**W.H. Crossland** Sheila Binns, 2020-01-01 The creative genius behind Founder's Building at Royal Holloway, University of London, arguably the most glorious building in England of the end of the nineteenth century, is widely respected and its architectural style is regarded as archetypally 'Victorian'. Yet its architect, William Henry Crossland, is little known, despite a substantial catalogue of buildings, most of which remain standing today. Bringing Crossland out of the shadows, this biography explores this mysterious and elusive figure in depth for the first time. Recently digitised documents and long-hidden archival material have thrown a powerful light on Crossland, which, together with the author's first-hand knowledge of his buildings, offer the reader an unprecedented appreciation and understanding of the man, his life and work, as well as his personal and artistic influences. W.H. Crossland fills a gap in nineteenth-century architectural knowledge, but it is also the touching story of an ambitious and talented man, who is long overdue to be recognised as one of the 'greats' among nineteenth-century architects. This book is intended for architects, architectural historians and anyone who is interested in the built environment, nineteenth-century history and intriguing personal stories.

**America Beyond Capitalism** Gar Alperovitz, 2011 America Beyond Capitalism is a book whose time has come. Gar Alperovitz's expert diagnosis of the long-term structural crisis of the American economic and political system is accompanied by detailed, practical answers to the problems we face as a society. Unlike many books that reserve a few pages of a concluding chapter to offer generalized, tentative solutions, Alperovitz marshals years of research into emerging new economy strategies to present a comprehensive picture of practical bottom-up efforts currently underway in thousands of communities across the United States. All democratize wealth and empower communities, not corporations: worker-ownership, cooperatives, community land trusts, social enterprises, along with many supporting municipal, state and longer term federal strategies as well. America Beyond Capitalism is a call to arms, an eminently practical roadmap for laying foundations to change a faltering system that increasingly fails to sustain the great American values of equality, liberty and meaningful democracy.

**50 Events That Shaped American Indian History [2 volumes]** Donna Martinez, Jennifer L. Williams Bordeaux, 2016-12-05 This powerful two-volume set provides an insider's perspective on American Indian experiences through engaging narrative entries about key historical events written by leading scholars in American Indian history as well as inspiring first-person accounts from American Indian peoples. This comprehensive, two-volume resource on American Indian history covers events from the time of ancient Indian civilizations in North America

to recent happenings in American Indian life in the 21st century, providing readers with an understanding of not only what happened to shape the American Indian experience but also how these events—some of which occurred long ago—continue to affect people's lives today. The first section of the book focuses on history in the pre-European contact period, documenting the tens of thousands of years that American Indians have resided on the continent in ancient civilizations, in contrast with the very short history of a few hundred years following contact with Europeans—during which time tremendous changes to American Indian culture occurred. The event coverage continues chronologically, addressing the early Colonial period and beginning of trade with Europeans and the consequential destruction of native economies, to the period of Western expansion and Indian removal in the 1800s, to events of forced assimilation and later self-determination in the 20th century and beyond. Readers will appreciate how American Indians continue to live rich cultural, social, and religious lives thanks to the activism of communities, organizations, and individuals, and perceive how their inspiring collective story of self-determination and sovereignty is far from over.

*MRI Quantification of Cartilage of the Knee* Julio Carballido Gamio, 2005 Osteoarthritis (OA) of the knee is a chronic disease that is characterized by degeneration of articular cartilage. Magnetic resonance imaging (MRI) allows the visualization and quantification of this degeneration in vivo. In this dissertation the development of new image processing techniques and application of existing ones to perform inter-subject comparison of knee cartilage thickness are presented. The main characteristic of the proposed method is the registration of cartilage surfaces based on the registration of the corresponding bones. The process is semi-automatic since steps involving segmentation require interaction. Cartilage is segmented using Bezier splines and edge detection, and its shape is then interpolated using a morphing technique to create isotropic voxels. The bones corresponding to the segmented cartilage are segmented with a similar approach and registered based on landmarks. The registration can be rigid-body for intra-subject or elastic for inter-subject comparisons. Landmarks are automatically selected based on shape matching using 3D shape-contexts. Visualization of cartilage thickness maps in three dimensions or overlaid on the MR images is also demonstrated. The cartilage segmentation and the morphing technique were validated visually and based on volumetric measurements of images of porcine knees which cartilage volumes were directly measured using a water displacement method. The registration techniques were validated visually and using manual landmark registration. Results showed a good agreement between the digital volumetric measurement from the morphed cartilage and the water displacement method with correlation values of 0.83 (p
