The author offers serious and humorous anecdotes to help readers avoid the pitfalls and capitalize on opportunities that will help them become a successful online student. Current and prospective online learners will greatly benefit from this practical book filled with clear, detailed assistance for learning online.

Sounding the Virtual: Gilles Deleuze and the Theory and Philosophy of Music Nick Nesbitt,2016-04-01 It is the contention of the editors and contributors of this volume that the work carried out by Gilles Deleuze, where rigorously applied, has the potential to cut through much of the intellectual sedimentation that has settled in the fields of music studies. Deleuze is a vigorous critic of the Western intellectual tradition, calling for a 'philosophy of difference', and, despite its ambitions, he is convinced that Western philosophy fails to truly grasp (or think) difference as such. It is argued that longstanding methods of conceptualizing music are vulnerable to Deleuze's critique. But, as Deleuze himself stresses, more important than merely critiquing established paradigms is developing ways to overcome them, and by using Deleuze's own concepts this collection aims to explore that possibility.

The Message of the Sphinx Graham Hancock, Robert Bauval, 2009-06-10 NATIONAL BESTSELLER • Two Egypt experts posit a revolutionary theory: The Sphinx and other great Egyptian monuments are older than common history books tell us and are arranged in such a way as to send us a message from the silent past. Guardian of the ancient mysteries, the keeper of secrets . . . For thousands of years the Great Sphinx of Egypt has gazed toward the east, its eyes focused on eternity, reading a message in the stars that mankind has long forgotten. And today as our civilization stands poised at the end of a great cycle, it is a message that beckons insistently to be understood. All the clues are in place. Geology and archeo-astronomy have already indicated that the lion-bodied Sphinx may be vastly older than Egyptologists currently believe, dating not from 2500 B.C., but from 10,500 B.C.—the beginning of the astrological Age of Leo. And we now know that the three pyramids of Giza, standing on high ground half a mile to the west of the Sphinx, are in fact a precise map of the three stars of Orion's belt, formed in fifteen million tons of solid stone. Are these monuments trying to tell us something? And, if so, what? In *The Message of the Sphinx*, Robert Bauval and Graham Hancock present a tour de force of historical and scientific detective work that unravels the millennial code embodied in these structures. Using sophisticated computer simulations of ancient skies, they unravel the riddle of the Sphinx, and they present a startling new theory concerning the enigmatic Pyramid Texts and other archaic Egyptian scriptures. Their discoveries lead the authors to this question: Does mankind have a rendezvous with destiny—a rendezvous not in the future, but in the distant past, at a precise place and time? The secrets can be kept no longer. *The Message of the Sphinx* brings them to light.

Beginning ASP.NET 1.0 with Visual Basic.NET Chris Goode, John Kauffman, Christopher L. Miller, Neil Raybould, Rob Birdwell, S. Srinivasa Sivakumar, Dave Sussman, Ollie Cornes, Matt Butler, Gary Johnson, Ajoy Krishnamoorthy, Juan T. Llibre, Chris Ullman, 2002-06-04 What is this book about? ASP.NET 1.0 is the final release of Microsoft's Active Server Pages (ASP). It is a powerful server-based technology designed to create dynamic, interactive, HTML pages for web sites and corporate intranets. ASP.NET is a core element of Microsoft's exciting .NET vision, building on the strengths of the .NET Framework to provide many new features not seen in previous versions of ASP. This book, entirely revised and updated for the final release, will provide you with a step-by-step introduction to ASP.NET using VB.NET, with plenty of worked examples to help you to gain a deep understanding of what ASP.NET is all about, and how you can harness it to build powerful web applications. What does this book cover? In this book, you will learn how to Create basic ASP.NET pages with VB .NET Understand the concepts of Object Oriented Programming Work with data and XML Debug and handling errors in your code Use ASP.NET Server Controls Create user controls and components Explore the world of Web services Optimize performance Secure your application Who is this book for? This book is aimed at relatively inexperienced web builders who are looking to enrich their sites with dynamically-generated content, and want to learn how to start building web applications using ASP.NET. Developers who have a little experience with previous versions of ASP (and are looking to move over to ASP.NET), may also find this book helpful in getting a simple grasp on what ASP.NET is, what it does, and how it can be used. Experience of basic HTML is required, but previous experience of ASP or VBScript is not essential. We'll be teaching the basics of VB .NET in this book, so prior experience of the language is not required.

Using Netscape Communicator 4 Mark R. Brown, 1997 A thorough reference to Netscape and building home pages for use with Netscape browsers, this book includes comprehensive coverage of all aspects of the new version of Netscape Navigator including Netscape's new groupware alternatives, e-mail and discussion group enhancements, offline and mobile support, and enhanced HTML and layout features. The CD includes Netscape Navigator Gold.

Communicating Strategy Mr Phil Jones, 2012-09-28 'If you don't communicate your strategy in a way that your people understand and find compelling, how can you expect them to help you succeed with it? Research suggests only 5% of the people in an organization understand its strategy. If that is true for your organization, whose strategy are the other 95% implementing? Not yours, that is for sure.' Phil Jones' *Communicating Strategy* is designed to help you communicate your strategy in a compelling and effective way, and dramatically improve implementation and the resulting outcomes. It provides a clear framework for building a communication plan as well as practical information, techniques, tools, tips and exercises that can be applied to explain and deliver a complete and coherent message. There is guidance on how to identify likely obstacles to change and how the psychology behind your story - and the language you use - can help create change champions; as well as details of how to use metaphor, quotations and imagery to paint a vivid picture. The author also explores the reasons why your organization's structure, processes and culture may stifle your story and the steps you can take to align each of these to the strategy. This is an exceptional book that includes elements of organizational theory, human psychology and good, straightforward common sense. If you believe that people will do a better job if they understand what you are thinking and what you want, this book is for you.

The Military Decision Making Process And The Battle Of The Little Bighorn Major Jonathan T. Neumann U.S. Army, 2014-08-15 Based on his background, education, training, and the information available at the time of his attack, Lieutenant Colonel George Armstrong Custer made good decisions as he lead the 7th Cavalry in its defeat at the Little Bighorn. Custer received the standard pre-commissioning education that West Point used to mold all future Army leaders. That education served him well in the Civil War where he enjoyed tactical success and a meteoric rise to fame and high rank. Following that conventional conflict, Custer entered into world of irregular warfare and voluntary forces. His defeat at the Little Bighorn ended 10 years of development as an unconventional warrior. Despite the common perception that his decisions invited disaster, by using the current Military Decision Making Process, and the intelligence available to him professionals of today can recreate

the command decisions he made that day in June 1876 and possibly conclude that they were not to blame for the defeat. Custer's military decisions are very similar to those a current leader would make using current military decision making doctrine.
