Port Security Management Kenneth Christopher, 2009-03-24 The term homeland security hardly existed before September 11, 2001, yet today it dominates public policy and the economic agendas of world governments. The transportation industries have been subjected to unprecedented scrutiny and regulatory mandates in recent years, and the port and maritime sector are no exception. Port Security Management refl

China and Africa Chris Alden, Abiodun Alao, Zhang Chun, Laura Barber, 2017-08-24 This book investigates the expanding involvement of China in security cooperation in Africa. Drawing on leading and emerging scholars in the field, the volume uses a combination of analytical insights and case studies to unpack the complexity of security challenges confronting China and the continent. It interrogates how security considerations impact upon the growing economic and social links China has developed with African states.

India and Iran Relations in Twenty First Century Dr. Mukhtar Ahmad Bhat, 2018-12-01 The two countries India and Iran are among the oldest civilisations of the world and their relations are not new. The relations between the two are of centuries old and it is also said that the two nations belong to a same family that lived for many centuries in the pasture land of Central Asia (Oxus Valley). The centuries old mutual interaction enriched each other customs, tradition, art, and architecture. During medieval period their interaction increased to such a level that it left a permanent stamp on each other's culture, tradition, art and architecture. During the period, India became the second home of Iranian culture, art, architecture, festivals and art of gardening. Even Persian language was made a tool of communication not only in the official matters but also as a means for interchange of thoughts, culture and literature between the two countries. There is a long list of important books related to different aspects of life like astronomy, art, health and hygiene, history, mathematics, unani-medicine, music, and religion which were translated. However with the emergence of British rule over India, both the countries lost their linkages and contacts between them. No doubt after the end of British rule in India both the countries tried to develop their relations but the incidents like creation of Pakistan, emergence of cold war, and Iran's recognition as well as support to Pakistan during India-Pakistan as well as emergence of Iranian revolution, and Iran-Iraq war restricted their mutual cooperation. With the turn of twenty first century, both the countries experienced stability in their both domestic and global affairs which led them to economic development. In contemporary times India and Iran occupies great strategic significance in their respective regional power structure. India is not only one the fastest growing economy of the world and of the south Asian region but also provides a big market. While Iran on the other hand, occupies great strategic importance not only because of its geographic location but also due to its energy resources. The present study is a modest attempt to analyse Indo-Iran relations. Keeping in view the past, present and future prospects of the relations between the two countries, a thorough study has been carried out in terms of understanding the nature of India and Iran relations. The study aims to understand the different dimensions of India and Iran relations of recent times. It not only deeply analyses the areas that strengthen their bilateral cooperation, and the influence of external powers particularly of US and Israel. But it goes further deep by discussing in detail the areas that would led to inter- regional integration by interconnecting South Asia, Central Asia, West Asia and Europe. And ultimately would take the regional economic development and peace to new heights. The study highlights the strategic importance of Iran for India not only with respect to the availability of energy resources and market for Indian goods and services but also Iran is would play a very significant role in transforming India into a new emerging power at both global and regional level. Keeping all these things in mind the book has been based on six chapters which deals with different aspects. The chapter first presents the historical overview, chapter second present comparative study of principles of foreign policies of both the countries. Chapter third, deals with the areas of

cooperation and conflict between India and Iran. Fourth chapter discusses the influence of external powers on India and Iran relations. Chapter fifth studies the India and Iran relations in changing regional scenario. Despite non-availability of primary sources, efforts have been made to collect important and relevant data and special attention and care has been taken for the reliability of the sources of data which has been put to analytical study to arrive at certain conclusions.

