The Quest for a General Theory of Leadership George R. Goethals, Georgia Jones Sorenson, 2007-01-01 This book represents a most robust look at the study of leadership while representing multiple disciplines in a quest to find agreement about leadership and theory. Russ Volckmann, International Leadership Review In this compelling book, top scholars from diverse fields describe the progress they have made in developing a general theory of leadership. Led by James MacGregor Burns, Pulitzer Prize winning author of the classic Leadership (1978), they tell the story of this intellectual venture and the conclusions and questions that arose from it. The early chapters describe how, in order to discuss an integrative theory, the group first wrestled with the nature of theory as well as basic aspects of the human condition that make leadership necessary and possible. They then tackle topics such as: the many faces of power woven into the leadership fabric; crucial elements of group dynamics and the leader follower relationship; ethical issues lying at the heart of leadership; constructivist perspectives on leadership, causality, and social change; and the historical and cultural contexts that influence and are influenced by leadership. The book concludes with a commentary by Joanne Ciulla and an Afterword by James MacGregor Burns. The contributors thorough coverage of leadership, as well as their approach to this unique undertaking, will be of great interest to leaders, students and scholars of leadership.

Cornered Barry C. Lynn, 2009-12-10 A manifesto for our times. —Thomas Frank, Wall Street Journal Barry C. Lynn, one of the most original and surprising students of the American economy, paints a genuinely alarming picture: most of our public debates about globalization, competitiveness, creative destruction, and risky finance are nothing more than a cover for the widespread consolidation of power in nearly every imaginable sector of the American economy. Cornered strips the camouflage from the secret world of twenty-first-century monopolies-neofeudalist empires whose sheer size, vast resources, and immense political power enable the people who control to direct virtually every major industry in America in an increasingly authoritarian manner. Lynn reveals how these massive juggernauts, which would have been illegal just thirty years ago, came into being, how they have destroyed or devoured their competition, and how they collude with one another to maintain their power and create the illusion of open, competitive markets. A confluence of small government zealotry and misguided efficient market theories has led to a complete dismantling of government oversight of industry. Has that brought us the promised economic utopia? Just the opposite. For decades, the dominant elite has used the federal government to all but encourage companies to buy one another up, outsource all their production, and make their profits by leveraging their complete power over the market itself. Lynn makes clear it will take more than a lawsuit or two to overthrow America's corporatist oligarchy and restore a model of capitalism that protects our rights as property holders and citizens, and the independence of our Republic. Details how regular citizens can join together to beat the great powers, and how to do so by relearning the real history and language of our democratic republic. Includes stories of real people and real industries that show how monopolies threaten independent businesses, squelch innovation, degrade the quality and safety of products, destabilize vital industrial and financial systems, and destroy the fabric of democracy Explores monopoly power across a wide array of industries, including appliances, auto parts, beer, eyeglasses, medical supplies, pet food, surfboards, vitamins, and more. Demonstrates how the drive for always lower prices makes your job disappear, puts your small business out of business, and turns dreams of entrepreneurial success into impossible fantasies Lynn is that rarest of creatures, a journalist whose theoretical writings are taken very seriously by the top policymakers and economic thinkers in Washington and around the world. His work has been compared already to John Kenneth Galbraith and Peter Drucker. The Washington Post called Lynn's last book on globalization-Tom Friedman for grownups. Cornered is essential reading for anyone who cares about America and its future.

A Blues Bibliography Robert Ford, 2008-03-31 A Blues Bibliography, Second Edition is a revised and enlarged version of the definitive blues bibliography first published in 1999. Material previously omitted from the first edition has now been included, and the bibliography has been expanded to include works published since then. In addition to biographical references, this work includes entries on the history and background of the blues, instruments, record labels, reference sources, regional variations and lyric transcriptions and musical analysis. The Blues Bibliography is an invaluable guide to the enthusiastic market among libraries specializing in music and African-American culture and among individual blues scholars.

Journals of the Plague Years Norman Spinrad, 2013-07-25 The Plague's origins were mysterious, but its consequences were all too obvious: quarantined cities, safe-sex machines, Sex Police, the outlawing of old-fashioned love. Four people hold the fate of humanity in their hands...A sexual mercenary condemned to death as a foot soldier in the Army of the Living Dead; a scientist who's devoted his whole life to destroying the virus and now discovers he has only ten weeks to succeed; a God-fearing fundamentalist on his way to the presidency before he accepts a higher calling; and a young infected coed from Berkeley on a bizarre crusade to save the world with a new religion of carnal abandon. Each will discover that the only thing more dangerous than the Plague is the cure.

