Global Strategic Trade Management Rajiv Nayan,2019-02-26 This book examines whether India is successfully integrating and adapting to the global strategic management system. It offers essential insights into the evolution of export controls for goods, which may have implications for the development of Weapons of Mass Destruction – an aspect that is especially relevant given India’s robust biotechnological, chemical and nuclear industrial base. In security studies, the phrase “strategic trade management” is now slowly replacing the phrase “export control”. However, for the policymaking community, export control remains popular, at least for the sake of reference. The book also describes the mechanisms India is adopting in this regard. It demonstrates the shift in the Indian approach to strategic trade management, from an outspoken critic to a supporter. Politically, the country was initially skeptical of the idea of export controls because it was a target of such systems. The book also explains the tools, forces and incentives that moved India to adapt its policy on export controls or strategic trade management.

This book was previously published as a special issue of Israel Affairs.

Empire of the Fund William A. Birdthistle, 2016-06-01 Empire of the Fund is an exposé and examination of the way we save now. With the rise of the 401(k) and demise of the pension, the United States has embarked upon the richest and riskiest experiment in our financial history. Over the next twenty years, nearly eighty million baby boomers will retire at a pace of ten thousand per day. The hypothesis of our experiment is that millions of ordinary, untrained, busy citizens can successfully manage trillions of dollars in a financial system dominated by wealthy, skilled, and powerful financial institutions, many of which have a record of treating individual investors shabbily. The key tools in our 401(k) plans and individual retirement accounts are mutual funds, which have ballooned to hold more than \$16 trillion. But these funds pose dangers to our savings in three ways: through structural vulnerabilities that give money managers the incentive to focus on marketing over investing; through the very human challenges of managing our savings decades into the future; and through the peril of financial professionals behaving badly, to our economic harm. Though Americans often hear of the importance of low fees in fund investing, few are aware of the astonishing panoply of ways that some financial advisers have illegally diverted money out of mutual funds: from abetting hedge funds to trade after the legal deadline, to inflating the assets on which they are paid a percentage, to paying kickbacks for brokers to sell their funds. This book will forewarn and forearm Americans by illustrating the structural flaws, perverse incentives, and litany of scandals that have bedeviled mutual funds. And by setting forth a pair of policy solutions to improve Americans' financial literacy and bargaining power, it will also attempt to safeguard our individual financial destinies and our nation's fiscal strength.

The International Taxation System Andrew Lymer, John Hasseldine, 2002-08-31 International taxation is a vital issue for a growing number of business and individuals across the world. The need to understand how the international system of taxation works is therefore a subject of importance to many people. The International Taxation System provides this understanding by bringing together experts from the most important fields in the subject who have each authored chapters especially for this book. They each provide brief, structured and easy to understand explanations of the key concepts edited together into one volume to provide a unique, very readable, guide to the field. While this text is aimed at masters or advanced undergraduate level students, it will also be of interest to those requiring a professional understanding of the topic. Each chapter introduces a different aspect of the international taxation system, explains the important issues to be understood in each case and provides suggestions for discussion and further reading.

Why America Lost the War on Poverty--And How to Win It Frank Stricker, 2011-02-01 In a provocative assessment of American poverty and policy from 1950 to the present, Frank Stricker examines an era that has seen serious discussion about the causes of poverty and unemployment. Analyzing the War on Poverty, theories of the culture of poverty and the underclass, the effects of Reaganomics, and the 1996 welfare reform, Stricker demonstrates that most antipoverty approaches are futile without the presence (or creation) of good jobs. Stricker notes that since the 1970s, U.S. poverty levels have remained at or above 11%, despite training programs and periods of economic growth. The creation of jobs has continued to lag behind the need for them. Stricker argues that a serious public debate is needed about the job situation; social programs must be redesigned, a national health care program must be developed, and economic inequality must be addressed. He urges all sides to be honest--if we don't want to eliminate poverty, then we should say so. But if we do want to reduce poverty significantly, he says, we must expand decent jobs and government income programs, redirecting national resources away from the rich and toward those with low incomes. *Why America Lost the War on Poverty--And How to Win It* is sure to prompt much-needed debate on how to move forward.

