*The Holy Fool in European Cinema* Alina G. Birzache,2016-02-05 This monograph explores the way that the profile and the critical functions of the holy fool have developed in European cinema, allowing this traditional figure to capture the imagination of new generations in an age of religious pluralism and secularization. Alina Birzache traces the cultural origins of the figure of the holy fool across a variety of European traditions. In so doing, she examines the critical functions of the holy fool as well as how filmmakers have used the figure to respond to and critique aspects of the modern world. Using a comparative approach, this study for the first time offers a comprehensive explanation of the enduring appeal of this protean and fascinating cinematic character. Birzache examines the trope of holy foolishness in Soviet and post-Soviet cinema, French cinema, and Danish cinema, corresponding broadly to and permitting analysis of the three main orientations in European Christianity: Orthodox, Catholic, and Protestant. This study will be of keen interest to scholars of religion and film, European cinema, and comparative religion.

*Wicked Cinema* Daniel S. Cutrara,2015-05-01 From struggles over identity politics in the 1990s to current concerns about a clash of civilizations between Islam and Christianity, culture wars play a prominent role in the twenty-first century. Movies help to define and drive these conflicts by both reflecting and shaping cultural norms, as well as showing what violates those norms. In this pathfinding book, Daniel S. Cutrara employs queer theory, cultural studies, theological studies, and film studies to investigate how cinema represents and often denigrates religion and religious believers—an issue that has received little attention in film studies, despite the fact that faith in its varied manifestations is at the heart of so many cultural conflicts today. *Wicked Cinema* examines films from the United States, Europe, and the Middle East, including *Crimes and Misdemeanors*, *The Circle*, *Breaking the Waves*, *Closed Doors*, *Agnes of God*, *Priest*, *The Last Temptation of Christ*, and *Dogma*. Central to all of the films is their protagonists' struggles with sexual transgression and traditional belief systems within Christianity, Judaism, or Islam—a struggle, Cutrara argues, that positions believers as the Other and magnifies the abuses of religion while ignoring its positive aspects. Uncovering a hazardous web of ideological assumptions informed by patriarchy, the spirit/flesh dichotomy, and heteronormativity, Cutrara demonstrates that ultimately these films emphasize the Otherness of the faithful through a variety of strategies commonly used to denigrate the queer, from erasing their existence, to using feminization to make them appear weak, to presenting them as dangerous fanatics.

**Sound Design** Bastian Müller,2008-09-04 Inhaltsangabe:Abstract: In this master thesis the author explores the development of sound design from beginning of sound film until now. The paper explains the vocabulary of sound techniques, standards and devices. It describes sound design in Hollywood films by outstanding examples from prominent sound designers. The thesis links the achievement of the sound designers to the state of the art. The study depicts the interaction between technical possibilities and high demands of audiences. It gives insight into film sound history, explains the production process of film sound in detail and defines the work of a sound designer. Furthermore it contributes to the ongoing academic discussion of film sound, which was coined by researchers such as Chion, Flueckiger, Sonnenschein and Whittington. The author thoroughly analyzes key scenes by successful sound designers and illustrates with the use of examples such as *King Kong* (1933), *Once Upon a Time in the West* (1969), *Terminator 2* (1991), *Saving Private Ryan* (1998), and *King Kong* (2005) amongst many others, the technical and aesthetical progress of sound design and its influence on contemporary Hollywood films. **The Oxford Handbook of Interactive Audio** Karen Collins,Bill Kapralos,Holly Tessler,2014-04-04 As audiences are increasingly no longer solely listeners but also active producer-consumers, and as video games and other interactive systems increasingly permeate our daily lives, understanding interactivity and its impact on the audience has never been more important. A collection of newly commissioned chapters on interactivity in music and sound edited by preeminent scholars in the field, this book marks the beginning of a journey into understanding the ways in which we interact with sound, and offers a new set of analytical tools for the growing field of interactive audio. What does it mean to interact with sound? How does interactivity alter our experience as creators and listeners? What makes interactive audio different from non-interactive audio? Where does interacting with audio fit into our understanding of sound and music? What does the future hold for interactive media when it comes to our musical and sonic experiences? And how do we begin to approach interactive audio from a theoretical perspective? The *Oxford Handbook of Interactive Audio* answers these questions by exploring the full range of interactive audio in video games, performance, education, environmental design, toys, and artistic practice. Examining these questions from a range of approaches -- technological, emotional, psychological, and physical -- the book provides a thorough overview of the fascinating experience of interactive sound.

