Running Cultures John Bale,2004-06 Running is one of the world's most widely practised sports and recreations. This book 'reads between the lines' of both running and some of its textual and visual representations. It deals with the runner's body and also with the globalisation of running and its practitioners. Although it focuses mainly on serious running, it also examines alternative forms of the sport such as jogging. Drawing on a variety of sources including literature, poetry, art, sculpture, statistics and training manuals, Running Cultures breaks new ground in several ways. It introduces the work of the renowned humanist.

Emerging Technologies to Enhance Learning among Slow Learners Dr. R. Gnanadevan and Dr. R. Babu,

Beckett's Intuitive Spectator Michelle Chiang,2018-07-16 Beckett's Intuitive Spectator: Me to Play investigates how audience discomfort, instead of a side effect of a Beckett pedagogy, is a key spectatorial experience which arises from an everyman intuition of loss. With reference to selected works by Henri Bergson, Immanuel Kant and Gilles Deleuze, this book charts the processes of how an audience member's habitual way of understanding could be frustrated by Beckett's film, radio, stage and television plays. Michelle Chiang explores the ways in which Beckett exploited these mediums to reconstitute an audience response derived from intuition.

Abstract Machines Garin Dowd,2007 Abstract Machines: Samuel Beckett and Philosophy after Deleuze and Guattari is an innovative approach to the relationship of the work of Samuel Beckett to philosophy. The study seeks to combine intertextual analysis and a 'schizoanalytic genealogy' derived from the thought of Gilles Deleuze and Felix Guattari to explore a 'becoming-philosophy' of Beckett's literary writing. The author focuses on zones of encounter and confrontation - spaces and times of 'becoming' - between Beckett, selected philosophers and Deleuze and Guattari. In the retrospective glance occasioned by that part of Deleuze and Guattari's complex legacy which embraces their interest in the author, Beckett's writing in particular effectuates a threshold hesitation which can be seen directly to impact on their approach to the history of philosophy and on their contribution to its 'molecularization' in the name of experimentation. Abstract Machines, with its arresting perspectives on a wide range of Beckett's work, will appeal to academics and postgraduate students interested in the philosophical echoes so evident in his writing. The extent of its recourse to philosophers aside from Deleuze and Guattari, including, notably, Alain Badiou, renders it a timely and provocative intervention in contemporary debates concerning the relationship of literature to philosophy, both within Beckett studies and beyond.

Coastal Tourism, Sustainability, and Climate Change in the Caribbean, Volume II Martha Honey,Samantha Hogenson,2017-03-24 This second volume on coastal tourism and climate change in the Caribbean examines three key supporting sectors: golf, local agriculture and cuisine, and aviation. Today, climate change is propelling accelerated reforms in these three sectors. Initiatives to link local agriculture to tourism are enriching visitor experiences and revitalizing local crops and cuisine, while reducing the carbon impact-the food print-from agricultural imports. Similarly, golf certification programs are providing templates for constructing and operating courses with smaller carbon footprints. In aviation, as well, virtually all international airlines are testing non-fossil fuel alternatives, and a nascent but growing green airport movement is reducing aviation's carbon footprint and improving its resilience. As the volume concludes, coastal tourism in the Caribbean is today addressing two intertwined concerns and opportunities: the impacts of climate change and imperative of responsible tourism.

Slow Burn Stu Mittleman,Katherine Callan,2001-12-01 As America's foremost ultra-marathoner, Mittleman set eight long-distance records, incl. the world record for the 1,000-mile run -- in only 11 days! The experience expanded his belief of what is possible, and he began sharing his secrets of endurance with people from all walks of life. Now you can benefit from his extraordinary experiences and learn the principles of endurance in his 3-part program so you can go the distance and feel great doing it. You'll learn to: accomplish any goal in life by breaking it down into a series of small tasks; move aerobically every day to tap into your most inexhaustible reservoir of energy: fat; and eat not for short-term boosts but for sustainable, long-term health and vitality.

Beckett and Musicality Sara Jane Bailes,Nicholas Till,2016-04-15 Discussion concerning the 'musicality' of Samuel Beckett's writing now constitutes a familiar critical trope in Beckett Studies, one that continues to be informed by the still-emerging evidence of Beckett's engagement with music throughout his personal and literary life, and by the ongoing interest of musicians in Beckett's work. In Beckett's drama and prose writings, the relationship with music plays out in implicit and explicit ways. Several of his works incorporate canonical music by composers such as Schubert and Beethoven. Other works integrate music as a compositional element, in dialogue or tension with text and image, while others adopt rhythm, repetition and pause to the extent that the texts themselves appear to be 'scored'. But what, precisely, does it mean to say that a piece of prose or writing for theatre, radio or screen, is 'musical'? The essays included in this book explore a number of ways in which Beckett's writings engage with and are engaged by musicality, discussing familiar and less familiar works by Beckett in detail. Ranging from the scholarly to the personal in their respective modes of response, and informed by approaches from performance and musicology, literary studies, philosophy, musical composition and creative practice, these essays provide a critical examination of the ways we might comprehend musicality as a definitive and often overlooked attribute throughout Beckett's work.

