Loading the Silence: Australian Sound Art in the Post-Digital Age Linda Ioanna

Kouvaras,2016-05-13 The experimentalist phenomenon of 'noise' as constituting 'art' in much twentieth-century music (paradoxically) reached its zenith in Cage's ('silent' piece) 4'33 . But much post-1970s musical endeavour with an experimentalist telos, collectively known as 'sound art', has displayed a postmodern need to 'load' modernism's 'degree zero'. After contextualizing experimentalism from its inception in the early twentieth century, Dr Linda Kouvaras's Loading the Silence: Australian Sound Art in the Post-Digital Age explores the ways in which selected sound art works demonstrate creatively how sound is embedded within local, national, gendered and historical environments. Taking Australian music as its primary - but not sole - focus, the book not only covers discussions of technological advancement, but also engages with aesthetic standpoints, through numerous interviews, theoretical developments, analysis and cultural milieux for a contemporary Australian, and wider postmodern, context. Developing new methodologies for synergies between musicology and cultural studies, the book uncovers a new post-postmodern aesthetic trajectory, which Kouvaras locates as developing over the past two decades - the altermodern. Australian sound art is here put firmly on the map of international debates about contemporary music, providing a standard reference and valuable resource for practitioners in the artform, music critics, scholars and educators.

A Project Guide to Sound Colleen Kessler,2012 Babies crying, school bells ringing, cars

roaring by, the ding signaling that a new text message has arrived . . . sounds are all around us, but how are they made? And how do we hear them? Sounds are created when air vibrates, and we hear them because our ears are specially developed to funnel in and process those vibrations. Through the activities and experiments in this book, you'll take a hands-on look at how sounds are made and how they are heard. From salt drums to xylophones and sonic booms, you'll have fun making music and noise—and learning a little along the way!

Healing at the Speed of Sound Deluxe Don Campbell,Alex Doman,2011-09-29 The bestselling

author of The Mozart Effect taps cutting-edge science to show how we can use sound to improve our lives and achieve our goals. Based on over a decade of new research, Don Campbell, bestselling author of The Mozart Effect, and Alex Doman, an expert in the practical application of sound and listening, show how we can use music-and silence-to become more efficient, productive, relaxed, and healthy. Each chapter focuses on a single aspect of everyday life, providing advice, exercises, wide-ranging playlists, and links so readers can use the music they love to create the perfect soundtrack for any goal or task. Also included are Sound Profiles - brief stories showing how real people creatively tap the power of sound to improve their own and others' lives. With nearly one hundred active links to music, video and downloads in the book, the authors demonstrate how others use the inspiring force of music. But this enhanced e-book edition offers even more: exclusive audio and video directly from the authors (including hand-picked musical selections) that not only illustrate how concepts in the book have affected their lives but also help you apply those lessons to your daily routine. Combining the joy of music with the strength of science, Healing At The Speed of Sound™ will set you on the path to a full, rich and truly harmonious life.

Sound Design Bastian Müller,2008-09-04 Inhaltsangabe:Abstract: In this master thesis the

author explores the development of sound design from beginning of sound film until now. The paper explains the vocabulary of sound techniques, standards and devices. It describes sound design in Hollywood films by outstanding examples from prominent sound designers. The thesis links the achievement of the sound designers to the state of the art. The study depicts the interaction between technical possibilities and high demands of audiences. It gives insight into film sound history, explains the production process of film sound in detail and defines the work of a sound designer. Furthermore it contributes to the ongoing academic discussion of film sound, which was coined by researchers such as Chion, Flueckiger, Sonnenschein and Whittington. The author thoroughly analyzes key scenes by successful sound designers and illustrates with the use of examples such as King Kong (1933), Once Upon a Time in the West (1969), Terminator 2 (1991), Saving Private Ryan

(1998), and King Kong (2005) amongst many others, the technical and aesthetical progress of sound design and its influence on contemporary Hollywood films. Film Fourth Edition Maria Pramaggiore, Tom Wallis, 2020-01-13 Updated and expanded for a new edition, this is the perfect starter text for students of film studies. Packed full of visual examples from all periods of film history up to the present, *Film: A Critical Introduction* illustrates film concepts in context and in depth, addressing techniques and terminology used in film production and criticism, and emphasising thinking and writing critically and effectively. With reference to 450 new and existing images, the authors discuss contemporary films and film studies scholarship, as well as recent developments in film production and exhibition, such as digital technologies and new modes of screen media. New features in the fourth edition: Expanded discussion of changing cultural and political contexts for film and media industries, including #MeToo, #TimesUp, and #OscarsSoWhite Updated examples drawing from both contemporary and classic films in every chapter highlight that film studies is a vibrant and growing field New closing chapter expands the book's theoretical framework, linking foundational concepts in cinema studies to innovative new scholarship in media and screen studies Thoroughly revised and updated discussions of auteur theory, the long-take aesthetic, ideology in the superhero film and more

