When Communities Assess their AIDS Epidemics Bowser,Quimby,Singer,2007-04-16 When Communities Assess their AIDS Epidemics is a detailed ethnographic description of the AIDS epidemic in ten U.S. cities and the U.S. Virgin Islands. Employing a rapid ethnographic assessment methodology, cities from the Atlantic to the Pacific have implemented Project RARE (Rapid Assessment, Response, and Evaluation) efforts. These RARE projects examine the moving edge of the AIDS epidemic through descriptions of high-risk sites and identifications of segments of the populations at greatest risk. Utilizing a series of focus groups and street interviews, local field research teams gain an insider's perspective on HIV risk within social contexts. Dr. Benjamin P. Bowser, Dr. Ernest Quimby, and Dr. Merrill Singer have compiled these critical studies that analyze current conditions, challenges, and recommendations encountered by RARE. When Communities Assess their AIDS Epidemics is a powerful and engaging text that will appeal to those interested in public health and anthropology.

Typical multi-home stepfamilies are riddled with conflicts between three or more co-parents and their relatives over child discipline, nutrition, visitations, custody, hygiene, religion, schooling, hoidays, loyalties, expenses, names, responsibilities, and other topics. The scope, complexity, and persistence of these disputes among ex mates, stepparents, and relatives can significantly contribute to eventual re/divorce. (The / notes it may be a stepparent's first union). This guidebook is part of a series intended to help co-parents and supporters overcome five common hazards that combine to (1) promote epidemic U.S. re/divorce, and (2) pass on significant psychological wounds to vulnerable children. The hazards are: co-parents' shared unawarenesses and ignorance of key information; plus... unseen psychological wounds from low-nurturance childhoods; plus... incomplete or blocked grief in kids and/or adults, which inhibits new bonds and adult intimacy; plus... courtship neediness and romantic illusions; plus... little informed stepfamily help in the media and local community. Typical nuclear stepfamilies include three or more co-parents (bioparents and stepparents) and several minor kids shuttling between two or more homes: Parenting effectively in this environment is far more complex than in traditional intact biological families - which catches typical co-parents and relatives by surprise. Why this book (and series)? Families exist to nurture - i.e. to fill key needs of their kids and adults. Most U.S. stepfamilies follow the divorce of one or both new mates, most of whom are parents. Divorce suggests that their kids weren't well nurtured in their first family, and have many concurrent developmental + special needs to fill in their complex stepfamily.
