*Raising Capital* David E. Vance,2005-04-20 Most small businesses cite lack of capital is a major constraint on growth. Raising Capital focuses on non-bank sources of capital since banks only lend to companies that fit a very narrow profile. The topics covered include: (i) capital sources entrepreneurs can tap when they are too small or unusual for banks, (ii) angel investors and venture capital, (iii) where to look for angels, venture capitalists and other capital sources, (iv) how to pitch your company and close the deal, (v) deal terms and issues that arise when negotiating a deal, (vi) going public through an IPO or little known small public offerings, (viii) asset based lenders, and (ix) other financing vehicles including: bond, commercial paper, PIPEs and securitization. The scope of the book ranges from capital for entrepreneurs who have little more than an idea, to capital for top rated companies.

*Comparative Risk Assessment and Environmental Decision Making* Igor Linkov, Abou Bakr Ramadan, 2006-03-02 Decision making in environmental projects is typically a complex and confusing process characterized by trade-offs between socio-political, environmental, and economic impacts. Comparative Risk Assessment (CRA) is a methodology applied to facilitate decision making when various activities compete for limited resources. CRA has become an increasingly accepted research tool and has helped to characterize environmental profiles and priorities on the regional and national level. CRA may be considered as part of the more general but as yet quite academic field of multi-criteria decision analysis (MCDA). Considerable research in the area of MCDA has made available methods for applying scientific decision theoretical approaches to multi-criteria problems, but its applications, especially in environmental areas, are still limited. The papers show that the use of comparative risk assessment can provide the scientific basis for environmentally sound and cost-efficient policies, strategies, and solutions to our environmental challenges.

**Mapping the Chemical Environment of Urban Areas** Christopher C. Johnson, Alecos Demetriades, Juan Locutura, Rolf Tore Ottesen, 2011-02-11 This comprehensive text focuses on the increasingly important issues of urban geochemical mapping with key coverage of the distribution and behaviour of chemicals and compounds in the urban environment. Clearly structured throughout, the first part of the book covers general aspects of urban chemical mapping with an overview of current practice and reviews of different aspects of the component methodologies. The second part

includes case histories from different urban areas around Europe authored by those national or academic institutions tasked with investigating the chemical environments of their major urban centers.

*The Practical Handbook of Perioperative Metabolic and Nutritional Care* M. Isabel T.D Correia, 2019-06-25 Intended for any healthcare professional working with surgical patients, including medical students, residents, surgeons and internists, nurses, dietitians, pharmacists, and physical therapists, The Practical Handbook of Perioperative Metabolic and Nutritional Care focuses on topics from the history of surgery and metabolism, to organic response to stress. Based on clinical processes, the author explores screening, assessment, and the impact of nutritional status on outcomes, in addition to investigating nutritional requirements, including macronutrients and micronutrients. Chapters examine wound healing as well as metabolic and nutritional surgical preconditioning, including coverage of preoperative counseling, preoperative nutrition, and preoperative fasting. Physical exercise is addressed, as well as nutritional therapy in the form of oral supplements, and enteral and parenteral approaches. Additional topics explored include nutrition therapy complications and immunomodulatory nutrients, probiotics, pre and probiotics, postoperative oral, enteral and parenteral nutrition, enteral access, vascular access, fluid therapy, and more. With up-to-date information, practical and cost-effective data, this resource is critical for translating theory to practice. Focuses on preoperative metabolic and nutritional preparation for surgery. Explores processes for intra and postoperatively assessing metabolic and nutritional state to ensure patient progress. Contains content based on clinical process

**Decision Support for Natural Disasters and Intentional Threats to Water Security** Tissa Illangasekare, Katarina Mahutova, John J. Barich, 2009-06-04 The NATO Advanced Research Workshop, "Decision Support for Natural Disasters and Intentional Threats to Water Security" was the result of close collaboration between environmental, security, water resource, and health officials in the United States and Croatia. The premise of the Workshop is that multiple, disparate threats to water security exist, and that shared decision support structures provide effective means for avoiding and responding to potential or actual situations. The Workshop was co-directed by Professors Tissa Illangasekare of the Colorado School of Mines, and Dragutin Geres of Hrvatske vode. The Workshop was organized into a series of case studies, presentation of management tools, or a combination of the two. Presentations were further organized as to (1) Natural Occurrences, (2) Anthropogenic Causes, and (3) Decision Support Tools. Delegates from eleven countries assembled to explore these topics at the Hotel Dubrovnik President in Dubrovnik from April 22–25, 2007. A total of thirty delegates from NATO, Partner, Mediterranean Dialog, or

other countries were in attendance. The final program included technical sessions using a presentation and dialog format, a field trip, and networking sessions. There were twenty five technical presentations supported by seventeen formal papers (many updated in late-2008 and 2009), and these form the basis for these proceedings. xi  
ACKNOWLEDGEMENTS The co-directors and organizers of this Advanced Research Workshop acknowledge the NATO Science Programme for major financial support and for providing detailed guidance on how best to organize and execute a meeting of this nature.

*Hidden Addictions* Marilyn Freimuth, 2009-03-19 Media portrayals and diagnostic criteria convey an image of an addicted person as someone whose deficient coping skills and severely compromised functioning are readily apparent. Yet addictions remain some of the most frequently missed diagnoses in health and mental health care settings. This occurs, in large part, because most people with addictions do not fit the stereotype. In the context of psychotherapy, the typical patient with an addiction will present depression, anxiety, marital problems or a general sense that life is not working. This book addresses how addictions can be recognized more often and accurately assessed in the context of psychotherapy. Along with learning about the standard assessment instruments, the reader is introduced to methods for asking the appropriate questions and listening to the clinical dialogue for signs of a undisclosed addiction. This book provides a great deal of knowledge about addictions and their assessment in a way that is relevant to clinical practice.

The Zuckerman Parker Handbook of Developmental and Behavioral Pediatrics for Primary Care Marilyn Augustyn, Barry S. Zuckerman, Elizabeth B. Caronna, 2010-09-29 The thoroughly updated Third Edition of this popular handbook provides practical guidance on diagnosing and treating children with developmental and behavioral problems in the primary care setting. Chapters written in outline format address topics ranging from everyday problems such as biting and social avoidance to serious and complex psychiatric disorders such as anorexia and depression. This edition includes new chapters on dealing with difficult child behavior in the office; alternative therapy for autism spectrum disorders; treatment of autism spectrum disorders; oppositional defiant disorder; bilingualism; health literacy; incarcerated parents; and military parents. Recommended readings for physicians and parents are included. A companion website includes the fully searchable text.

*The Handbook of Genetics & Society* Paul Atkinson, Peter Glasner, Margaret Lock, 2009-07-02 An authoritative Handbook which offers a discussion of the social, political, ethical and economic consequences and implications of the new bio-sciences. The Handbook takes an interdisciplinary approach providing a synoptic overview of contemporary international social science research on genetics, genomics and the new life sciences. It brings together leading scholars with expertise across a wide-ranging spectrum of research fields related to the production, use, commercialisation and regulation of genetics knowledge. The Handbook is structured into seven cross-cutting themes in contemporary social science research on genetics with introductions written by internationally renowned section editors who take an interdisciplinary approach to offer fresh insights on recent developments and issues in often controversial fields of study. The Handbook explores local and global issues and

critically approaches a wide range of public and policy questions, providing an invaluable reference source to a wide variety of researchers, academics and policy makers.