Game Sound Technology and Player Interaction: Concepts and Developments Grimshaw, Mark, 2010-09-30 *Game Sound Technology and Player Interaction: Concepts and Developments* researches both how game sound affects a player psychologically, emotionally, and physiologically, and how this relationship itself impacts the design of computer game sound and the development of technology. This compilation also applies beyond the realm of video games to other types of immersive sound, such as soundscape design, gambling machines, emotive and fantastical sound to name a few. The application for this research is wide-ranging, interdisciplinary, and of primary importance for academics and practitioners searching for the right sounds.

Music, Sound, and Technology in America Timothy D. Taylor, Mark Katz, Tony Grajeda, 2012-06-19 This reader collects primary documents on the phonograph, cinema, and radio before WWII to show how Americans slowly came to grips with the idea of recorded and mediated sound. Through readings from advertisements, newspaper and magazine articles, popular fiction, correspondence, and sheet music, one gains an understanding of how early-20th-century Americans changed from music makers into consumers.

Contested Boundaries David J. Jepsen, David J. Norberg, 2017-04-10 *Contested Boundaries: A New Pacific Northwest History* is an engaging, contemporary look at the themes, events, and people that have shaped the history of the Pacific Northwest over the last two centuries. An engaging look at the themes, events, and people that shaped the Pacific Northwest – Washington, Oregon, and Idaho – from when only Native Peoples inhabited the land through the twentieth century. Twelve theme-driven essays covering the human and environmental impact of exploration, trade, settlement and industrialization in the nineteenth century, followed by economic calamity, world war and globalization in the twentieth. Written by two professors with over 20 years of teaching experience, this work introduces the history of the Pacific Northwest in a style that is accessible, relevant, and meaningful for anyone wishing to learn more about the region's recent history. A companion website for students and instructors includes test banks, PowerPoint presentations, student self-assessment tests, useful primary documents, and resource links: www.wiley.com/go/jepsen/contestedboundaries.

101 Things You Gotta Do Before You're 12! Joanne O'Sullivan, 2007 A guidebook to a wide variety of creative activities, games, and adventures.

Digital Signal Processing with Matlab Examples, Volume 1 Jose Maria Giron-Sierra, 2016-11-19 This is the first volume in a trilogy on modern Signal Processing. The three books provide a concise exposition of signal processing topics, and a guide to support individual practical exploration based on MATLAB programs. This book includes MATLAB codes to illustrate each of the main steps of the theory, offering a self-contained guide suitable for independent study. The code is embedded in the text, helping readers to put into practice the ideas and methods discussed. The book is divided into three parts, the first of which introduces readers to periodic and non-periodic signals. The second part is devoted to filtering, which is an important and commonly used application. The third part addresses more advanced topics, including the analysis of real-world non-stationary signals and data, e.g. structural fatigue, earthquakes, electro-encephalograms, birdsong, etc. The book's last chapter focuses on modulation, an example of the intentional use of non-stationary signals.

Doing Oral History : A Practical Guide Donald A. Ritchie, 2003-08-07 Oral history is vital to our understanding of the cultures and experiences of the past. Unlike written history, oral history forever captures people's feelings, expressions, and nuances of language. But what exactly is oral history? How reliable is the information gathered by oral history? And what does it take to become an oral historian? Donald A. Ritchie, a leading expert in the field, answers these questions and, in particular, explains the principles and guidelines created by the Oral History Association to ensure

the professional standards of oral historians. *Doing Oral History* has become one of the premier resources in the field of oral history. It explores all aspects of oral history, from starting an oral-history project, including funding, staffing, and equipment to conducting interviews; publishing; videotaping; preserving materials; teaching oral history; and using oral history in museums and on the radio. In this second edition, the author has incorporated new trends and scholarship, updated and expanded the bibliography and appendices, and added a new focus on digital technology and the Internet. Appendices include sample legal release forms and information on oral history organizations. *Doing Oral History* is a definitive step-by-step guide that provides advice and explanations on how to create recordings that illuminate human experience for generations to come. Illustrated with examples from a wide range of fascinating projects, this authoritative guide offers clear, practical, and detailed advice for students, teachers, researchers, and amateur genealogists who wish to record the history of their own families and communities.

