Metaphor and Translation Dorota Śliwa,2019-10-16 This volume brings together the ideas put forward at an international conference on Metaphor and Translation held at the University of Toulon, France, in June 2017. The bilingual nature of the contributions here provides an insight into recent linguistic theories from both the English- and French-speaking worlds. This diversified approach is further enhanced by contributors being based in a large number of countries worldwide and working on different language combinations. The kinds of problem areas investigated here include a wide range of themes. They cover aspects ranging from methodological and theoretical issues to specialist areas such as literature, culture and the economy. Whatever the theoretical approach applied, the findings come up with interesting and useful conclusions as to how metaphor is translated in the types of discourse analysis proposed. As a result, this volume will be of interest to both scholars and students involved in metaphor studies and translation, as well as to professional translators wishing to keep track of recent theories and practical issues in the field.

On the Animation of the Inorganic Spyros Papapetros,2016-04-13 Throughout human history, people have imagined inanimate objects to have intelligence, language, and even souls. In our secular societies today, we still willingly believe that nonliving objects have lives of their own as we find ourselves interacting with computers and other equipment. In On the Animation of the Inorganic, Spyros Papapetros examines ideas about simulated movement and inorganic life during and after the turn of the twentieth century—a period of great technical innovation whose effects continue to reverberate today. Exploring key works of art historians such as Aby Warburg, Wilhelm Worringer, and Alois Riegl, as well as architects and artists like Fernand Léger, Mies van der Rohe, and Salvador Dalí, Papapetros tracks the evolution of the problem of animation from the fin de siècle through the twentieth century. He argues that empathy—the ability to identify with objects of the external world—was repressed by twentieth-century modernist culture, but it returned, projected onto inorganic objects such as machines, automobiles, and crystalline skyscrapers. These modern artifacts, he demonstrates, vibrated with energy, life, and desire of their own and had profound effects on people. Subtle and insightful, this book will change how we view modernist art, architecture, and their histories.

Bound by Law? Keith Aoki,James Boyle,Jennifer Jenkins,2006 A documentary is being filmed. A cell phone rings, playing the Rocky theme song. The filmmaker is told she must pay $10,000 to clear the rights to the song. Can this be true? Eyes on the Prize, the great civil rights documentary, was pulled from circulation because the filmmakers' rights to music and footage had expired. What's going on here? It's the collision of documentary filmmaking and intellectual property law, and it's the inspiration for this new comic book. Follow its heroine Akiko as she films her documentary, and navigates the twists and turns of intellectual property. Why do we have copyrights? What is fair use? Bound By Law reaches beyond documentary film to provide a commentary on the most pressing issues facing law, art, property and an increasingly digital world of remixed culture--