**Loading the Silence: Australian Sound Art in the Post-Digital Age** Linda Ioanna Kouvaras,2016-05-13 The experimentalist phenomenon of 'noise' as constituting 'art' in much twentieth-century music (paradoxically) reached its zenith in Cage's ('silent' piece) 4'33". But much post-1970s musical endeavour with an experimentalist telos, collectively known as 'sound art', has displayed a postmodern need to 'load' modernism's 'degree zero'. After contextualizing experimentalism from its inception in the early twentieth century, Dr Linda Kouvaras's *Loading the Silence: Australian Sound Art in the Post-Digital Age* explores the ways in which selected sound art works demonstrate creatively how sound is embedded within local, national, gendered and historical environments. Taking Australian music as its primary - but not sole - focus, the book not only covers discussions of technological advancement, but also engages with aesthetic standpoints, through numerous interviews, theoretical developments, analysis and cultural milieux for a contemporary Australian, and wider postmodern, context. Developing new methodologies for synergies between musicology and cultural studies, the book uncovers a new post-postmodern aesthetic trajectory, which Kouvaras locates as developing over the past two decades - the altermodern. Australian sound art is here put firmly on the map of international debates about contemporary music, providing a standard reference and valuable resource for practitioners in the artform, music critics, scholars and educators.

**Irritation of Life** Jörg Metelmann,Scott Loren,2015-12-09 Irritation of Life ist ein Buch über die politische Kraft des Gefühlskinos. Loren und Metelmann deuten die preisgekrönten Filme von Haneke, Lynch und von Trier als Experimente, in denen sich Melodrama und Irritation treffen - Melodrama als Sigle für emotionale Überwältigung, Irritation als Verfahren der Avantgarden. Zusammen gebracht ergeben sie eine spezifische Ästhetik, die die Wahrnehmung der Zuschauer verändert: Man kann sich nicht nicht verhalten zu den Bildern der drei Autorenfilmer. Das Buch führt zunächst die zentralen theoretischen Begriffe ein und entwickelt daraus

im Anschluss an Elsaesser/Hagener ein allgemeines Modell der Filmanalyse, das die Affektordnung des Films historisch und systematisch erschliesst (Film- und Wahrnehmungsgeschichte, Genre, Stil). Den Hauptteil bilden drei ausführlichen Lektüren, die das Filmwerk von Haneke, Lynch und von Trier erläutern. Die reich bebilderte Studie mündet in Überlegungen zum Verhältnis von Kunst und Gesellschaft: Der politische Film heute verbindet gefühlsethische Aufrüttelung mit Selbstreflexion und geht so über die Wiederholung von Rezeptionsmustern hinaus in Richtung Neukartografierung der Wahrnehmung. Er ist nicht Imitation of Life, sondern Irritation of Life

Effective Teaching with Internet Technologies Alan Pritchard, 2007-06-19 'The aim of this book is to support schools in using the internet effectively. Refreshingly, it has a strong pedagogical focus and emphasises the value of technology to support learning...Overall a useful book that should help schools in thinking about how the internet might enhance teaching and learning' - Learning & Teaching Update All schools now have internet access, but the potential of internet technology as a teaching and learning tool is still far from fully realised. This timely book helps teachers develop pedagogical skills in using the internet through a series of case studies of good practice, all of which are based on extensive classroom research. Accessible and practical, it is a guidebook on how integrate the use of technology across teaching and learning. The book offers a range of ideas which can be used in different classroom settings. The emphasis is on practical ways of developing skills in teaching and learning, rather than on the technical specifics of the technology itself. Illustrative material - examples of children's work, website links, and further details of how projects were set up - are presented on a companion website. Chapters include: - The internet and its use in Education - what is the internet and what is its history in schools? - Pedagogy and the Internet - what impact is new technology having on teaching styles? - Learning Theory - past and current perspectives - Teaching with the internet - a series of case studies analysed in terms of pedagogy, learning theory and the effectiveness of the teaching and the learning. - Effective Teaching with the Internet - some guidelines for good practice This book will appeal to teachers in training as well as practising teachers, ICT co-ordinators and those on CPD courses.

**Sounds in Translation** Amy Chan, Alistair Noble, 2009-09-01 Sounds in Translation: Intersections of music, technology and society joins a growing number of publications taking up R. Murray Schafer's challenge to examine and to re-focus attention on the sound dimensions of our human environment. This book takes up his challenge to contemporary audiologists, musicologists and sound artists working within areas of music, cultural studies, media studies and social science to explore the idea of the 'soundscape' and to investigate the acoustic environment that we inhabit. It seeks to raise questions regarding the translative process of sound: 1) what happens to sound during the process of transfer and transformation; and 2) what transpires in the process of sound production/expression/performance. Sounds in Translation was conceived to take advantage of new technology and a development in book publishing, the electronic book. Much of what is written in the book is best illustrated by the sound itself, and in that sense, permits sound to 'speak for itself'.