Making Money, Making Music David Bruenger, 2016-09-06 Making money, making music is an alternative music business text, providing an entrepreneurial toolbox, based on historical analysis, trends, and patterns in music enterprise. It begins by introducing core principles and processes and shows how to apply them adaptively to new contexts, so that students gain a deeper understanding not only of how things work in the music business, but why. By applying essential concepts to a variety of real-life situations, students improve their capacity to critically analyze, solve problems, and even predict where music and money will converge in a rapidly evolving culture and marketplace.--Provided by publisher.

Environmental Policy and Public Health Barry L. Johnson, Maureen Y. Lichtveld, 2022-03-16 Written by environmental health experts with long teaching and professional careers in policy and public health, the third edition of *Environmental Policy and Public Health* comprises two volumes, addressing key physical hazards in the environment that impact public health. The first volume on Principal Health Hazards and Mitigation is complemented by the second volume, Emerging Health Hazards and Mitigation. Volume 2 discusses emerging health hazards and mitigation including environment-related infectious diseases, COVID-19 pandemic, social justice, and drugs and public health. New in this volume are a chapter on firearms violence as a public health hazard, a chapter on transportation and how built environments can affect human health and social well-being, and a chapter on noise and light pollution. As human populations increase and technology adds more devices to daily use that generate noise and light, adverse human and ecological health effects have become recognizable and require time-sensitive policy actions to mitigate and where possible prevent adverse health effects. Each chapter explains with great clarity how new environmental health issues are translated into public health policies. The volume concludes with case studies and practice questions to facilitate interactive learning for upper-level undergraduate and graduate students taking courses in public health and environmental sciences. The case studies and practice questions allow for a diverse portfolio of in-person and hybrid pedagogical strategies and tools at the fingertips of faculty who not only teach policy courses but whose course topics have policy relevance, such as climate and health.

Spiritual Healing and the Special Needs Child Debra J. Snyder, 2007-03-14 Spiritual healing modalities are powerful tools, which enhance holistic and allopathic methods in caring for special needs children. This research paper explores four methods of spiritual healing, which benefit disabled children on all levels of existence. The spiritual healing techniques of Touch Therapy, Sound Therapy, Channeling and Love Therapy address the unique mind-body-spirit requirements of the pediatric special needs community. Spiritual healing empowers parents and caretakers to take the responsibility of healing into their own homes and to enhance communication with their child via the Divine Spirit in ways not normally explored in traditional approaches. The scientific study of energy medicine further adds credibility to alternative models of healing and opens the minds of allopathic practitioners. Implementing a protocol of Spiritual healing for special needs children bridges the emerging scientific knowledge of energy with holistic approaches and traditional allopathic methods, unlocking the door to the expansion of Spirit Consciousness for all.

Cybercartography D.R.F. Taylor, Tracey Lauriault, 2006-01-12 For generations, the map has been central to how societies function all over the world. Cybercartography is a new paradigm for maps and mapping in the information era. Defined as “the organization, presentation, analysis and communication of spatially referenced information on a wide variety of topics of interest to society, cybercartography is presented in an interactive, dynamic, multisensory format with the use of multimedia and multimodal interfaces. Cybercartography: Theory and Practice examines the major elements of cybercartography and emphasizes the importance of interaction between theory and practice in developing a paradigm which moves beyond the concept of Geographic Information Systems and Geographical Information Science. It argues for the centrality of the map as part of an integrated information, communication, and analytical package. This volume is a result of a multidisciplinary team effort and has benefited from the input of partners from government, industry and other organizations. The international team reports on major original cybercartographic research and practice from a variety of disciplinary perspectives, including the humanities, social sciences including human factors psychology, cybernetics, English literature, cultural mediation, cartography, and geography. This new synthesis has intrinsic value for industries, the general public, and the relationships between mapping and the development of user-centered multimedia interfaces. * Discusses the centrality of the map and its importance in the information era * Provides an interdisciplinary approach with contributions from psychology, music, and language and literature * Describes qualitative and quantitative aspects of cybercartography and the importance of societal context in the interaction between theory and practice * Contains an interactive CD-Rom containing color images, links to websites, plus other important information to capture the dynamic and interactive elements of cybercartography

Doo-Wop Acappella Lawrence Pitilli, 2016-08-02 Scholar and singer Lawrence Pitilli explores doo-wop acapella groups as manifestations of urban change, mass migrations, ethnic acculturation and changing radio and recording industries. He reveals how groups displayed the dynamics of cultural change in the “sounds”—sonic and linguistic—that every generation seeks to make and remake for themselves.