NATO and the Western Balkans Niall Mulchinock, 2017-03-28 This book provides a critical examination of NATO’s evolving strategic and operational roles in the Western Balkans since the disintegration of Yugoslavia in 1991, with a particular focus on Bosnia, Kosovo and the former Yugoslav Republic of Macedonia, in both the conflict and post-conflict phases. While there is a myriad of literature available on the various conflicts that engulfed the former Yugoslavia after the collapse of communism, less has been written on NATO’s overall role in these conflicts. This text, therefore, fills the gap, offering a thematic study of NATO’s roles and duties in this region from the early 1990s to the present day. The ‘levels of analysis’ introduced by Mulchinock provide a new framework for examining NATO’s response to the Yugoslav wars of secession, focusing on the role of key NATO member states and the role of different NATO Secretaries-General, along with the impact of inter-institutional cooperation (and conflict) with other international organisations.

Trade Policy between Law, Diplomacy and Scholarship Christoph Herrmann, Bruno Simma, Rudolf Streinz, 2015-06-20 This book presents 22 topical contributions on international trade law and policy, with a particular focus on EU external trade law, addressing countries ranging from Ukraine to Switzerland and the US (TTIP) and aspects from trade and IPRs to anti-dumping. The International Criminal Court in an Effective Global Justice System Linda E. Carter, Mark S. Ellis, Charles Chernor Jalloh, 2016-11-25 International tribunals need to interface effectively with national jurisdictions, which includes coordination with domestic judicial prosecutions as well as an appreciation for other non-judicial types of transitional justice. In this book, the authors analyze the earlier international tribunals established since the 1990s and the parallel national proceedings for each. In examining the ways in which the ICC can best coordinate with national processes this book considers the ICC's present interactions with national jurisdictions and the statutory framework of the Rome Statute for interface with national jurisdictions.

Encyclopedia of Cesar Chavez Roger Bruns, 2013-04-02 This book is a unique, single-volume treatment offering original source material on the life, accomplishments, disappointments, and lasting legacy of one of American history's most celebrated social reformers—Cesar Chavez. Two decades after Cesar Chavez's death, this timely book chronicles the drive for a union of one of American society's most exploited groups—farm workers. Encyclopedia of Cesar Chavez is a valuable one-volume source based on the most recent research and available documentation. Historian Roger Bruns documents how Chavez and his United Farm Workers (UFW), against formidable odds, organized farm laborers into a force that for the first time successfully took on the might of California's agribusiness interests to achieve greater wages and better working conditions. Set against the backdrop of the 1960s, a time of assassinations, war protests, civil rights battles, and reform efforts for poor and minority citizens, the approximately 100 entries in this encyclopedia provide a glimpse into the events, organizations, men and women, and recurring themes that impacted the life of Cesar Chavez. It also contains a section of primary documentation—useful not only to enhance the understanding of this social and political movement, but also as source material for students.

Infrastructure and Form Karin Zitzewitz, 2022-09-06 In the 1990s and 2000s, contemporary art in India changed radically in form, as an art world once dominated by painting began to support installation, new media, and performance. In response to the liberalization of India's economy, art was cultivated by a booming market as well as by new nonprofit institutions that combined strong local roots and transnational connections. The result was an unprecedented efflorescence of contemporary art and growth of a network of institutions radiating out from India. Among the first studies of contemporary South Asian art, Infrastructure and Form engages with sixteen of India's leading contemporary artists and art collectives to examine what made this development possible. Karin Zitzewitz articulates the connections among formal trajectories of medium and material, curatorial frames and networks of circulation, and the changing conditions of everyday life after economic liberalization. By untangling the complex interactions of infrastructure and form, the book offers a discussion of the barriers and conduits that continue to shape global contemporary art and its relationship to capital more broadly.
