Assessing Progress in Decarbonizing Spain’s Building Stock
Belinda López-Mesa,

Guiding Students Into Information Literacy Chris Carlson, Ellen Brosnahan,2009 Teachers often assume students know how to do research. However, most students lack important information

literacy skills and often need guidance in order to be successful researchers. Sometimes the research projects students are assigned are not well devised or planned, and teachers often underestimate the amount of time or effort necessary to complete a project. These difficulties soon become compounded because students often have poor organizational and time management skills, which are essential in producing good research projects. The desire to make the research experience pleasant and worthwhile for students and the teacher who must assess their efforts has led authors Chris Carlson and Ellen Brosnahan to devise a logical system to help students not only gain valuable information literacy and time management skills needed but also to help the instructor have a better handle on what students are doing during the process. Information Literacy takes readers systematically through the management of a research activity, from conception to final product. Each chapter includes handouts that have been used by the authors with actual research assignments, websites for further information, and a bibliography of additional books that support the ideas in the chapter. An appendix with examples of research papers that have been done by the authors' actual students is also included.

Cyber Worship in Multifaith Perspectives Mohamed

Taher,2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

Ten Ton Dreamweaver Geoff Blake,2006-02-08 If you're thinking about creating or maintaining Web sites, you're likely to turn to Dreamweaver, the de facto software tool of choice for Web design today. What could be a chore, however, becomes a fun and fascinating challenge with this comprehensive yet clever guide. Author Geoff Blake turns a technical topic into an entertaining one by using conversational language, plenty of humor, facts, and tips to make Dreamweaver accessible to everyone. Behind all the jokes, however, is a wealth of information: After showing how Dreamweaver fits into the overall Web design puzzle, Geoff quickly gets down to building a basic Web site, by teaching good, 21st century work habits and providing step-by-step instructions for building pages from the very beginning with CSS styles and library items. With that knowledge under your belt, you'll be ready to tackle the advanced functionality (including behaviors, multimedia, and templates).

Sources of Power Manfred Weissenbacher, 2009-09-30 A landmark book rolls out a bold, new, energy-based theory of human history based on a simple, yet powerful law: whoever controls the world's effective energy supplies during a given energy age will inevitably dominate the economic, political, and cultural history of that age. The innovative theory articulated in *Sources of Power: How Energy Forges Human History* parses history into four ages: the foraging, agriculture, coal, and oil ages, each defined by the dominant source of power. Manfred Weissenbacher tests this sweeping theory against the panorama of world history, combining formidable powers of synthesis with a specialist's deep understanding of energy systems and technologies. After proving the operation of his law through history and into the present, Weissenbacher applies it to global geopolitical trends. He assesses the prospects of the various candidate technologies to succeed oil

and charts future scenarios based on the distribution of energy reserves. Finally, he forecasts the fates of the American and Chinese empires in the twilight of the oil age: the United States as a mature superpower forced to deploy military might to occupy oilfields in the Middle East; China as an emerging superpower forced to deploy economic might to muscle in on the development of Third World oilfields.

China's New Sources of Economic Growth: Vol. 1 Ligang Song, Ross Garnaut, Cai Fang, Lauren Johnston, 2016-07-21 China's change to a new model of growth, now called the 'new normal', was always going to be hard. Events over the past year show how hard it is. The attempts to moderate the extremes of high investment and low consumption, the correction of overcapacity in the heavy industries that were the mainstays of the old model of growth, the hauling in of the immense debt hangover from the fiscal and monetary expansion that pulled China out of the Great Crash of 2008 would all have been hard at any time. They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries, extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model. China's economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits. This year's Update explores the challenge of the slowdown in growth and the change in economic structure.

Leading experts on China's economy and environment review change within China's new model of growth, and its interaction with ageing, environmental pressure, new patterns of urbanisation, and debt problems at different levels of government. It illuminates some new developments in China's economy, including the transformational potential of internet banking, and the dynamics of financial market instability. China's economic development since 1978 is full of exciting change, and this year's China Update is again the way to know it as it is happening.