Dear Mom, Dad & Ethel Mark Stuart Ellison,Eli Ellison,2004 I enjoyed Dear Mom, Dad & Ethel so much I could hardly put it down. It ought to be widely read as an excellent way of recalling World War II. -Hans L. Trefousse Distinguished Professor Emeritus of History Brooklyn College and Graduate Center of the City University of New York Dear Mom, Dad & Ethel paints an absorbing picture of the daily life of America's greatest generation. Vets will find themselves reliving their own experiences-the boredom, the loneliness, the fear, and the role of fate in life and death. For the rest of us, Dear Mom, Dad & Ethel is social history at its best. -Dr. Stanley J. Michalak Senior Associate, Foreign Policy Research Institute, Philadelphia Professor Emeritus of Government, Franklin and Marshall College A vivid story brought to realistic life. -Midwest Book Review Dear Mom, Dad & Ethel delicately mixes fiction and history to tell the story of an American air corpsman during World War II. His precious letters enhance a grand book deserving warm appreciation. People from my hometown will be as moved and fascinated as many Americans who will, no doubt, eagerly read it. - Jacques Wynants, Belgian Historian Author of Verviers 1940 and Verviers Libéré PLOT SUMMARY On October 7, 1942, Don Quix enlists in the Air Corps. He's slated to be an aerial gunner, but his flying dreams are shattered when he's caught AWOL with buddy Ken Jackson. Don manages to become a radio truck supervisor in a fighter control squadron while Ken goes to a demolition unit. As an army engineer, Ken barely survives D-Day on Normandy's Bloody Omaha. During a baseball game in a French forest, Don moves his head slightly, saving himself from a sniper's bullet. Arriving in Verviers, Belgium in September 1944, Don and his fellow radio men endure frequent buzz bomb attacks. Due to a miscalculation in army strategy, they find themselves on the front lines during the Battle of the Bulge. Don's reunion with Ken, now a tech sergeant with a bomb disposal outfit, is marred by tragedy, dampening Don's torrid love affair with beautiful seamstress Denise Vervier. Denise's husband, sent to a forced labor camp in 1940, is presumed dead. When he unexpectedly returns, Don and Denise face a heartbreaking choice.

Intellectual Property and International Trade: The TRIPS Agreement Carlos M. Correa, Abdulqawi A. Yusuf, 2016-06-27 The Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) is the most far-reaching and comprehensive legal regime ever concluded at the multilateral level in the area of intellectual property rights (IPR). Compared to prior IPR conventions, TRIPS constitutes a major qualitative leap which radically modifies not only the context in which IPR are considered internationally, but also their substantive content and the methods for their enforcement and dispute settlement. This much-welcomed treatise, now in its third edition, thoroughly updates its comprehensive analysis of the substantive provisions of the Agreement and their actual interpretation and application in different jurisdictions, with new material on the burgeoning case law and on major changes in plant variety protection. As in previous editions, the book may be relied upon for in-depth clarification of such matters as the following: • standards established under the agreement; • enforcement measures; • social and legal issues; • legal and policy possibilities offered; • legislative latitude allowed to WTO Member States; • incorporation of TRIPS into domestic law; • protection of integrated circuit design; • protection of innovation and R&D for diseases that disproportionately affect developing countries; • challenges raised by ongoing technological changes; • access to medicines; • protection of confidential (undisclosed) information; and • interface between competition law and intellectual property protection. With fifteen chapters contributed by a distinguished panel of experts representing diverse parties — international organisations, legal practice, government policy, and academia — the third edition offers an incomparable framework for understanding the background, principles, and complex provisions of the TRIPS Agreement. Thoroughly revised and updated, the third edition will be of great value to all professionals and business people concerned with international trade. It stimulates further discussion and analysis in this area of growing importance to international law and international economic relations, particularly regarding the possibilities offered by the Agreement and the loose ends that may need consideration in the future at the national or international level.

