Educational Media and Technology Yearbook Michael Orey,V. J. McClendon,Robert Maribe Branch,2009-05-28 The Educational Media and Technology Yearbook has become a standard reference in many libraries and professional collections. Examined in relation to its comp- ion volumes of the past, it provides a valuable historical record of current ideas and developments in the ?eld. Part I, "Trends and Issues," presents an array of chapters that develop some of the current themes listed above, in addition to others. Part II, "Library and Information Science," concentrates upon chapters of special relevance to K-12 education, library science education, school learning resources, and various types of library and media centers—school, public, and academic among others. In Part III, "Leadership Pro?les," authors provide biographical sketches of the careers of instructional technology leaders. Part IV, "Organizations and Associations in North America," and Part V, "Graduate Programs in North America," are, resp- tively, directories of instructional technology-related organizations and institutions of higher learning offering degrees in related ?elds. Finally, Part VI, the "Medi- raphy," presents an annotated listing of selected current publications related to the ?eld. For a number of years we have worked together as editors and the sixth with Dr. Michael Orey as the senior editor. Last year as the senior editor, Orey decided to try and come up with a list of the top programs rather than just the list of all the programs. This has proven to be problematic. First of all, bias exists when we are rating a ?eld in which our program is within those to be rated.

Directory of Research Grants 2008 Schoolhouse Partners Llc,2008-05 It was the 50s and life was simple, until September 25, 1954. That was the night that would be etched in the memory of the citizens of Stanfield, Massachusetts. The Chief of Police described the brutal savagery of the double

homicide as the most atrocious crime in the history of the city. A fourteen-year-old girl, and the four-year-old boy in her care were murdered at the hands of a deranged, depraved killer. A Thread of Evidence places the reader at the scene of the crime, an eye witness to the senseless stabbing of two innocent children. With a piece of crochet thread as their only clue, the entire police department, lead by detectives Steven Logan and Raymond Gage, scour the city in search of a maniacal savage. When all tips and leads have been exhausted, they review all evidence. They come back to the thread. The only real evidence. With tenacity and perseverance of Logan and Gage the killer is apprehended. The reader experiences the twists and turns of the investigation, and ultimately occupies a reserved seat in the Superior Court as the trial proceedings commence. A Thread of Evidence has been written as fiction, but inspired by an actual event. Fifty years later, it remains etched in the minds of all who had lived in the area. The author has researched court records, newspapers, interviewed neighbors, police and has drawn on personal recollections of the crime. The story has been recounted over and over and to this day, it continues to be discussed. A Thread of Evidence is a compelling account of superb detective work, and unprecedented dedication of an entire police department.

Toward a New Era of Higher Education Prof. Dr. Bambang Cipto, M.A., 2023-11-06 a book entitled Toward a New Era of Higher Education is the work of Prof. Dr. Bambang Cipto, M.A. This book introduces a higher education management model in an era of rapid change in the social, political, economic and technological fields. The changes that have taken place in the last ten years are expected to have a negative impact on both students and universities. The contents of this book are an attempt to review the vision of higher education and how to provide solutions to the problems that arise today. Universities in developing countries have not fully implemented internationalization programs. Transnational education has not yet become a necessity in the midst of increasingly fierce competition. Even now there is a demand for universities to respond to local, national and global environmental problems. Universities are also required to produce graduates who are ready to work.

The decline in female fertility rates in a number of developed countries has prompted universities to make changes in recruitment policies, teaching and learning processes, and the rationalization of higher education. Geopolitical and geoeconomics changes in Asia Pacific also require several countries to develop and strengthen science and technology study programs. Universities are also required to play an important role in issues of security, democracy, and sustainable development.

Profiles of Dual Language Education in the 21st Century M. Beatriz Arias, Molly Fee, 2018-09-14 In the last 20 years dual language education programs have increased in number and expanded in range. Whereas once they were predominantly focused at the elementary level, they now span from pre-K through to high school. This book examines the key attributes of successful dual language programs, as well as the challenges and opportunities involved in extending the dual language instructional model to pre-K and secondary settings. Chapter authors, who are themselves both researchers and practitioners, explore the latest research and policy implications for implementation of dual language in three different contexts; within a school, a dual language school and a dual language district. This book will be of interest to teachers, teacher educators, professional development specialists, policymakers, administrators, and researchers.
