Running Cultures John Bale, 2004-06 Running is one of the world's most widely practised sports and recreations. This book 'reads between the lines' of both running and some of its textual and visual representations. It deals with the runner's body and also with the globalisation of running and its practitioners. Although it focuses mainly on serious running, it also examines alternative forms of the sport such as jogging. Drawing on a variety of sources including literature, poetry, art, sculpture, statistics and training manuals, *Running Cultures* breaks new ground in several ways. It introduces the work of the renowned humanist.

Emerging Technologies to Enhance Learning among Slow Learners Dr. R. Gnanadevan and Dr. R. Babu,

Coastal Tourism, Sustainability, and Climate Change in the Caribbean, Volume II Martha Honey, Samantha Hogenson, 2017-03-24 This second volume on coastal tourism and climate change in the Caribbean examines three key supporting sectors: golf, local agriculture and cuisine, and aviation. Today, climate change is propelling accelerated reforms in these three sectors. Initiatives to link local agriculture to tourism are enriching visitor experiences and revitalizing local crops and cuisine, while reducing the carbon impact-the food print-from agricultural imports. Similarly, golf certification programs are providing templates for constructing and operating courses with smaller carbon footprints. In aviation, as well, virtually all international airlines are testing non-fossil fuel alternatives, and a nascent but growing green airport movement is reducing aviation's carbon footprint and improving its resilience. As the volume concludes, coastal tourism in the Caribbean is today addressing two intertwined concerns and opportunities: the impacts of climate change and imperative of responsible tourism.

Intranet Performance Management Kornel Terplan, 2022-01-27 To avoid serious

bottlenecks, components of the Internet and of intranets-such as servers, browsers, and the access networks-must be properly designed, implemented, managed, and monitored. Beginning with the basics, Intranet Performance Management sets forth the standards, methods, and tools that can simplify and unify systems and network management, avoid the seemingly inherent problems associated with them, and contain costs. In this book, world reknowned expert Kornel Terplan addresses: Proactive server, browser, and access network monitoring Managing and authoring home page content Traffic management and load balancing in the access networks Reviewing and evaluating usage statistics using log files These tasks-essential to the success of an intranet-require the active and diligent work of the management team. Effective performance of these tasks allows for the use of inexpensive browsers, facilitates education, and improves Internet culture and scalability.

Converging Evidence Doris Schönefeld, 2011 The volume argues for the use of multi-methodological strategies in linguistic research. In its lead chapter, in addition, the thorny issue of phenomenological pluralism is explored in detail. From a usage-based perspective, the individual chapters demonstrate methodological pluralism in the investigation of meaning, language acquisition, and discourse. The chapters report on studies in which the use of corpus data is combined with other methodological tools, e.g. experimentally elicited findings, showing how introspection and the analysis of performance data go hand in hand to provide empirical support for researchers hypotheses. Some of the authors inspire the discussion in usage-based linguistics, proposing innovative methods of analysis. Others adopt such methods and combine them in original ways. The cutting-edge studies presented in this volume should be of great interest to scholars and students of cognitive and corpus linguistics who want to familiarize themselves with recent methodological advances and their applications in the field.
