Recent Advances in Sustainable Process Design and Optimization Dominic C. Y. Foo, Mahmoud M. El-Halwagi, Raymond R. Tan, 2012 This book is a compilation of the various recently developed techniques emphasizing better chemical processes and products, with state-of-the-art contributions by world-renowned leaders in process design and optimization. It covers various areas such as grass-roots design, retrofitting, continuous and batch processing, energy efficiency, separations, and pollution prevention, striking a balance between fundamental techniques and applications. The book also contains industrial applications and will serve as a good compilation of recent industrial experience for which the process design and optimization techniques were applied to enhance sustainability. The book is accompanied by some electronic supplements (i.e., models and programs) for selected chapters.

The Ante-Nicene Fathers Alexander Roberts, 2007-05-01 One of the first great events in Christian history was the Council of Nicaea in 325 AD, convened to organize Christian sects and beliefs into a unified doctrine. The great Christian clergymen who wrote before this famous event are referred to as the Ante-Nicenes and the Apostolic Fathers, and their writings are collected here in a ten-volume set. The Ante-Nicenes lived so close to the time of Christ that their interpretations of the New Testament are considered more authentic than modern voices. But they are also real and flawed men, who are more like their fellow Christians than they are like the Apostles, making their words echo in the ears of spiritual seekers. In Volume I of the 10-volume collected works of the Ante-Nicenes first published between 1885 and 1896, readers will find the writings of: Clement of Rome, the fourth pope, who was supposedly martyred by being tied to an anchor and tossed overboard Mathetes, an anonymous writer considered the first Christian apologist Polycarp, a Christian bishop who was stabbed to death after he failed to burn at the stake Ignatius, a student of John the Apostle, who was Bishop of Antioch before he was killed Barnabas, an anonymous writer given the name of Saint Barnabas Papias, author of Interpretations of the Sayings of the Lord, a textbook on quotes from Jesus Justin Martyr, a Christian apologist and accomplished philosopher, and Irenaeus, disciple of Polycarp, apologist, and bishop of Lugdunum.

Ethical Hacking: Techniques, Tools, and Countermeasures Michael G. Solomon, Sean-Philip Oriyano, 2022-12-07

Ethical Hacking covers the basic strategies and tools that prepare students to engage in proactive and aggressive cyber security activities, with an increased focus on Pen-testing and Red Teams. The text begins with an examination of the landscape, key terms, and concepts that a security professional needs to know about hackers and computer criminals who break into networks, steal information, and corrupt data. Part II provides a technical overview of hacking: how attackers target cyber resources and the methodologies they follow. Part III studies the tools and methods that are most effective when dealing with hacking attacks, especially in an age of increased reliance on distributed devices. This title is can be aligned to EC Council's Certified Ethical Hacker in terms of scope (but not rigor)--

Training Methods to Build Human Terrain Mapping Skills Laura A. Zimmerman, 2010 A key to success in counterinsurgency operations involves finding ways to identify the insurgents within the population. Success will likely require that Soldiers develop the cultural and information gathering skills necessary to develop a detailed knowledge of the human terrain in their area of operations. This report documents research conducted to develop Human Terrain Mapping (HTM) skills for Soldiers, where HTM is an overarching concept that refers to methods and tools used to systematically collect and catalog social and ethnographic information. Given the rapidly changing nature of current conflicts, the research effort sought to gather HTM training requirements and tactics, techniques, and procedures (TTP) from members of an intact unit that had worked together performing the HTM functions in a recent deployment. Sixteen Soldiers from a recently deployed brigade were interviewed to identify the TTP they used to accomplish HTM tasks. Based on the interview findings a training product was developed that demonstrates methods and tools for building an understanding of the HTM process, specific information elicitation techniques, and Soldier observation skills.--DTIC.