*The Cinema of Lars Von Trier* Caroline Bainbridge, 2007 Lars von Trier is the most controversial figure of contemporary European cinema. This volume is the first book to analyse in depth the changes he has brought to modern film. Since founding the back-to-basics Dogme philosophy of filmmaking in 1995, von Trier's name has become a by-word for taboo-breaking cinema. As a director, he has courted media controversy through films such as *The Idiots* (1998), with its unsimulated sex and non-conformist politics, and through his complex relationships with actresses such as Björk and Nicole Kidman, from whom he coaxed career-best performances in *Dancer in the Dark* (2000) and *Dogville* (2003) respectively. Analysing these films as well as recent works such as *The Five Obstructions* (2004) from a psychoanalytic perspective, it forges a new understanding of the founder of Dogme 95 as a great democratiser of cinema in the digital age, presenting von Trier as one of the most daring cinematic exponents of postmodern politics and satire.

*Sound Curriculum* Walter S. Gershon, 2017-06-26 Part of a growing group of works that addresses the burgeoning field of sound studies, this book attends not only to theoretical and empirical examinations, but also to methodological and philosophical considerations at the intersection of sound and education. Gershon theoretically advances the rapidly expanding field of sound studies and simultaneously deepens conceptualizations and educational understandings across the fields of curriculum studies and foundations of education. A feature of this work is the novel use of audio files aligned with the arguments within the book as well as the discussion and application of cutting-edge qualitative research methods.

*The Unwanted Sound of Everything We Want* Garret Keizer, 2010-05-04 Noise is usually defined as unwanted sound: loud music from a neighbor, the honk of a taxicab, the roar of a supersonic jet. But as Garret Keizer illustrates in this probing examination, noise is as much about what we want as about what we seek to avoid. It has been a byproduct of human striving since ancient times even as it has become a significant cause of disease in our own. At heart, noise provides a key for understanding some of our most pressing issues, from social inequality to climate change. In a journey that leads us from the Tanzanian veldt to the streets of New York, Keizer deftly explores the political ramifications of noise, America's central role in a loud world, and the environmental sustainability of a quieter one. The result is a deeply satisfying book -- one guaranteed to change how we hear the world, and how we measure our own personal volume within it.

Strange Sounds Timothy D Taylor, 2014-01-02 In *Strange Sounds*, Timothy D. Taylor explains the wonder and anxiety provoked by a technological revolution that began in the 1940s and gathers steam daily. Taylor discusses the cultural role of technology, its use in making music, and the inevitable concerns about authenticity that arise from electronic music. Informative and highly entertaining for both music fans and scholars, *Strange Sounds* is a provocative look at how we perform, listen to, and understand music today.

Nothing and Everything - The Influence of Buddhism on the American Avant Garde Ellen Pearlman, 2012-04-24 In America in the late 1950s and early 60s, the world—and life itself—became a legitimate artist's tool, aligning with Zen Buddhism's emphasis on "enlightenment at any moment" and living in the now. Simultaneously and independently, parallel movements were occurring in Japan, as artists there, too, strove to break down artistic boundaries. *Nothing and Everything* brings these heady times into focus. Author Ellen Pearlman meticulously traces the spread of Buddhist ideas into the art world through the classes of legendary scholar D. T. Suzuki as well as those of his most famous student, composer and teacher John Cage, from whose teachings sprouted the art movement Fluxus and the "happenings" of the 1960s. Pearlman details the interaction of these American artists with the Japanese Hi Red Center and the multi-installation group Gutai. Back in New York, abstract-expressionist artists founded The Club, which held lectures on Zen and featured Japan's first abstract painter, Saburo Hasegawa. And in the literary world, Jack Kerouac and Allen Ginsberg were using Buddhism in their search for new forms and visions of their own. These multiple journeys led to startling breakthroughs in artistic and literary style—and influenced an entire generation. Filled with rare photographs and groundbreaking primary source material, *Nothing and Everything* is the definitive history of this pivotal time for the American arts. **Music and Sound in Documentary Film** Holly Rogers, 2014-11-20 This collection of fourteen essays provides a rich and detailed history of the relationship between music and image in documentary films, exploring the often overlooked role of music in the genre and its subsequent impact on an audience's perception of reality and fiction. Exploring examples of documentary films which make use of soundtrack music, from an interdisciplinary perspective, *Music and Sound in Documentary Film* is the first in-depth treatment on the use of music in the nonfiction film and will appeal to scholars and students working in the intersection of music

and film and media studies.

*Sound Reproduction* Floyd E. Toole, 2017-07-28 *Sound Reproduction: The Acoustics and Psychoacoustics of Loudspeakers and Rooms*, Third Edition explains the physical and perceptual processes that are involved in sound reproduction and demonstrates how to use the processes to create high-quality listening experiences in stereo and multichannel formats. Understanding the principles of sound production is necessary to achieve the goals of sound reproduction in spaces ranging from recording control rooms and home listening rooms to large cinemas. This revision brings new science-based perspectives on the performance of loudspeakers, room acoustics, measurements and equalization, all of which need to be appropriately used to ensure the accurate delivery of music and movie sound tracks from creators to listeners. The robust website ([www.routledge.com/cw/toole](http://www.routledge.com/cw/toole)) is the perfect companion to this necessary resource.
