Electronic Discourse in Language Learning and Language Teaching Lee B. Abraham, Lawrence Williams, 2009-08-27 New technologies are constantly transforming traditional notions of language use and literacy in online communication environments. While previous research has provided a foundation for understanding the use of new technologies in instructed second language environments, few studies have investigated new literacies and electronic discourse beyond the classroom setting. This volume seeks to address this gap by providing corpus-based and empirical studies of electronic discourse analyzing social and linguistic variation as well as communicative practices in chat, discussion forums, blogs, and podcasts. Several chapters also examine the assessment and integration of new literacies. This volume will serve as a valuable resource for researchers, teachers, and students interested in exploring electronic discourse and new literacies in language learning and teaching.

Normative Conditions to Make WTO Law More Responsive to the Needs of Developing Countries Philipp Scheuermann, 2010

Definition of Serious and Complex Medical Conditions Institute of Medicine, Committee on Serious and Complex Medical Conditions, 1999-10-19 In response to a request by the Health Care Financing Administration (HCFA), the Institute of Medicine proposed a study to examine definitions of serious or complex medical conditions and related issues. A seven-member committee was appointed to address these issues. Throughout the course of this study, the committee has been aware of the fact that the topic addressed by this report concerns one of the most critical issues confronting HCFA, health care plans and providers, and patients today. The Medicare+Choice regulations focus on the most vulnerable populations in need of medical care and other services—those with serious or complex medical conditions. Caring for these highly vulnerable populations poses a number of challenges. The committee believes, however, that the current state of clinical and research literature does not adequately address all of the challenges and issues relevant to the identification and care of these patients.

Interpretable Machine Learning Christoph Molnar, 2020 This book is about making machine

learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression. Later chapters focus on general model-agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with Shapley values and LIME. All interpretation methods are explained in depth and discussed critically. How do they work under the hood? What are their strengths and weaknesses? How can their outputs be interpreted? This book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project.

Managing Water Resources in the West Under Conditions of Climate Uncertainty

National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Climate Uncertainty and Water Resources Management, 1991-02-01 The question of whether the earth's climate is changing in some significant human-induced way remains a matter of much debate. But the fact that climate is variable over time is well known. These two elements of climatic uncertainty affect water resources planning and management in the American West. *Managing Water Resources in the West Under Conditions of Climate Uncertainty* examines the scientific basis for predictions of climate change, the implications of climate uncertainty for water resources management, and the management options available for responding to climate variability and potential climate change.

Convention on Contracts for the International Sales of Goods (CISG)

Joseph Lookofsky, 2020-10-20 Also sometimes referred to as the Vienna Sales Convention, the Convention

on Contracts for the International Sale of Goods (CISG) regulates the rights of buyers and sellers in international sales. The Convention, which first entered into effect in 1988, is the first sales law treaty to win acceptance on a worldwide scale. The current list of more than 90 Contracting States accounts for more than three-fourths of all world trade. The importance of the CISG in the international arena is underlined by thousands of reported decisions where the CISG has been held to apply, thus evidencing the conduct of countless international traders who-by default or by express choice-regularly subject their sales contracts to the Convention regime. The CISG has also impacted on sales legislation at national and regional (e.g. EU) levels. With this monograph as their guide, lawyers and scholars who deal with international sales contracts and sales contract disputes will obtain an excellent overview of the Convention, as well as valuable information as to all its 101 Articles, compromising key topic areas such as the following: Determining when the CISG applies; Freedom of contract under Article 6; Interpretation of the Convention and of CISG contracts; Sales contract formation, validity, defences to enforcement; Obligations of the parties, including conforming delivery & notice of non-conformity; Liability and remedies for breach, including specific performance, damages, avoidance/termination; Liability exemptions; Reservations under Articles 92-96. The Third Edition of this IEL monograph takes account of the latest scholarly commentary as well as key CISG case law worldwide.

The Condition of Democracy Jürgen Mackert, Hannah Wolf, Bryan S. Turner, 2021-07-12

