Source Separation and Recycling Roman Maletz,Christina Dornack,Lou Ziyang,2018-03-07 Source separation of waste and subsequent recycling processes are promising solutions on the road to a circular economy. They reduce waste disposal and the need for resource deployment, while also producing secondary raw materials; as such, they have a significant effect on climate protection. This book presents source separation technologies and related aspects that form the basis for efficient recycling and a modern approach to waste management. It examines legislative drivers and policy aspects of adequate waste collection schemes, as well as segregation technologies and the success factors for their implementation. Summarizing the outcomes of a Sino-German workshop, the focus of this volume is mainly on the current situation in China and Germany. However, the findings are applicable to a broad range of situations and regions around the world. In addition, the book demonstrates the relevance of source separation for climate protection and describes alternative separation technologies. Given the breadth and depth of its coverage, the volume will appeal to environmental scientists, engineers, economists, waste managers and policymakers alike.

Universe – A Timeline Dr. Sayed Rafi Ahsan Rizvi,2017-10-26 The scientific explanation of the origin of the Universe is that of a Big Bang. However, The Quranic verses indicate that the universe is an uninterrupted sequence from origin until the end within a specific time span. The verses further reveal that everything in the material universe is inter-connected through tracks and pathways (possibly providing for instant communication and travel), and could be the same as 'wormholes' that scientists speak of. As commonly understood, the human body is a part of earthly evolution (created from clay). However, The Quran states that the infusion of 'Nafs' in the mother's womb transforms the foetus into a 'human' much before birth (V. 7; 172). "The similitude of Jesus before Allah is as that of Adam ..." [V. 3; 59], declaring that Adam (AS) too had a mother, but no father. Possibly, Adam (AS) and Eve (AS) were born to different Neanderthal females (humans share 4-5% DNA with Neanderthals). And, God bestowed Adam (AS) and Eve (AS) with only two sons. How did the human race proliferate? – Read inside for an explanation backed by Quranic information. Genome analysis indicates that human inter-breeding with Neanderthals created the Denisovan group. Only a few offspring received 'Nafs' from God to be human while the remaining were

eliminated by Noah's flood and the passage of time. God's each Day worked out from The Quran— equals -- 1.15 billion years As per The Quran the present age of Universe is $(1+6+4=11 \times 1.15=12.65)$ or -- 13.00 billion years Science puts the Universe age as -- 13.70 billion years (Science estimate is on higher side, a re-look needed by Scientists) Total life span (Quran) of Universe $(1+6+4+1+1=13 \times 1.15+14.95)$ or -- 15.00 billion years This book presents God's Grand Design as a continuous sequence of His Governance of the birth, development, retreat and death of the universe and all matter, inanimate as well as animate.

Chasing the Chinese Dream Nick Holdstock, 2017-09-22 China is undergoing the biggest and fastest societal and economic change in human history. Driving this dizzying transformation is the idea of the 'Chinese Dream', the promise that in the new China, anyone can make it. Journalist and writer Nick Holdstock has travelled the length of this huge country in order to find out the reality behind this rhetoric - from the factory-owner, to the noodle seller, from the karaoke maids to the hoteliers, and from the deserted, ageing countryside to the young and overcrowded cities. Chasing the Chinese Dream follows a cast of extraordinary characters: we meet the people getting rich; running factories and buying luxury cars and Louis Vuitton bags. But we also meet those left behind, trapped by a system which forces long hours and no prospects upon them. A spell-binding and magical narrative,

this book looks to tell the story of modern China through the people who are living it.