Organelle Proteomics Delphine Pflieger, Jean Rossier, 2010-11-19 This is the first book to examine organelle proteomics in depth. It begins by introducing the different analytical strategies developed and successfully utilized to study organelle proteomes, and detailing the use of multidimensional liquid chromatography coupled to tandem mass spectrometry for peptide sample analysis. Detailed protocols are provided and a section is devoted to methods enabling a global estimate of the reliability of the protein list assigned to an organelle.

ANTITRUST ANALYSIS OF PLATFORM MARKETS David Sparks Evans, Richard Schmalensee, 2019-12-16 This book compiles a set of pieces on the implications of the U.S. Supreme Court's ruling in *Ohio et. al. v. American Express* and the preceding litigation for the treatment of multisided platforms under U.S. antitrust law. The authors consider that the Supreme Court ruling provides valuable guidance for antitrust analysis in such markets.

Print and Power Shawn Frederick McHale,2008-03-27 In this ambitious and path-breaking book, Shawn McHale challenges long held views that define modern Vietnamese history in terms of anticolonial nationalism and revolution. McHale argues instead for a historiography that does not overstress either the role of politics in general or Communism in particular. Using a wide range of sources from Vietnam, France, and the United States, many of them previously unexploited, he shows how the use of printed matter soared between 1920 and 1945 and in the process transformed Vietnamese public life and shaped the modern Vietnamese consciousness. Print and Power begins with an overview of Vietnam's lively public spheres, bringing debates from Europe and the rest of Asia to Vietnamese studies with nuance and sophistication. It examines the impact of the French colonial state on Vietnamese society as well as Vietnamese and East Asian understandings of public discourse and public space. Popular taste, rather than revolutionary or national ideology, determined to a large extent what was published, with limited intervention by the French authorities. A vibrant but hierarchical public realm of debate existed in Vietnam under authoritarian colonial rule. The work goes on to contest the impact of Confucianism on premodern and modern Vietnam and, based on materials never before used, provides a radically new perspective on the rise of Vietnamese communism from 1929 to 1945. Novel interpretations of the Nghe Tinh soviets (1930-1931), the first major communist uprising in Vietnam, and Vietnamese communist successes in World War II built an audience for their views and made an extremely alien ideology comprehensible to growing numbers of Vietnamese. In what is by far the most thorough examination in English of modern Vietnamese Buddhism and its transformations, McHale argues that, contrary to received wisdom, Buddhism was not in decline during the 1920-1945 period; in fact, more Buddhist texts were produced in Vietnam at that time than at any other in its history. This finding suggests that the heritage of the Vietnamese past played a crucial role in the late colonial period. Print and Power makes a significant contribution to Vietnamese and Asian studies and will be of compelling interest to those in the fields of comparative religion and European colonialism.

Competition Policy and Patent Law under Uncertainty Geoffrey A. Manne,Joshua D. Wright,2014-03-06 The regulation of innovation and the optimal design of legal institutions in an environment of uncertainty are two of the most important policy challenges of the twenty-first century. Innovation is critical to economic growth. Regulatory design decisions, and, in particular, competition policy and intellectual property regimes, can have profound consequences for economic growth. However, remarkably little is known about the relationship between innovation, competition, and regulatory policy. Any legal regime must attempt to assess the tradeoffs associated with rules that will affect incentives to innovate, allocative efficiency, competition, and freedom of economic actors to commercialize the fruits of their innovative labors. The essays in this book approach this critical set of problems from an economic perspective, relying on the tools of microeconomics, quantitative analysis, and comparative institutional analysis to explore and begin to provide answers to the myriad challenges facing policymakers.

Ernst Zermelo Heinz-Dieter Ebbinghaus,2007-06-02 This biography attempts to shed light on all facets of Zermelo's life and achievements. Personal and scientific aspects are kept separate as far as coherence allows, in order to enable the reader to follow the one or the other of these threads. The presentation of his work explores motivations, aims, acceptance, and influence. Selected proofs and information gleaned from unpublished notes and letters add to the analysis.

Structural Proteomics Bostjan Kobe,Mitchell Guss,Thomas Huber,2010-12-10 The objective of this volume is to provide readers with a current view of all aspects of the 'pipeline' that takes protein targets to structures and how these have been optimised. This volume includes chapters describing, in-depth, the individual steps in the Structural Genomics pipeline, as well as less detailed overviews of individual Structural Genomics initiatives. It is the first book of protocols to cover techniques in a new and emerging field.
