The New Great Game Thomas Fingar,2016-03-23 China's rise has elicited envy, admiration, and fear among its neighbors. Although much has been written about this, previous coverage portrays events as determined almost entirely by Beijing. Such accounts minimize or ignore the other side of the equation:

namely, what individuals, corporate actors, and governments in other countries do to attract, shape, exploit, or deflect Chinese involvement. The New Great Game analyzes and explains how Chinese policies and priorities interact with the goals and actions of other countries in the region. To explore the reciprocal nature of relations between China and countries in South and Central Asia, The New Great Game employs numerous policy-relevant lenses: geography, culture, history, resource endowments, and levels of development. This volume seeks to discover what has happened during the three decades of China's rise and why it happened as it did, with the goal of deeper understanding of Chinese and other national priorities and policies and of discerning patterns among countries and issues.

Shifting Priorities in Russia's Foreign and Security Policy Rémi Piet, Roger E. Kanet, 2016-03-09 Given the resurgence of Russian economic capabilities and of Russia's role as a regional, even global, political actor, much of the literature written more than 4-5 years ago is already dated. The editor and contributors to this timely volume draw upon a broad range of analysts who deal with various aspects of Russian relations with its neighbours to the West and to the East. Implications for Russian foreign and security policy are key to understanding Russia's position in the 21st Century. Readers in Russian foreign and security policy; European, Eurasian, and Asian security; and contemporary international politics/security will find this volume invaluable.

International Political Economy Thomas D. Lairson,David Skidmore,2016-12-08 This text offers a rethinking of the field of international political economy in an era of growing but uneven globalization. Even as global integration advances, states play central roles as partners with the largest of global firms, as the catalysts of competitiveness and economic growth, as the creators of global institutions, and in promoting and responding to global interdependence. Indeed, the struggle for power and wealth within and among states underscores the primacy of politics in understanding current realities. At the same time, new issues and actors complicate the global agenda as it expands to address the environment, global health, and food security. By offering a clear explanation of basic concepts, contextualizing the presentation of theoretical debates, and placing current events in historical context, International Political Economy ensures students a deep understanding of how the global economy works and the ways in which globalization affects their lives and those of people around the world. Key Content and Features Engages debates over the reach and significance of globalization. Examines the sources and consequences of global financial instability. Explores the origins and consequences of global inequality. Compares various strategies of development and state roles in competitiveness.

Discusses the role of key international economic institutions. Considers the impact of the rise of China on the global economy and the potential for war and peace. Illustrates collective efforts to fight hunger, disease, and environmental threats. Includes numerous graphs and illustrations throughout and end of chapter discussion questions. Links key concepts for each chapter to a glossary at the end of the book. Provides a list of acronyms at the outset and annotated further readings at the end of each chapter. Offers additional resources on a web site related to the text, including a list of links to IPE-related web pages.

*The New Abnormal* Aaron Kheriaty, 2022-11-01 The coronavirus pandemic conferred enormous power on certain government officials. They have no intention of giving it up. In the space of a few weeks in early 2020, Americans witnessed the imposition of previously unimagined social controls by the biomedical security state—the unelected technocrats who suddenly enjoyed nearly absolute power to incarcerate, isolate, and medicate the entire population. In this chilling new book, a dissident scientist reveals the people and organizations that form the biomedical security state its role in the origin of the pandemic and shaping the government response why it is a threat to science, public health, and individual freedom what can be done to confront and defeat this new Leviathan When covid-19 broke out, Dr. Aaron Kheriaty's work put him on the front lines. Realizing that the mental, physical, and economic toll of lockdowns was catastrophic, he began to protest that the cure was worse than the disease—an intolerable heresy. When he refused vaccination because he had natural immunity from a previous infection, the University of California, Irvine, medical school fired him. He fought back, in the courts and in the media, and has become a reliable source of truth amid official obfuscation and censorship. Now it's time for all of us to fight back. The deadly and arrogant misrule of the biomedical security state must not become the new normal.

