Emerging Technologies to Enhance Learning among Slow Learners Dr. R. Gnanadevan and Dr. R. Babu,

Interesting Answers Ryan McCain, 2023-01-30 I created my Interesting Answers website a few years back as a place to concisely answer those bizarre and random questions that pop into your head throughout the day that aren't important enough to write down and research later. For example: -Is there an Old Zealand? -How many people live in Antarctica? -Do insects get fat? -How many songs did Elvis Presley record? -Was Colonel Sanders a real military colonel? -Why can't I tickle myself? -Who is General Tso and why is chicken named after him?and over 100 other interesting questions and answers! The answers to these fun questions and random trivia is what makes up this book. I'm a very curious person and strange random questions like these constantly pop into my head while I'm driving, showering, etc. Since they weren't questions that affect my life, I never would get the answers to them. One day, I finally decided to start making a note of these strange random questions and document my findings on Interesting Answers. The website and this book are safe for all ages! I got annoyed with the answers I found on other websites because they would spend so much time not answering the question just to increase the amount of time people spend on their web page. I took a different approach. My entire goal was to answer the question as concisely as possible and give just a little bit of background information for context purposes but not get too wordy. If you want long-winded answers, this is not the book for you. If you want a book that gets to the point while still providing context and background information, then this IS the book for you. If you are a trivia buff, this is the book for you! If you have a friend that is a trivia buff, this book would make a great gift! If you want an interesting coffee table or bathroom reader, this is the book for you! :) I updated my site for a few years and now have nearly 200 questions. This book will be the first volume. If this book sells enough, I will put together a second volume in the coming months. Hopefully, you have as much fun reading the answers to these bizarre questions as I did discovering them.

Beckett's Intuitive Spectator Michelle Chiang, 2018-07-16 Beckett's Intuitive Spectator: Me to Play investigates how audience discomfort, instead of a side effect of a Beckett pedagogy, is a key spectatorial experience which arises from an everyman intuition of loss. With reference to selected works by Henri Bergson, Immanuel Kant and Gilles Deleuze, this book charts the processes of how an audience member's habitual way of understanding could be frustrated by Beckett's film, radio, stage and television plays. Michelle Chiang explores the ways in which Beckett exploited these mediums to reconstitute an audience response derived from intuition.

Human and National Security Derek S. Reveron, Kathleen A. Mahoney-Norris, 2018-08-23 Deliberately challenging the traditional, state-centric analysis of security, this book focuses on subnational and transnational forces—religious and ethnic conflict, climate change, pandemic diseases, poverty, terrorism, criminal networks, and cyber attacks—that threaten human beings and their communities across state borders. Examining threats related to human security in the modern era of globalization, Reveron and Mahoney-Norris argue that human security is national security today, even for great powers. This fully updated second edition of Human and National Security: Understanding Transnational Challenges builds on the foundation of the first (published as Human Security in a Borderless World) while also incorporating new discussions of the rise of identity politics in an increasingly connected world, an expanded account of the actors, institutions, and approaches to security today, and the ways diverse global actors protect and promote human security. An essential text for security studies and international relations students, Human and National Security not only presents human security challenges and their policy implications, it also highlights how governments, societies, and international forces can, and do, take advantage of possibilities in the contemporary era to develop a more stable and secure world for all.

Captive Audience Susan Crawford, 2013-01-08 Ten years ago, the United States stood at the forefront of the Internet revolution. With some of the fastest speeds and lowest prices in the world for high-speed Internet access, the nation was poised to be the global leader in the new knowledge-based economy. Today that global competitive advantage has all but vanished because of a series of government decisions and resulting monopolies that have allowed dozens of countries, including Japan and South Korea, to pass us in both speed and price of broadband. This steady slide backward not only deprives consumers of vital services needed in a competitive employment and business market—it also threatens the economic future of the nation. This important book by leading telecommunications policy expert Susan Crawford explores why Americans are now paying much more but getting much less when it comes to high-speed Internet access. Using the 2011 merger between Comcast and NBC Universal as a lens, Crawford examines how we have created the biggest monopoly since the breakup of Standard Oil a century ago. In the clearest terms, this book explores how telecommunications monopolies have affected the daily lives of consumers and America's global economic standing.

Running Cultures John Bale, 2004-06 Running is one of the world's most widely practised sports and recreations. This book 'reads between the lines' of both running and some of its textual and visual representations. It deals with the runner's body and also with the globalisation of running and its practitioners. Although it focuses mainly on serious running, it also examines alternative forms of the sport such as jogging. Drawing on a variety of sources including literature, poetry, art, sculpture, statistics and training manuals, Running Cultures breaks new ground in several ways. It introduces the work of the renowned humanist.

Intermittency Andrew Gibson, 2011-12-07 This book is about the concept of historical intermittency in five recent and contemporary French philosophers: Alain Badiou, Françoise Proust, Christian Jambet, Guy Lardreau and Jacques Rancière.

