series creator Otessa Marie Ghadar has been breaking ground in new media since 2007 and is widely praised for her pioneer work in the web series format. Her book, *The Wild West of Film*, takes readers step by step through the script-to-screen process. It focuses on specifics of the “small screen,” including short form script-writing and story structure, budgeting and breakdowns, post-production for online viewing, self-distribution, best practices for social media, film festival lists & strategies, and more. Whether film and web rookies or seasoned veterans, *The Wild West of Film* provides practical insight and technical knowledge useful for successfully navigating the post-Internet world.

Encyclopedia of New Media Steve Jones, 2002-12-10 Edited by Steve Jones, one of the leading scholars and founders of this emerging field, and with contributions from an international group of scholars as well as science and technology writers and editors, the *Encyclopedia of New Media* widens the boundaries of today's information society through interdisciplinary, historical, and international coverage. With such topics as broadband, content filtering, cyberculture, cyberethics,

digital divide, freenet, MP3, privacy, telemedicine, viruses, and wireless networks, the Encyclopedia will be an indispensable resource for anyone interested or working in this field. Unlike many encyclopedias that provide short, fragmented entries, the Encyclopedia of New Media examines each subject in depth in a single, coherent article. Many articles span several pages and are presented in a large, double-column format for easy reading. Each article also includes the following: A bibliography Suggestions for further reading Links to related topics in the Encyclopedia Selected works, where applicable Entries include: Pioneers, such as Marc Andreessen, Marshall McLuhan, and Steve Jobs Terms, from Access to Netiquette to Web-cam Technologies, including Bluetooth, MP3, and Linux Businesses, such as Amazon.com Key labs, research centers, and foundations Associations Laws, and much more The Encyclopedia of New Media includes a comprehensive index as well as a reader's guide that facilitates browsing and easy access to information. It runs through the process step by step, and outlines the techniques available to deal with a range of resources.

Turning Silicon into Gold Griffin Kao, Jessica Hong, Michael Perusse, Weizhen Sheng, 2020-02-27 A few square miles of Northern California contain some of the world's largest companies whose products affect billions of people every single day. What made these giants of Silicon Valley as impactful as they are? What do their paths to success have in common? *Turning Silicon into Gold* is a sharp analysis of 25 case studies examining just that. Authors Griffin Kao, Jessica Hong, Michael Perusse, and Weizhen Sheng provide relevant commentary as they explore the stories behind companies such as Apple, Amazon, OpenTable, and many more. These organizations used unique problem-solving strategies to forever change the face of tech—whether it was Facebook's second mover advantage over MySpace or Nintendo's leap of faith in the 1980s to revitalize the video game industry. Learn by

example as *Turning Silicon into Gold* divulges the inner workings behind some of the most significant business decisions in tech history. The nuanced ways these companies tackled emerging markets and generated growth in uncertain times is essential knowledge for modern business leaders, innovators, and aspiring founders. Whether you are simply curious about the origins of the world's tech giants or you are an entrepreneur looking for inspiration, the thoughtful, comprehensive case study collection that is *Turning Silicon into Gold* belongs on your bookshelf.

**What You Will Learn**

- Understand why companies like Amazon, Facebook, OpenTable and more have made some controversial and strategic decisions
- Realize how Big Data is driving the success of many new and mature ventures
- See how tech companies are tackling emerging markets and generating growth
- Examine how capital flows through the tech industry

**Who This Book is For**

The book is for people currently in or interested in exploring a career in the intersection of technology and business, such as product management, entrepreneurship, or non-coding positions at a tech company—it's also great for people generally curious about how the tech industry operates. The book offers case studies in an engaging and approachable way, while still

providing important takeaways and probing questions—perfect for the casual reader or even someone trying to prepare for interviews.

**Complete Poodle Clipping and Grooming Book** Shirlee Kalstone,1981-10-12 Now better than ever, this award-winning classic covers dogs in all stages of condition, basic grooming requirements, and special grooming problems, and features new products, equipment, and techniques.