Deleuze and Beckett S.E. Wilmer,Audronė Žukauskaitė,2016-01-12 Deleuze and Beckett is a collection of essays on specific aspects of the Deleuze and Beckett interface. Some of the world's leading Beckett and Deleuze specialists apply different concepts of Deleuzian philosophy to a wide range of Beckett's oeuvre, including his novels, short stories, and stage, film and television work.

Photosensitizers in Medicine, Environment, and Security Tebello Nyokong,Vefa Ahsen,2012-01-03 This book addresses the synthesis of photosensitizers, the main emphasis being on the new methods of synthesis such as microwave, sonochemistry and the use of ionic liquids. It also addresses the photochemistry and photophysics of the photosensitizers alone and in combination with nanoparticles, the use of the photosensitizers in environmental control, safety and medicine. It discusses the common structures of the photosensitizers which are beneficial to these applications.

Handbook of Latin American Studies Dolores Moyano Martin,1999-01-01 Beginning with volume 41 (1979), the University of Texas Press became the publisher of the Handbook of Latin American Studies, the most comprehensive annual bibliography in the field. Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines, the Handbook alternates from year to year between social sciences and humanities. The Handbook annotates works on Mexico, Central America, the Caribbean and the Guianas, Spanish South America, and Brazil, as well as materials covering Latin America as a whole. Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research under way in specialized areas. The Handbook of Latin American Studies is the oldest continuing reference work in the field. Dolores Moyano Martin, of the Library of Congress Hispanic Division, has been the editor since 1977, and P. Sue Mundell was assistant editor from 1994 to 1998. The subject categories for Volume 56 are as follows: ∑ Electronic Resources for the Humanities ∑ Art ∑ History (including ethnohistory) ∑ Literature (including translations from the Spanish and Portuguese) ∑ Philosophy: Latin American Thought ∑ Music

Web Design for Libraries Charles P. Rubenstein,2014-08-28 Having a clear, attractive, and easy-to-navigate website that allows users to quickly find what they want is essential for any organization—including a library. This workbook makes website creation easy—no HTML required. This book teaches all of the essentials for designing and creating a simple, professional-looking website for any library. By using cut-and-paste templates from familiar software programs, readers can create complex websites in short

order—without learning confusing HTML coding. Three final chapters cover using style sheets, address the potential benefits of HTML5, and overview content management system based websites. By using this guidebook as a reference, even those without previous knowledge about web design will possess enough basic information to create a great web page—and, with a little practice, prepare a full library website.

Running Injury Free Allen Leigh,
Directory of Web Sites Graham Bennett,1999 Overloaded with the mass of information on the Internet? Frustrated by how difficult it is to find what you really want? Now you don't need to spend hours browsing around the Internet or grappling with the huge number of hits from an Internet search engine: the Directory of Web Sites will take you straight to the best educational sites on the Internet. From archaeology to zoology, from dance to technology, the Directory provides information more than 5,500 carefully selected Web sites that represent the best of what the Internet has to offer. The sites are grouped by subject; each one features a full description; and the text is complemented throughout by screenshots and fact boxes. As well, sites have been selected purely on educational merit: all sites with overtly commercial content and influence from Internet providers have been excluded.

Economics of Betting Markets David Peel,2013-09-13 During the last few decades, commercial gambling has increased substantially throughout the Western world. More people than ever before have access to sources of legalised gambling, leading to bumper revenues for the institutions involved. Naturally enough, this has led to an increased interest in the area of the economics of betting. This book addresses the issues raised by the continued growth of the gambling sector. How can we model the behaviour of people who seemingly act irrationally? What are the implications of different tax policies with regard to gambling? Are casinos capable of taking money away from state-run lotteries and the causes they fund? Can bookmakers' odds be influenced in such a way as to make the gambling market inefficient? The authors in this volume provide insights based on data from many different countries, including England, the USA, Australia, Spain and Cyprus. This volume brings together work which addresses the economic impact of the huge growth of commercial gambling in the Western world, as well as trying to model the cognitive processes which can explain why individuals are prepared to behave in such apparently irrational ways. This book was published as a special issue of Applied Economics. The academic editor of this journal is Mark P. Taylor.