Abstract Machines Garin Dowd, 2007 Abstract Machines: Samuel Beckett and Philosophy after Deleuze and Guattari is an innovative approach to the relationship of the work of Samuel Beckett to philosophy. The study seeks to combine intertextual analysis and a 'schizoanalytic genealogy' derived from the thought of Gilles Deleuze and Félix Guattari to explore a 'becoming-philosophy' of Beckett's literary writing. The author focuses on zones of encounter and confrontation - spaces and times of 'becoming' - between Beckett, selected philosophers and Deleuze and Guattari. In the retrospective glance occasioned by that part of Deleuze and Guattari's complex legacy which embraces their interest in the author, Beckett's writing in particular effectuates a threshold hesitation which can be seen directly to impact on their approach to the history of philosophy and on their contribution to its 'molecularization' in the name of experimentation. Abstract Machines, with its arresting perspectives on a wide range of Beckett's work, will appeal to academics and postgraduate students interested in the philosophical echoes so evident in his writing. The extent of its recourse to philosophers aside from Deleuze and Guattari, including, notably, Alain Badiou, renders it a timely and provocative intervention in contemporary debates concerning the relationship of literature to philosophy, both within Beckett studies and beyond.

Beckett and Musicality Sara Jane Bailes, Nicholas Till, 2016-04-15 Discussion concerning the 'musicality' of Samuel Beckett's writing now constitutes a familiar critical trope in Beckett Studies, one that continues to be informed by the still-emerging evidence of Beckett's engagement with music throughout his personal and literary life, and by the ongoing interest of musicians in Beckett's work. In Beckett's drama and prose writings, the relationship with music plays out in implicit and explicit ways. Several of his works incorporate canonical music by composers such as Schubert and Beethoven. Other works integrate music as a compositional element, in dialogue or tension with text and image, while others adopt rhythm, repetition and pause to the extent that the texts themselves appear to be 'scored'. But what, precisely, does it mean to say that a piece of prose or writing for theatre, radio or screen, is 'musical'? The essays included in this book explore a number of ways in which Beckett's writings engage with and are engaged by musicality, discussing familiar and less familiar works by Beckett in detail. Ranging from the scholarly to the personal in their respective modes of response, and informed by approaches from performance and musicology, literary studies, philosophy, musical composition and creative practice, these essays provide a critical examination of the ways we might comprehend musicality as a definitive and often overlooked attribute throughout Beckett's work.

Literature in the First Media Age David Trotter, 2013-12-16 The period between the World Wars was one of the richest and most inventive in the long history of British literature. Interwar literature stood apart by virtue of the sheer intelligence of the enquiries it undertook into the technological mediation of experience. After around 1925, literary works began to examine the sorts of behavior made possible for the first time by virtual interaction. And they began to fill up, too, with the look, sound, smell, taste, and feel of the new synthetic and semi-synthetic materials that were reshaping everyday modern life. New media and new materials gave writers a fresh opportunity to reimagine both how lives might be lived and how literature might be written. Today, such material and immaterial mediations have become even more decisive. Communications technology is an attitude before it is a machine or a set of codes. It is an idea about the prosthetic enhancement of our capacity to communicate. The writers who first woke up to this fact were not postwar, postmodern, or post-anything else: some of the best of them lived and wrote in the British Isles in the period between the World Wars.

Seeing Slowly Michael Findlay, 2017-09-26 When it comes to viewing art, living in the information age is not necessarily a benefit. So argues Michael Findlay in this book that encourages a new way of looking at art. Much of this thinking involves stripping away what we have been taught and instead trusting our own instincts, opinions, and reactions. Including reproductions of works by Mark Rothko, Paul Klee, Joan Miró, Jacob Lawrence, and other modern and contemporary masters, this book takes readers on a journey through modern art. Chapters such as "What Is a Work of Art?", "Can We Look and See at the Same Time?", and "Real Connoisseurs Are Not Snobs," not only give readers the confidence to form their own opinions, but also encourages them to make connections that spark curiosity, intellect, and imagination. "The most important thing for us to grasp," writes Findlay, "is that the essence of a great work of art is inert until it is seen. Our engagement with the work of art liberates its essence." After reading this book, even the most intimidated art viewer will enter a museum or gallery feeling more confident and leave it feeling enriched and inspired.

Ecologies of the Moving Image Adrian J. Ivakhiv, 2013-10-07 This book presents an ecophilosophy of cinema: an account of the moving image in relation to the lived ecologies – material, social, and perceptual relations – within which movies are produced, consumed, and incorporated into cultural life. If cinema takes us on mental and emotional journeys, the author argues that those journeys that have reshaped our understanding of ourselves, life, and the Earth and universe. A range of styles are examined, from ethnographic and wildlife documentaries, westerns and road movies, sci-fi blockbusters and eco-disaster films to the experimental and art films of Tarkovsky, Herzog, Malick, and Brakhage, to YouTube's expanding audio-visual universe.

Post-Communist Malaise Zoran Samardzija, 2020-05-15 Post-Communist Malaise examines political modernism within the context of post-communist Eastern Europe and the Balkans. It focuses on how select cinemas from the regions critique European unification and how they represent related issues like the transition from communism to free-market capitalism, the Euro crisis and austerity, and the rise of nationalism and right-wing politics.