Financial Market Integration and Growth Paul J.J. Welfens, Cillian Ryan, 2011-02-14 Financial capital, whether mediated through the financial market or Foreign Direct Investment has been a key factor in European economic growth. This book examines the interaction between European and global financial integration and analyses the dynamics of the monetary sector and the real economy in Europe. The key analytical focus is on the theoretical and empirical dynamics of financial markets in Europe, however, it also provides regional case studies of key institutional developments and lessons from foreign direct investment. There is a broad range of findings for Central, Eastern and Western Europe as well as EU Partner Countries. Crucially the analysis includes new approaches and options for solving the transatlantic banking crisis and suggests policy innovations for a world with unstable financial markets.

Sources of Power [2 volumes] Manfred Weissenbacher, 2009-09-30 A landmark book rolls out a bold, new, energy-based theory of human history based on a simple, yet powerful law: whoever controls the world's effective energy supplies during a given energy age will inevitably dominate the economic, political, and cultural history of that age. The innovative theory articulated in Sources of Power: How Energy Forges Human History parses history into four ages: the foraging, agriculture, coal, and oil ages, each defined by the dominant source of power. Manfred Weissenbacher tests this sweeping theory against the panorama of world history, combining formidable powers of synthesis with a specialist's deep understanding of energy systems and technologies. After proving the

operation of his law through history and into the present, Weissenbacher applies it to global geopolitical trends. He assesses the prospects of the various candidate technologies to succeed oil and charts future scenarios based on the distribution of energy reserves. Finally, he forecasts the fates of the American and Chinese empires in the twilight of the oil age: the United States as a mature superpower forced to deploy military might to occupy oilfields in the Middle East; China as an emerging superpower forced to deploy economic might to muscle in on the development of Third World oilfields.

Integrating Freight Facilities and Operations with Community Goals Anne Strauss-Wieder, National Cooperative Highway Research Program, 2003 TRB's National Cooperative Highway Research Program (NCHRP) Synthesis Report 320: Integrating Freight Facilities and Operations with Community Goals identifies practices that have been or are being used by private-sector freight companies and public transportation agencies in citing their facilities, modifying their operations, and managing their community relations. Good neighbor initiatives and balancing practices employed by metropolitan planning and economic development organizations, local governments, and others are also recognized. The report covers water, truck, rail, and air freight facilities and operations. Although the report does not include pipelines, several of the issues and practices discussed are relevant to pipeline facilities and operations.

Global Responses to Maritime Violence Paul Shemella, 2016-04-13 Global Responses to Maritime Violence is a full discussion of maritime security short of war that goes beyond the current literature in both scope and perspective. The chapters in this volume examine terrorism, piracy, armed robbery at sea, illegal maritime trafficking, illegal fishing, and other maritime crimes. Contributors uncover both threats and responses as a complex ecosystem that challenges even the strongest national and regional institutions. Managing this system is a wicked problem that has no ultimate solution. But the book offers strategic precepts to guide the efforts of any government that seeks to improve its responses to maritime violence. The bottom line is that maritime violence can be managed effectively enough to protect citizens and national economies that depend on the sea. Comprehensive in scope, the volume coheres around the premise that good governance in the maritime domain, though difficult, is worth the considerable resources required.

Waging War to Make Peace Susan Yoshihara, 2010-04-09 A revealing examination looks at the decision-making in four NATO capitals about waging war in Kosovo and Iraq. Written by a combat veteran who also served on the faculty of the Naval War College, *Waging War to Make Peace: U.S. Intervention in Global Conflicts* is a thought-provoking analysis of the decision to make war in the modern world. The subject is examined through the lens of the decision-making of four NATO nations—Britain, France, Germany, and the United States—in the 1999 Kosovo campaign compared to their decisions in 2003 regarding the Iraq war. What emerges is a picture of how the bitter dispute over Iraq was the result of disagreements about who has the authority to wage war, when it is justified, and whether nations have an obligation to intervene in the case of human rights and humanitarian emergencies. The book shows how those who enthusiastically hailed a new era of warfare based upon human rights and humanitarian values misjudged the significance of the Kosovo decision, and it underscores issues with which leaders must come to grips if NATO allies are to avoid

broader disputes in the years ahead.