Recent years have seen contestations of democracy all around the globe. Democracy is challenged as a political as well as a normative term, and as a form of governance. Against the background of neoliberal transformation, populist mobilization, and xenophobic exclusion, but also of radical and emancipatory democratic projects, this collection offers a variety of critical and challenging perspectives on the condition of democracy in the 21st century. The volumes provide theoretical and empirical enquiries into the meaning and practice of liberal democracy, the erosion of democratic institutions, and the consequences for citizenship and everyday lives. With a pronounced focus on national and transnational politics and processes, as well as postcolonial and settler colonial contexts, individual contributions scrutinize the role of democratic societies, ideals, and ideologies of liberal democracy within global power geometries. By employing the multiple meanings of The Condition of Democracy, the collection addresses the preconditions of democratic rule, the state this form of governance is in, and the changing ways in which citizens can (still) act as the sovereign in liberal democratic societies. The books offer both challenging theoretical perspectives and rigorous empirical findings of how to conceive of democracy in our times, which will appeal to academics and students in social and political science, economics, and international relations amongst other fields. The focus on developments in the Middle East and North Africa will furthermore be of great usefulness to academics and the wider public interested in the repercussions of western democracy promotion as well as in contemporary struggles for democratization 'from below'. During the last 50 years, liberal democracies have been exposed to a fundamental reorganization of their politico-economic structure that transformed them through the impact of neo-liberal economic doctrines focused on low taxation, free markets, and out-sourcing that have little regard in reality for democratic institutions or liberal values. The failures of the neoliberal 'remedy' for capitalism are now dramatically obvious through the banking crisis of 2008-2011, the increase in income inequality, the social and psychological damage caused by the austerity packages across Europe, and widespread dependence on experts whose influence over government policies typically goes without public scrutiny. While this has only accelerated the destruction of the social fabric in modern Western societies, the dramatic redistribution of wealth and an open 'politics for the rich' have also revealed the long-time well-covered alliance of the global oligarchy with the Far Right that has the effect of undermining democracy. The contributions to this volume discuss a wide variety of processes of transformation, the social consequences, dedemocratization and illiberalization of once liberal democracies through the destructive impact of neoliberal strategies. These strongly politico-economic contributions are complemented with general sociological analyses of a number of cultural aspects often neglected in analyses of democracy.

Database and Expert Systems Applications Kim V. Andersen, John Debenham, Roland Wagner, 2005-09-14 DEXA 2005, the 16th International Conference on Database and Expert Systems Applications, was held at the Copenhagen Business School, Copenhagen, Denmark, from August 22 to 26, 2005. The success of the DEXA series has partly been due to the way in which it has kept

abreast of recent developments by spawning specialized workshops and conferences each with its own proceedings. In 2005 the DEXA programme was co-located with the 7th International Conference on Data Warehousing and Knowledge Discovery [DaWaK 2005], the 6th International Conference on Electronic Commerce and Web Technologies [EC-Web 2005], the 4th International Conference on Electronic Government [EGOV 2005], the 2nd International Conference on Trust, Privacy, and Security in Digital Business [TrustBus 2005], the 2nd International Conference on Industrial Applications of Holonic and Multi-agent Systems [HoloMAS 2005], as well as 19 specialized workshops. These proceedings are the result of a considerable amount of hard work. Beginning with the preparation of submitted papers, the papers went through the reviewing process. This process was supported by online discussion between the reviewers to determine the final conference program. The authors of accepted papers revised their manuscripts to produce this fine collection. DEXA 2005 received 390 submissions, and from those the Program Committee selected the 92 papers in these proceedings. This year the reviewing process generated more than 1000 referee reports. The hard work of the authors, the referees and the Program Committee is gratefully acknowledged.

Systems of Insight for Digital Transformation: Using IBM Operational Decision Manager Advanced and Predictive Analytics Whei-Jen Chen, Rajeev Kamath, Alexander Kelly, Hector H. Diaz Lopez, Matthew Roberts, Yee Pin Yheng, IBM Redbooks, 2015-12-03

Systems of record (SORs) are engines that generate value for your business. Systems of engagement (SOE) are always evolving and generating new customer-centric experiences and new opportunities to capitalize on the value in the systems of record. The highest value is gained when systems of record and systems of engagement are brought together to deliver insight. Systems of insight (SOI) monitor and analyze what is going on with various behaviors in the systems of engagement and information being stored or transacted in the systems of record. SOIs seek new opportunities, risks, and operational behavior that needs to be reported or have action taken to optimize business outcomes. Systems of insight are at the core of the Digital Experience, which tries to derive insights from the enormous amount of data generated by automated processes and customer interactions. Systems of Insight can also provide the ability to apply analytics and rules to real-time data as it flows within, throughout, and beyond the enterprise (applications, databases, mobile, social, Internet of Things) to gain the wanted insight. Deriving this insight is a key step toward being able to make the best decisions and take the most appropriate actions. Examples of such actions are to improve the number of satisfied clients, identify clients at risk of leaving and incentivize them to stay loyal, identify patterns of risk or fraudulent behavior and take action to minimize it as early as possible, and detect patterns of behavior in operational systems and transportation that lead to failures, delays, and maintenance and take early action to minimize risks and costs. IBM® Operational Decision Manager is a decision management platform that provides capabilities that support both event-driven insight patterns, and business-rule-driven scenarios. It also can easily be used in combination with other IBM Analytics solutions, as the detailed examples will show. IBM Operational Decision Manager Advanced, along with complementary IBM software offerings that also provide capability for systems of insight, provides a way to deliver the greatest value to your customers and your business. IBM Operational Decision Manager Advanced brings together data from different sources to recognize meaningful trends and patterns. It empowers business users to define, manage, and automate repeatable operational decisions. As a result, organizations can create and shape customer-centric business moments. This IBM Redbooks® publication explains the key concepts of systems of insight and how to implement a system of insight solution with examples. It is intended for IT architects and professionals who are responsible for implementing a systems of insights solution requiring event-based context pattern detection and deterministic decision services to enhance other analytics solution components with IBM Operational Decision Manager Advanced.
