Reboot Jodie Fox,2019-10-21 Shoes of Prey launched in 2009. It allowed people to design their dream shoes online, get them expertly manufactured, and have them shipped to anywhere in the world within two weeks. The startup broke even at two months, hit multi-million dollar revenues in under two years, raised tens of millions in funding from top-tier investors and shipped to more than 100 countries. All the metrics pointed to huge scalability. To a huge business. To a huge success. But it didn't succeed. In 2018 the business failed. And this is that story. Reboot tells the truth of what it is like to be at the helm of a global business. From the high highs of besting Karl Lagerfeld on global awards to the low lows of closing the doors on your dream, join author Jodie Fox on a raw journey as she reveals for the first time the story behind the story of fashion darling Shoes of Prey. This incredible ride will share lessons on raising capital, building a brand, finding suppliers, doing business in China and, most importantly, how to learn and grow from your successes and your mistakes and be ready every day to reboot for the next challenge.

Outsourcing Technology Robin Hastings, 2014-03-18 The care and maintenance of technology is a specialized field requiring a diverse set of skills to perform properly. Many libraries find it difficult to attract skilled people because of a lack of personnel budgets, because of a location that is rural enough to have a limited applicant pool, or because the library lacks enough technological savvy to make effective hiring decisions. Regardless of the reason for the lack of technological skill in a library's staff, there are ways to outsource major technological functions of the library so that even very small libraries can have the same access to technology as the big libraries—and big libraries can manage huge technological projects with the same resources and skills as multinational companies. Outsourcing Technology: A Practical Guide for Librarians will provide the information and guidance needed for both the smallest libraries to embrace technology and the largest libraries to get the most from their technology investments with tips and tricks for libraries of size between as well.

Dynamic Secularization William Sims Bainbridge, 2017-05-11 This book discusses secularization, arguing that it may be more complex and significant than is generally recognized. Using a number of online exploration methods, the author provides insights into how religion may be changing, and how information technology might be energized in this process. Working from the premise that the relationship between science and religion is complex, the author demonstrates that while science has contradicted some specific religious beliefs, science itself may have been facilitated by beliefs formed many centuries ago. Science assists engineers in the development of powerful new technologies, and asserts that the universe is based on a set of fundamental principles that can be understood by humans through the assistance of mathematics. The challenging ideas discussed will benefit readers through sharing a variety of Internet-based research methods and cultural discoveries. The book provides a balance between quantitative methods, illustrated by 24 tables of statistics, and qualitative methods, illustrated by 30 screenshots of computer-generated virtual worlds. Analysis interweaves with description, creating a sense of involvement in the experience of exploring online realities at the same time as radical insights are shared.
