Icehenge Kim Stanley Robinson, 2014-01-07 An early novel from Science Fiction legend Kim Stanley Robinson, now available for the first time in decades: Icehenge. On the North Pole of Pluto there stands an enigma: a huge circle of standing blocks of ice, built on the pattern of Earth's Stonehenge--but ten times the size, standing alone at the farthest reaches of the Solar System. What is it? Who came there to build it? The secret lies, perhaps, in the chaotic decades of the Martian Revolution, in the lost memories of those who have lived for centuries. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Red Plenty Francis Spufford, 2012-02-14 Spufford cunningly maps out a literary genre of his own . . . Freewheeling and fabulous. —The Times (London) Strange as it may seem, the gray, oppressive USSR was founded on a fairy tale. It was built on the twentieth-century magic called the planned economy, which was going to gush forth an abundance of good things that the lands of capitalism could never match. And just for a little while, in the heady years of the late 1950s, the magic seemed to be working. Red Plenty is about that moment in history, and how it came, and how it went away; about the brief era when, under the rash leadership of Khrushchev, the Soviet Union looked forward to a future of rich communists and envious capitalists, when Moscow would out-glitter Manhattan and every Lada would be better engineered than a Porsche. It's about the scientists who did their genuinely brilliant best to make the dream come

law? The Fourth Geneva Convention for Civilians draws on archival research across seven countries to bring together the Cold War interventions, founding motives and global idealisms that shaped its conception. Gilad Ben-Nun draws on the three key principles that the convention brought about to consider the recent events where its application has either been successfully applied or circumvented, from the 2009 Gaza War, the war crimes tribunal in the former Yugoslavia and Nicaragua vs. the United States to the contemporary conflict in Syria. Weaving historical archival research, a grounding in the concepts of international law, and insightful analysis of recent events, this book will appeal to a broad range of students, academics and legal practitioners.

Venture Capital and the Corporate Governance of Chinese Listed Companies Lin Zhang,2011-10-20 State-controlled listed companies have always dominated Chinese stock markets. As a result of the rampant scandals related to them, there have been voluminous academic efforts to explore their corporate governance, underpinned by agency costs. However, these studies have yet to examine the phenomenon from the perspective of venture capital and adaptive efficiency. During the last ten years, despite China's remarkable progress in the development of its venture capital market, its domestic venture capital has been marginalized by American competitors. Given the different performance between them, the author contends that the corporate governance system of Chinese state-controlled listed companies has hampered the performance of the institutional factors which are responsible for the prosperity of American venture capital in Chinese venture capital markets. With the practice of American venture capital as the mirror, he empirically demonstrates that Chinese domestic venture capital lacks the four factors related to the success of their American counterparts: large and independent funding, application of incentive mechanisms, efficient exit channels, and a high risk tolerance level. More importantly, these defects as a whole are closely linked to the corporate governance of state-controlled listed companies. Considering the potential negative consequences on economic and social development, the author identifies policy reforms underway to harmonize agency costs and adaptive efficiency.

Red Heat Alex von Tunzelmann, 2012-09-13 America's secret war in the Caribbean during the Cold War is revealed as never before in this riveting story of the machinations and blunders of superpowers, and the daring of the mavericks who took them on. During the presidencies of Eisenhower, Kennedy and Johnson, the Caribbean was in crisis, while the United States and the USSR acted out the world's rising tensions in its island nations. Meanwhile the leaders of these nations - the charismatic Fidel Castro, and his mysterious brother Raúl; the ideologue Che Guevara; the capricious psychopath Rafael Trujillo; and François 'Papa Doc' Duvalier, a buttoned-down doctor with interests in Vodou, embezzlement and torture - had ambitions of their own. Alex von Tunzelmann's brilliant narrative follows these five rivals and accomplices from the beginning of the Cold War to its end. The superpowers thought they could use these Caribbean leaders as puppets, but what neither bargained on was that their puppets would come to life. The United States, in its all-consuming fight against communism, stumbled into one disaster after another. First, with the Bay of Pigs, and then with the Cuban Missile Crisis, it helped bring the world as close to catastrophic nuclear war as it has ever been. *Red Heat* is an authoritative and eye-opening account of a wildly dramatic and dangerous era of international politics that has unmistakable resonance today.

Why Red Doesn't Sound Like a Bell J. Kevin O'Regan, 2011-08-01 The book starts by analyzing the problem of how we can see so well despite what, to an engineer, might seem like horrendous defects of our eyes. An explanation is provided by a new way of thinking about seeing, the sensorimotor approach. In the second part of the book the sensorimotor approach is extended to all sensory experience. It is used to elucidate an outstanding mystery of consciousness, namely why, unlike today's robots, humans actually can feel things. The approach makes predictions and opens research avenues, among them the phenomena of change blindness, sensory substitution, and looked but failed to see, as well as results on color naming and color perception and the localisation of touch on the body.
