Facing Global Environmental Change Hans Günter Brauch,Navnita Chadha Behera,Patricia Kameri-Mbote,John Grin,Úrsula Oswald Spring,Béchir Chourou,Czeslaw Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally. Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth - sessment Report (AR4) of the Intergovernmental Panel on Climate Change (IPCC), which were disseminated on a large scale and reported extensively by the media. This was the result not only of a heightened interest on the part of the public on various aspects of climate change, but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large. The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US, Al Gore. By taking this decision in favour of a leader who has done a great deal to create awareness on c- mate change, and a body that assesses all scientific aspects of climate change and disseminates the result of its findings, the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world.

Transnational Islam and Regional Security Frederic Volpi,2013-09-13 This volume investigates the impact of a new brand of transnational terrorism and political violence produced by radical Islamist groups from the Maghreb on the regional security dynamics. It describes the causes of the problems and the strategies devised by European and North African states in order to address it and details the successes and failures of co-operation between states and society on both shores of the Mediterranean. Investigating the grand security strategies that have been devised for the Mediterranean after the Cold War and after 9/11, the contributors focus on the role of police and military apparati in securitizing the new threats that have become prominent after 9/11, and the unintended consequences of these strategies. In addition, the contributors analyze the relationship between Islamist groups, the state and society and highlight some key causes of political violence and radicalism. They outline how a better use of the law, migration, and intercultural dialogue might provide useful alternatives or complements to the mostly securitarian strategies that are currently dominant in the region.

Japan's Remilitarisation Christopher W. Hughes,2017-10-03 Is Japan on a path towards assuming a greater military role internationally, or has the recent military normalisation ground to a halt since the premiership of Junichiro Koizumi? In this book, Christopher W. Hughes assesses developments in defence expenditure, civilmilitary relations, domestic and international militaryindustrial complexes, Japans procurement of regional and global power-projection capabilities, the expansion of USJapan cooperation, and attitudes towards nuclear weapons, constitutional revision and the use of military force. In all of these areas, dynamic and long-term changes outweigh Japans short-term political logjam over security policy. Hughes argues that many post-war constraints on Japans military role are still eroding, and that Tokyo is moving towards a more assertive military role and strengthened USJapan cooperation. Japans remilitarisation will boost its international security role and the dominance of the USJapan alliance in regional and global security affairs, but will need to be carefully managed if it is not to become a source of destabilising tensions.

Googling Security Greg Conti,2009 What Does Google Know about You? And Who Are They Telling? When you use Google's free services, you pay, big time-with personal information about yourself. Google is making a fortune on what it knows about you...and you may be shocked by just how much Google does know. Googling Security is the first book to reveal how Google's vast information stockpiles could be used against you or your business-and what you can do to protect yourself. Unlike other books on Google hacking, this book covers information you disclose when using all of Google's top applications, not just what savvy users can retrieve via Google's search results. West Point computer science professor Greg Conti reveals the privacy implications of Gmail, Google Maps, Google Talk, Google Groups, Google Alerts, Google's new mobile applications, and more. Drawing on his own advanced security research, Conti shows how Google's databases can be used by others with bad intent, even if Google succeeds in its pledge of don't be evil. Uncover the trail of informational bread crumbs you leave when you use Google search How Gmail could be used to track your personal network of friends, family, and acquaintances How Google's map and location tools could disclose the locations of your home, employer, family and friends, travel plans, and intentions How the information stockpiles of Google and other online companies may be spilled, lost, taken, shared, or subpoenaed and later used for identity theft or even blackmail How the Google AdSense and DoubleClick advertising services could track you around the Web How to systematically reduce the personal information you expose or give away This book is a wake-up call and a how-to self-defense manual: an indispensable resource for everyone, from private citizens to security professionals, who relies on Google. The United Nations World Water Development Report 3 World Water Assessment Programme,2012-05-23 The United Nations World Water Development Report, published every three years, is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind, resulting from the collaboration and contributions of the 26 UN agencies, commissions, program, funds, secretariats and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises - in climate change, energy and food and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they

may lead to increasing political insecurity and conflict. Water is required to meet our fundamental needs and rising living standards and to sustain our planet's fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development and technological change. Adding complexity and risk is climate change, with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows how some countries have responded. Progress in providing drinking water is heartening, with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed, and after decades of inaction, the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector and civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now! E-Commerce Security Anup K. Ghosh, 1998-02-04 This is a very important book . . . mandatory reading for anyone thinking about getting into e-commerce. -Peter G. Neumann Moderator of the Risks Forum and author of Computer Related Risks The World Wide Web is changing the way the world engages in business. With this paradigm shift comes uncertainty about how secure e-commerce transactions are over an inherently insecure medium-the Internet. Businesses have learned the hard way that there is no silver bullet solution-not encryption, not firewalls, not even secure protocols. Like a chain, the security of e-commerce is only as strong as its weakest link. Written by security expert Anup K. Ghosh, E-Commerce Security highlights the weak links and provides best defenses for individuals and enterprises connected to the Internet. This valuable guide addresses vulnerabilities in four essential components of electronic commerce-the data transport protocol, Web server, Web clients, and the network server operating system. E-Commerce Security: * Exposes the dangers of new Internet innovations in today's Web browsers, including push technology and desktop integration with the Internet * Methodically explains the dangers of active content programs downloaded from Web sites, such as Java applets, ActiveX controls, and JavaScript * Provides a comparison of different secure protocols for e-commerce, including digital cash protocols used in smart cards * Presents security considerations for Web servers, online databases, and server-side application software * Details shortcomings in firewall technology and other host security measures. Information Resources in Toxicology, Volume 1: Background, Resources, and Tools Steve Gilbert, Asish Mohapatra, Sol Bobst, Antoinette Hayes, Sara T. Humes, 2020-05-16 This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles Includes chapters with an emphasis on format such as government reports, general interest publications, blogs, and audiovisuals Explores recent internet trends, web-based databases, and software tools in a section on the online environment Concludes with a miscellany of special topics such as laws and regulations, chemical hazard communication resources, careers and professional education, K-12 resources, funding, poison control centers, and patents Paired with Volume Two, which focuses on global resources, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field

Arms Control and Cooperative Security Jeffrey Arthur Larsen, James J. Wirtz, 2009 Reflecting the current debate about the value of traditional arms control in today's security environment, Arms Control and Cooperative Security thoroughly covers this complex topic. The authors critically review the historical record, highlight recent changes in the security arena, and consider the likelihood of new arms control agreements. Throughout, the discussion is presented in the context of international relations theory. The result is a comprehensive assessment of the present state and likely future of arms control and cooperative security, especially relevant as many of the treaties crafted during the Cold War are nearing their expiration dates. -- Description from <http://www.booktopia.com.au> (Jan. 25, 2012).

State Consent to Foreign Military Intervention during Civil Wars Seyfullah Hasar, 2022-04-04 Examining the legality of foreign military intervention in internal conflicts with the consent of the government, this book analyses a to-the-point account of post-Cold War State practice with more than 45 incidents of such interventions on a scale neglected in current scholarship.