**Television Goes Digital** Darcy Gerbarg,2008-12-10 Television has become a ubiquitous part of our lives, and yet its impact continues to evolve at an extraordinary pace. The evolution of television from analog to digital technology has been underway for more than half a century. Today's digital technology is enabling a myriad of new entertainment possibilities. From jumbotrons in cyberspace to multi-dimensional viewing experiences, digital technology is changing television. Consequently, new advertising metrics that reflect the new viewer habits are emerging. The ability to capture a viewer's interactions changes the advertising proposition. Telephone and wireless companies are challenging

the traditional mass media providers - broadcasters, cable and satellite companies - and they're all finding ways to deliver TV programming, video content and Internet offerings to large and small screens in the home and on the go. This volume showcases insights from industry insiders and researchers from a variety of disciplines. It explores the economic, cultural, technical, and policy implications of digital television, addressing such questions as: How will content be monetized in the future? What programming opportunities become possible with the advent of going digital? Will content still be king or will the conduits gain the upper hand? This book analyzes the digital television evolution: its impacts on the economics of the TV industry, its significance for content creation from Hollywood blockbusters to You Tube, the changing role of the consumer, and what's coming next to a theatre near you.

Operations Management Joel D. Wisner, 2016-06-20 Finally, an operations management book to get excited about. Operations Management: A Supply Chain Process Approach exposes students to the exciting and ever-changing world of operations management through dynamic writing, application,

and cutting-edge examples that will keep students interested and instructors inspired! Author Dr. Joel Wisner understands that today's students will be entering a highly competitive global marketplace where two things are crucial: a solid knowledge of operations management and an understanding of the importance for organizations to integrate their operations and supply chain processes. With this in mind, Wisner not only provides a clear and comprehensive introduction to operations management, but also gives attention to the important processes involved in linking firms' operations in a supply chain environment.

Investigating and Preventing Crime in the Digital Era Lorena Bachmaier Winter,Stefano

Ruggeri,2022-10-07 The aim of this book is to delve into the impact of the Information and Communications Technologies in the criminal prevention and investigation, by addressing the state of the art of different measures and its implementation in different legal systems vis à vis the protection of human rights. Yet this research not only pursues a diagnostic goal but furthermore aims at providing a reconstruction of this problematic area in light of modern, human rights-oriented notion of criminal justice. This broadens the scope of this investigation, which encompasses both unprecedented safeguards to traditional, or anyway widely recognized individual rights and the emergence of new rights, such as the right to informational self-determination, and the right to information technology privacy. The book addresses the problems and potentials in the areas of criminal prevention and criminal investigation, taking into account that due to electronic surveillance and the progress in the use of big data for identifying risks, the borders between preventive and investigative e-measures is not clear-cut.

*World Language Teacher Education* Jacqueline F. Davis, 2010-07-01 The significant change in public schools over the last two decades warrants a response in how we prepare teachers. This volume is an effort to share the contributors' knowledge, experience and ideas with colleagues, particularly with novice language teacher educators. The suggestions in the chapters are primarily provided for the teaching methods course, but many can be adapted to other education courses or for professional development programs. The first section of the introduction provides a review of issues identified in teacher education including debates, accountability, and government influence over education. The second section explores teacher educators in the literature such as issues in their practice, and a focus on foreign language teacher educator practice. The third section provides a brief overview of the chapters in the book.

*Advanced Concepts for Intelligent Vision Systems* Jacques Blanc-Talon, Don Bone, Wilfried Philips, Dan Popescu, Paul Scheunders, 2010-12-06 This volume collects the papers accepted for presentation at the 12th International Conference on "Advanced Concepts for Intelligent Vision

Systems” (ACIVS 2010). Following the first meeting in Baden-Baden (Germany) in 1999, which was part of a large multi-conference, the ACIVS conference then developed into an independent scientific event and has ever since maintained the tradition of being a single track conference. ACIVS 2010 attracted computer scientists from 29 different countries, mostly from Europe, Australia, and the USA, but also from Asia. Although ACIVS is a conference on all areas of image and video processing, submissions tend to gather within certain major fields of interest. This year 3D and depth processing and computer vision and surveillance were popular topics. Noteworthy are the growing number of papers related to theoretical developments. We would like to thank the invited speakers Mubarak Shah (University of Central Florida), Richard Kleihorst (VITO, Belgium), Richard Hartley (Australian National University), and David Suter (Adelaide University) for their valuable contributions.
