Beginning JavaScript Paul Wilton, 2005-11-14 What is this book about? JavaScript is the preferred programming language for Web page applications, letting you enhance your sites with interactive, dynamic, and personalized pages. This fully updated guide shows you how to take advantage of JavaScript's client-side scripting techniques for the newest versions of Netscape and Internet Explorer, even if you've never programmed before. You begin with basic syntax and learn about data types and how to structure code for decision-making. Then you learn to use dates, strings, and other basic objects of JavaScript. Next, you see how to use JavaScript to manipulate objects provided by the browser, such as forms and windows. From there, you move into advanced topics like using cookies and dynamic HTML. After you have a solid foundation, you explore dynamic generation of Web content using server-side scripting and back-end databases. And you practice what you learn by building a sample application as you go. What does this book cover? Here are some of the things you'll find in this book: What types of data are used in JavaScript How to identify and correct flaws in your code Techniques for programming the browser How to use Microsoft Script Debugger and Netscape Script Debugger Ways to manage cross-browser issues How JavaScript interacts with XML and HTML Who is this book for? This book is for anyone who wants to learn JavaScript programming. You should have some understanding of HTML and how to create static Web pages, but no prior programming experience is necessary.

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to

command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