**Women and Inequality in the 21st Century** Brittany C. Slatton,Carla D Brailey,2019-05-17 Recent books have drawn attention to an unfinished gender revolution and the reversal of gender progress. However, this literature primarily focuses on gender inequality in the family and its effect on women's career and family choices. While an important topic, these works are critiqued for being particularly attentive to the concerns of middle-class, heterosexual, White women and ignoring or erasing the issues and experiences of the vast majority of women throughout the United States (and other countries). *Women and Inequality in the 21st Century* is an edited collection that addresses this dearth in the current literature. This book examines the continued inequities navigated by women occupying marginalized social positions within a nexus of power relations. It addresses the experiences of immigrant women of color, aging women, normative gender constraints faced by lesbian and gender non-conforming individuals assigned the female gender at birth, religious constraints on women's sexual expression, and religious and ethnic barriers impeding access to equality for women across the globe. Contributors to this collection reflect varying fields of inquiry—including sociology, psychology, theology, history, and anthropology. Their works employ empirical research methods, hermeneutic analysis, and narrative to capture the unique gender experiences and negotiations of diverse 21st-century women.

**Chemical Process Equipment** Stanley M. Walas,1988 Wales (chemical and petroleum engineering, U. of Kansas) presents a minimum of essential theory, with numerical examples to illustrate the more involved procedures. Emphasis is placed on short cut

methods, rules of thumb and data for design by analogy; a short chapter on costs of equipment is included. The introductory chapters will provide a general background to process design, flowsheeting, and process control. Annotation copyrighted by Book News, Inc., Portland, OR

**Building a New Leadership Ladder** Carol J.

Geffner, 2023-02-28 Strategies for transforming workplace cultures to support a new generation of women leaders. When it comes to the gender gap, it is not enough to ask women to “lean in” and demand promotions and raises. Organizations have an obligation to level up and provide women with more opportunities for advancement. In this book, leadership and governance expert Carol Geffner makes a strong case that for women to reach their full potential, workplaces and their leaders must take a more proactive role in combating gender discrimination. Based on over 200 hours of interviews with women leaders in the United States and abroad, *Building a New Leadership Ladder* demonstrates that even when women are promoted to leadership positions, they are rarely given access to the same support networks as their male colleagues. Covering sectors as diverse as higher education, health care, law enforcement, and the military, the book identifies common strategies that all organizations can use to remove obstacles for women’s advancement. More than a how-to guide on how women can ascend to the top, *Building a New Leadership Ladder* is a bold call to action for organizations and their leaders to proactively foster the conditions under which women’s efforts to rise up are consistently recognized and rewarded. Interviewer: Dr. Carol Geffner, Director of the Executive Master of Leadership Program at the USC’s Sol Price School of Public Policy Interviewees: Alma Burke, former LAPD, currently head of security at USC Yasmin Beers, former City Manager, Glendale, CA RaShall Brackney, Chief of Police, Charlottesville, VA Coco Brown, CEO Athena Alliance (SaaS company for HR) Mary Sue Coleman, chemist, interim president of University of Michigan (she

previously served as president from 2002-2014) France Cordova, director of National Science Foundation Tiffany Felix, Senior Vice President, Environmental Health and Safety, Paramount Jennifer Grasso, LAPD's first female SWAT officer Heidi Hammel, Executive Vice President of the Association of Universities for Research in Astronomy Stephanie Jarvis, (couldn't immediately confirm her current role) Nannerl Keohane, former president of Wellesley College and Duke University Fiona Ma, California State Treasurer Anni Mu, Deputy Group Commander, CA Air National Guard Laura Mosqueda, Professor of Family Medicine and Geriatrics at USC Keck School of Medicine Janet Napolitano, former Arizona governor, former Secretary of Homeland Security Sharon Papa, Chief of Police, Hermosa Beach, CA Ellen Stofan, Under Secretary for Science and Research, The Smithsonian Mirtha Villereal-Younger, multiple leadership roles within CA military, currently President/CEO of Agile Construction Hiltrud Werner, Volkswagen Board member Joy White, Executive Director of the Air Force Space and Missile Systems Center Maria Zuber, Vice President of Research, MIT In addition, three women were interviewed who, due to the nature of their positions and sectors, asked that they not be identified in this book.
