99 Jumpstarts for Kids' Science Research Peggy Whitley,Susan Williams Goodwin,2005-12-30 This third entry in the Jumpstarts series focuses on Science topics for upper elementary and middle school students. Maintaining the 99 Jumpstarts format of the two previous books, 99 Jumpstarts for Kids Science Research is divided into ten broad topical sections. Each topic is arranged in alphabetical order under its section. Topics include Body Parts, Energy, Animals, Heavens, Weather, Matter, Medicine, Technology, Environment, and Geology. This pathfinder approach aides students in the research process, helping them define important terms, offer beginning questions to help narrow their topic, furnish source ideas and some fun activities to explore each topic. Sleep Ida Gavrilovna Karmanova,Genrikh A. Oganesyan,1999 Sleep: Evolution and Disorders, published for the first time in English, follows the origin and evolution of the sleep-waking cycle in vertabrates from a presented theoretical background influenced by Darwin's theory of evolution, L. Orbeli's model of functional evolution, and S. Davidenkov's hypothesis of conditioned tropism. The authors utilize the concept of dissolution of brain function first suggested by J. Jackson to consider disturbances in the wake-sleep cycle in humans in terms of genetic brain pathologies, including narcolepsy, catalepsy, epilepsy, and Tourette's disease in terms of the origin and evolution of sleep in vertebrates. They point out that sleep in certain pathological conditions of humans represents a passive defense behavior similar to such normal animal states as hibernation and hypnotic sleep phases using vast experimental data obtained on all classes of vertebrates. The results obtained provide great insight into some sleep pathologies in humans for anyone working with, or interested in sleep disorders.

At overleve undergang - en mosaik af eksistensens stemninger - le Berthélaine,2022-11-02 Uddrag fra del I: Byen Prolog: Alle folk har et liv, det er deres enestående, unikke liv. Det føler de. Ingen andre er centrum i deres liv som de: kun jeg er mig - og jeg er særlig. Det er parolen. Det er individets slagord. Det er en schlager, tænker jeg. Se mig, se mig! siger de. Ikke højlydt, men det runger alligevel ud over ruinmarkerne. Verden optæller milliarder af enkeltmennesker, af myrer, de kravler af sted, gør deres gerning. Arbejdsmyrer. De er flittige. De løber mellem hinanden, bærer, kravler - hen over hinanden - de tisser. Det kræves. Altid i bevægelse. For sig. Solo. En myretue er et fascinerende syn, så megen mylder, så mange tusinder, et virvar intet menneskeligt intellekt kan finde hoved eller hale i, krydsende, frem og tilbage - dog altid hen imod et fælles mål. Den samlede tues vel og overlevelse. Mennesker har to ben og går oprejst. De er mere udviklede,

siger evolutionsbiologer. Hvad gør de med disse to ben? tænker jeg. De spankulerer rundt i deres egen lilleputhistorie, deres enestående fortælling, hvor de nyder at være midtpunkt: Her hersker jeg. Dette er min beretning. Jeg er hovedpersonen og dette territorium er mit - mit! Passage 6 - Det er ikke det værste ... jeg... - Carl, se på mig! Det gjorde du ikke. Det gjorde du bare ikke! - Desværre, jeg fortalte om vores togt ... og om... - Åh nej! - Jeg forsøgte at undgå det, men hun havde gennemskuet mig. Hun vidste, at noget var hændt, og jo mere jeg benægtede, des mere mistroisk blev hun ... til sidst lød det løgnagtigt selv i mine egne ører. De tre brede trin fejler jeg aldrig ... Passage 8 De glaner vinduet. Jeg med. På frosten og de udeblevne trækfugle. De ser gennem vinduet. Og? - hvad ser vi egentligt? Det vore øjne ser, eller det vi ønsker at se, når vi ser gennem vore øjne, i al forfængelighed. ... I al forgængelighed, tilføjer De. Intelligent. ... Jeg må først, - jo tak. Jeg skuer havari og henstand, sønderskudte mure og menneskehed. ... Altså en almindelig søndag morgen,- netop, når en menneskeuge. Efter mange år. Passage 9 De og Jeg taler om intimitet, slibrigheder og hjerteblod, og nu ... skal jeg bløde, siger De, bogfører jeg. ... Jeg misforstår? - det er ikke nødvendigvis mig, der skal bløde, men en eller anden! - herligt, så er De havnet det rette sted, hold Dem tæt. Passage 21 Han holder armene ud for sin æres skyld. Vifter, vipper, tipper ... woow ... usikkerhed, som er en sikkerhed, man ikke skal omgås uforsigtig.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Do One Green Thing Mindy Pennybacker,2014-04-22 If you can only read and reference one green thing, make it this book: an easily comprehensible, clearly presented source for green living and conservation. Everything you need to know is right here at your fingertips. Unlike a lot of other overwhelming environmental guides on the market, this is green decision making in bite sized pieces. With chose it/lose it comparisons throughout, now it's simple to figure out it's worth switching to a green detergent, what kind of plastic your sports bottle is made of, or which fish is safest to eat. Rather than spending time trying to figure out how best to conserve, recycle, and protect the environment, use this book and devote that time to making the difference.

The application of multiple computational intelligence technologies such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., aims to support human and other collective intelligence and to create new forms of CCI in natural and/or artificial systems. This fourth issue contains a collection of 6 articles selected from high-quality submissions. The first paper of Ireneusz Czarnowski entitled Distributed Learning with Data Reduction consists of 120 pages and has a monograph chracter. Towards Green ICT Ramjee Prasad,Shingo Ohmori,Dina Simunic,2022-09-01 ICT is playing an increasingly important role in both business and individual's private life. It has increased international interconnectedness and speed up the process of globalization. But on the other side the total energy consumption by the communication and networking devices and the relevant global CO emission is increasing exponentially. ICT has, in many ways, a vital role to play. It accounts for about two percent of global CO emissions. Telecommunications applications can have a direct, tangible impact on lowering greenhouse gas emissions, power consumption, and achieve efficient recycling of equipment waste.This book is the outcome of the special session on Green Communications at 'The 12th International Symposium on Wireless Personal Multimedia Communications' (WPMC) held in September '09 in Sendai, Japan. To the best of the editors' knowledge this is the first book on the Green Information and Communication Technologies (ICT) and can be considered a milestone and a key-tool aimed at driving the industrial, scientific and academic efforts of the international community to guarantee a greener future to the whole planet.
