Terrorism Risk Assessment Instruments R. Corrado, G. Wössner, A. Merari, 2021-03-25
The search for a distinct terrorist profile has been going on for many years, and while it is generally agreed that nobody is born a terrorist, there is plenty of disagreement about why a person might become one. Whereas personal and situational push and pull factors can be combined to determine how and why young people become involved in terrorism, preventing an individual from following a path that ends in violence without moral restraint poses an enormous challenge, especially in an open society. This book presents papers from the NATO Advanced Research Workshop titled *A Review of the Utility of Existing Terrorism Risk Assessment Instruments and Policies: Is there the Need for Possible New Approaches?*, held in Berlin, Germany, on 29-30 November 2019. Researchers were asked to present papers for discussion sessions with invited participants and practitioners from a number of NATO member and partner countries. Various assessment instruments for identifying problematic individuals at an early stage were presented by experts. It was generally agreed that, due to cultural, religious and other differences, there is no simple way to identify the relatively few high-risk individuals among the larger population of politically radicalized but not necessarily violent individuals who pose no threat. Framed by an Introduction and Conclusion, the 16 chapters in the book are divided into three parts: Theory and Risk/Threat Assessment Instrument Policy Themes; Implementation of Politically Motivated Terrorism Protocols; and Personality Traits/Disorders, Anti-State Terrorism Profiles and the DSM-5 Personality Trait Instrument. This practice-oriented book will be of interest to all those tasked with protecting society from some of its most dangerous members.

Risk-Based Analysis for Environmental Managers Kurt A. Frantzen, 2016-04-19
All corporations must perform evaluations to define the risks to public health and the environment. Your corporation can get the edge by evaluating risk with a process that begins with the end-in-mind for the property and that concludes with a cogently communicated argument that addresses the issues. With this in mind, *Risk-Based Analysis for Environmental Managers*

provides scientific strategies and techniques for reducing corporate environment liabilities. This practical guide provides a new, integrated perspective on the role of risk assessment in managing contaminated properties. It describes how to manage the assessment to impact decision making. The book provides you with a crisp, historical review and background development and an integrated technique called Risk-Based Analysis. This technique includes: A problem formulation tool Situation analysis techniques Risk assessment management Risk management option analysis Guidance on the development of risk arguments and their communication Working with a foundation of knowledge and strength will enable you to build a creative, value-added position that minimizes the risk potential through cost-effective techniques and returns the impaired property to valuable use. Risk-Based Analysis will help you obtain this goal, and Risk-Based Analysis for Environmental Managers give you the tools you need to use Risk-Based Analysis to its full potential.

Microbiological Risk Assessment in Food Processing M. Brown, M Stringer, 2002-09-26 Microbiological risk assessment (MRA) is one of the most important recent developments in food safety management. Adopted by Codex Alimentarius and many other international bodies, it provides a structured way of identifying and assessing microbiological risks in food. Edited by two leading authorities, and with contributions by international experts in the field, Microbiological risk assessment provides a detailed coverage of the key steps in MRA and how it can be used to improve food safety. The book begins by placing MRA within the broader context of the evolution of international food safety standards. Part one introduces the key steps in MRA methodology. A series of chapters discusses each step, starting with hazard identification and characterisation before going on to consider exposure assessment and risk characterisation. Given its importance, risk communication is also covered. Part two then considers how MRA can be implemented in practice. There are chapters on implementing the results of a microbiological risk assessment and on the qualitative and quantitative tools available in carrying out a MRA. It also discusses the relationship of MRA to the use of microbiological criteria and another key tool in food safety management, Hazard Analysis and Critical Control Point (HACCP) systems. With its authoritative coverage of both principles and key issues in implementation, Microbiological risk assessment in food processing is a standard work on one of the most important aspects of food safety management. Provides a detailed coverage of the key steps in microbiological risk assessment (MRA) and how it can be used to improve food safety Places MRA within the broader context of the evolution of international food safety standards Introduces the key steps in MRA methodology, considers exposure assessment and risk characterisation, and covers risk communication

Ethical Conduct of Clinical Research Involving Children Institute of Medicine, Board on Health Sciences Policy, Committee on Clinical Research Involving Children, 2004-07-09 In recent decades, advances in biomedical research have helped save or lengthen the lives of children around the world. With improved therapies, child and adolescent mortality rates have decreased significantly in the last half century. Despite these advances, pediatricians and others argue that children have not shared equally with adults in biomedical advances. Even though we want children to benefit from the dramatic and accelerating rate of progress in medical care that has been

fueled by scientific research, we do not want to place children at risk of being harmed by participating in clinical studies. *Ethical Conduct of Clinical Research Involving Children* considers the necessities and challenges of this type of research and reviews the ethical and legal standards for conducting it. It also considers problems with the interpretation and application of these standards and conduct, concluding that while children should not be excluded from potentially beneficial clinical studies, some research that is ethically permissible for adults is not acceptable for children, who usually do not have the legal capacity or maturity to make informed decisions about research participation. The book looks at the need for appropriate pediatric expertise at all stages of the design, review, and conduct of a research project to effectively implement policies to protect children. It argues persuasively that a robust system for protecting human research participants in general is a necessary foundation for protecting child research participants in particular.

