Obesity Interventions in Underserved Communities Virginia M. Brennan, Shiriki K. Kumanyika, Ruth Enid Zambrana, 2014-12-08 Groundbreaking approaches to preventing and reducing obesity among minority, low-income, and other medically underserved communities in the United States. The obesity epidemic has a disproportionate impact on communities that are hard-hit by social and economic disadvantages. In *Obesity Interventions in Underserved Communities*, a diverse group of researchers explores effective models for treating and preventing obesity in such communities. The volume provides overviews of the literature at specific junctures of society and health (e.g., the effectiveness of preschool obesity prevention programs), as well as commentaries that shape our understanding of particular parts of the obesity epidemic and field reports on innovative approaches to combating obesity in racial/ethnic minority and other medically underserved populations in the United States. Authors make specific recommendations to policy makers which are designed to reverse the rising rate of obesity dramatically. The thirty-one literature reviews, commentaries, and field reports collected here address obesity prevention and treatment programs implemented across a spectrum of underserved populations, with particular attention paid to children and adolescents. Aimed at students, clinicians, and community workers in public health and health policy, as well as family medicine and pediatrics, sociology, childhood education, and nutrition—and deeply informed by fieldwork—this book demonstrates the importance of taking a full contextual view, both historical and current, when considering the challenge of reversing upward obesity trends among ethnic minorities, impoverished people, and other underserved populations.

The Beijing Consensus? Weitseng Chen, 2017-04-27 Is there a distinctive Chinese model for law and economic development? In *The Beijing Consensus* scholars turn their collective attention to answer this basic but seemingly under-explored question as China rises higher in its global standing. Advancing debates on alternative development programs, with a particular focus on social and political contexts, this book demonstrates that essentially, no model exists. Engaging in comparative studies, the contributors create a new set of benchmarks to evaluate the conventional wisdom that the Beijing Consensus challenges and that of the Beijing Consensus itself. Has China demonstrated that the best model is in fact no model at all? Overall, this title equips the reader with an understanding of the conclusions derived from China's experience in its legal and economic development in recent decades.

Leaders General Stanley McChrystal, Jeff Eggers, Jay Mangone, 2018-10-23 An instant national bestseller! Stanley McChrystal, the retired US Army general and bestselling author of *Team of Teams*, profiles thirteen of history's great leaders, including Walt Disney, Coco Chanel, and Robert E. Lee, to show that leadership is not what you think it is—and never was. Stan McChrystal served for thirty-four years in the US Army, rising from a second lieutenant in the 82nd Airborne Division to a four-star general, in command of all American and coalition forces in Afghanistan. During those years he worked with countless leaders and pondered an ancient question: “What makes a leader great?” He came to realize that there is no simple answer. McChrystal profiles thirteen famous leaders from a wide range of eras and fields—from corporate CEOs to politicians and revolutionaries. He uses their stories to explore how leadership works in practice and to challenge the myths that complicate our thinking about this critical topic. With Plutarch's *Lives* as his model, McChrystal looks at paired sets of leaders who followed unconventional paths to success. For instance. . . · Walt Disney and Coco Chanel built empires in very different ways. Both had public personas that sharply contrasted with how they lived in private. · Maximilien Robespierre helped shape the French Revolution in the eighteenth century; Abu Musab al-Zarqawi led the jihadist insurgency in Iraq in the twenty-first. We can draw surprising lessons from them about motivation and persuasion. · Both Boss Tweed in nineteenth-century New York and Margaret Thatcher in twentieth-century Britain followed unlikely roads to the top of powerful institutions. · Martin Luther and his future namesake Martin Luther King Jr., both local clergymen, emerged from modest backgrounds to lead world-changing movements. Finally, McChrystal explores how his former hero, General Robert E. Lee, could seemingly do everything right in his military career and yet lead the Confederate Army to a devastating defeat in the service of an immoral cause. Leaders will help you take stock of your own leadership, whether you're part of a small team or responsible for an entire nation.

The Trumping of America Pamela Hines,2018-08 Trump alone is not to blame... How does it reflect on North American societal values when wealth trumps humanity, selfish individualism trumps compassion, the need to be entertained and to win trumps the truth, and racism and misogyny are rewarded with the most powerful position in the world? The political rise of Donald Trump, from the cutthroat Republican primary process to his move to the White House, has ushered in a new age of politics in the United States. This is a comprehensive analysis of the events surrounding the 2016 presidential election and the unprecedented first year of Donald Trump’s presidency. Pamela Hines highlights the growing distortion of American democracy, which threatens political systems around the world. As a Canadian living just across the border, Hines provides a unique perspective on the international impact of the election; explores the roles of religion, racism, nationalism, and gender bias; and critiques the media and its reckless coverage of Trump’s ascension. The Trump presidency is a wake-up call to citizens of the free world. Democracy is at risk, yet power remains in the hands of the people. This assault on democracy can be curtailed only if voters make informed decisions and understand the consequences of their choices—while they still have the right to choose.

The practical guide to Total Financial Freedom: Volume 3 , Make Ours Marvel Matt Yockey,2017-06-13 The creation of the Fantastic Four effectively launched the Marvel Comics brand in 1961. Within ten years, the introduction (or reintroduction) of characters such as Spider-Man, the Hulk, Iron Man, Captain America, and the X-Men catapulted Marvel past its primary rival, DC Comics, for domination of the comic book market. Since the 2000s, the company’s iconic characters have leaped from page to screens with the creation of the Marvel Cinematic Universe, which includes everything from live-action film franchises of Iron Man and the Avengers to television and streaming media, including the critically acclaimed Netflix series Daredevil and Jessica Jones. Marvel, now owned by Disney, has clearly found the key to transmedia success. Make Ours Marvel traces the rise of the Marvel brand and its transformation into a transmedia empire over the past fifty years. A dozen original essays range across topics such as how Marvel expanded the notion of an all-star team book with The Avengers, which provided a roadmap for the later films, to the company’s attempts to create lasting female characters and readerships, to its regular endeavors to reinvigorate its brand while still maintaining the stability that fans crave. Demonstrating that the secret to Marvel’s success comes from adeptly crossing media boundaries while inviting its audience to participate in creating Marvel’s narrative universe, this book shows why the company and its characters will continue to influence storytelling and transmedia empire building for the foreseeable future.

Regulating to Disaster Diana Furchtgott-Roth,2012-09-25 What is a “green job” anyway? Few can adequately define one. Even the government isn’t sure, you will learn in these pages. Still, President Obama and environmentalist coalitions such as the BlueGreen Alliance claim the creation of green jobs can save America’s economy, and are worth taxpayers’ investment. But in *Regulating to Disaster*, Diana Furchtgott-Roth debunks that myth. Instead, energy prices rise dramatically and America’s economic growth and employment rate suffer — in some states much more than others — when government invests in nonviable ventures such as the bankrupted Solyndra, which the Obama Administration propped up far too long. Electric cars, solar energy, wind farms, biofuels: President Obama’s insistence on these dubious pursuits ultimately hamstring American businesses not deemed green enough, and squeezes struggling households with regulations. Adding insult to injury: the technology subsidies Americans pay for solar panels, wind turbines, and electric batteries really help create manufacturing jobs in China and South Korea. Green jobs are the most recent reappearance of a perennial bad idea — government regulation of certain industries, designed to anoint winners and losers in the marketplace. *Regulating to Disaster* reveals the powerful nexus of union leaders, environmentalists, and lobbyists who dreamed up these hoaxes, and benefit politically and financially from green jobs policies. Unfortunately, there are more Solyndras on the horizon, and our economy is in no shape to absorb them.