The Science of Risk Analysis Terje Aven, 2019-06-21 This book provides a comprehensive demonstration of risk analysis as a distinct science covering risk understanding, assessment, perception, communication, management, governance and policy. It presents and discusses the key pillars of this science, and provides guidance on how to conduct high-quality risk analysis. The Science of Risk Analysis seeks to strengthen risk analysis as a field and science by summarizing and extending current work on the topic. It presents the foundation for a distinct risk field and science based on recent research, and explains the difference between applied risk analysis (to provide risk knowledge and tackle risk problems in relation to for example medicine, engineering, business or climate change) and generic risk analysis (on concepts, theories, frameworks, approaches, principles, methods and models to understand, assess, characterise, communicate, manage and govern risk). The book clarifies and describes key risk science concepts, and builds on recent foundational work conducted by the Society for Risk Analysis in order to provide new perspectives on science and risk analysis. The topics covered are accompanied by cases and examples relating to current issues throughout. This book is essential reading for risk analysis professionals, scientists, students and practitioners, and will also be of interest to scientists and practitioners from other fields who apply risk analysis in their work.

Toxicology and Risk Assessment Anna M. Fan, George Alexeeff, Elaine Khan, 2015-03-04 The presence of chemicals in our environment is a subject of intense interest owing to the many potential adverse health effects to humans following exposure to these chemicals. The principles and practices of risk assessment are used to assess the associated health risks to provide a scientific and health basis for guidance or regulatory standards development and risk management decision making for public health protection. This book compiles, discusses, and presents cutting-edge research data and methodology in performing risk assessment of some major chemicals of concern in our environment. It also discusses the complexity of the scientific databases, the available and updated methodology, emerging issues, limitations in

knowledge and methods, considerations of developmental and age sensitivities, use of defaults, case samples on results in risk assessment and risk management, and current and future perspectives. The editors are prominent in the field of environmental toxicology, risk assessment, and chemical regulations. This book will appeal to those interested in evaluating the human health effects of exposure to chemicals in the environment and the associated assessments and findings.

Risk Savvy Gerd Gigerenzer, 2015-03-31 A new eye-opener on how we can make better decisions—by the author of *Gut Feelings* In this age of big data we often trust that expert analysis—whether it's about next year's stock market or a person's risk of getting cancer—is accurate. But, as risk expert Gerd Gigerenzer reveals in his latest book, *Risk Savvy*, most of us, including doctors, lawyers, and financial advisors, often misunderstand statistics, leaving us misinformed and vulnerable to exploitation. Yet there's hope. In *Risk Savvy*, Gigerenzer gives us an essential guide to the science of good decision making, showing how ordinary people can make better decisions for their money, their health, and their families. Here, Gigerenzer delivers the surprising conclusion that the best results often come from considering less information and listening to your gut.

National Risk Assessments Organization for Economic Development and Cooperation, 2018-11 This report provides a synthetic view of national risk assessments (NRAs) in twenty OECD Member countries. NRA are used to support risk management decisions in a rapidly changing global risk landscape characterized by increasingly complex, interconnected societies and highly mobile people, information and goods. The report highlights good governance practices in establishing NRAs and how the results are used to inform public policy. It identifies challenges that OECD Member countries continue to confront in their efforts to implement NRA, and makes concrete recommendations where improvements could still be made.

At-Risk Children & Youth Niall McElwee, 2013-05-13 What assistance can be provided to disadvantaged youngsters to help them conquer the many challenges they face while growing up? *At-Risk Children & Youth: Resiliency Explored* analyzes the results from accumulated research on the risk and resiliency of children and youth in Ireland. Author Niall McElwee explains many of the challenges faced by children, including poor literacy and numeracy skills, poverty, distrust, and other difficult issues. Practical strategies are presented to help disadvantaged children and youth to overcome societal and self-imposed barriers for improvement. A detailed review and assessment is provided on the efficacy of Ireland's Youth Encounter Projects. This important resource focuses on what works and what does not in youth services. *At-Risk Children & Youth: Resiliency Explored* closely examines risk factors, and what it specifically means to be 'at-risk'. Going further beyond the standard risk factors usually considered such as drug use or dropping-out of school, this probing text explores the full range of factors and coping and healing mechanisms. The author challenges several of the views and beliefs about risk and resiliency generally held by many in child and youth services and in society. This book is extensively referenced and includes helpful figures tables to clearly present information. Topics in *At-Risk Children & Youth: Resiliency Explored* include: A breakdown of terms for risk behaviors and predictors of risk Issues of social class and social exclusion The impact of school difficulties on students, including truancy and poor academic standing Strategies to build on student strengths The quality of the entirety of the school experience as a determination of success Strategies for intervention A review of literature on risk and resiliency A relational research model, including methodology and ethical issues Description and functions of Youth Encounter Projects—and an assessment of their value Results of risk studies over the past decade Recommended changes in policies *At-Risk Children & Youth: Resiliency Explored* is a valuable addition to the libraries of educators, students, and child and youth service providers everywhere.

Demand has been building for a thorough analysis ... This edited book will familiarise both researchers and construction professionals

working with public private partnerships (PPP) with the issues involved in the planning, implementation and day-to-day management of public private projects. It will show how current risk management methods can help the complex process of managing procurement via such partnerships. The chapters - most authored by a practitioner/academic partnership - are organised round the concepts of best value and use the findings of a major research project investigating Risk Assessment and Management in Private Finance Initiative Projects. The analysis of this research will be supplemented with contributions by leading international experts from Hong Kong, Australia and Singapore, covering hospitals, schools, waste management and housing - to exemplify best practice in PPP-based procurement.
