Handbook of Education Policy Studies Guorui Fan,Thomas S. Popkewitz,2020-06-02 This open access handbook brings together the latest research from a wide range of internationally influential scholars to analyze educational policy research from international, historical and interdisciplinary perspectives. By effectively breaking through the boundaries between countries and disciplines, it presents new theories, techniques and methods for contemporary education policy, and illustrates the educational policies and educational reform practices that various countries have introduced to meet the challenges of continuous change. Based on an analysis of the nature of education policy and education reform, this volume focuses on education reform and the concept of education quality. Adopting a historical and comparative perspective, it examines the dialectical relationship between education policy and education reform in various countries, assesses theoretical and practical issues in the process of moving from regulation to multiple governance in contemporary education administration, and explores the impact of globalization on national education reform and the interdependence between countries. In addition, it presents studies addressing educational policy research methodology from multiple perspectives. Highlighting the changes in national education macro policies, this volume comprehensively reveals the complex relationship between contemporary education reform and social change, and explores the links between contemporary social, political and economic systems and educational policy research and practice, offering a holistic portrait of macro trends in contemporary education reform.

Co-Creating Tourism Research Carina Ren, Gunnar Thór Jóhannesson, René van der Duim, 2017-12-06 Co-creation has become a buzzword in many social science disciplines, in business and in tourism studies. Given the prominence of co-creation, surprisingly little discussion has evolved around its implications for research practices and knowledge production as well as what challenges there are for fulfilling the promise of co-creation in tourism research. This book aims to contribute to this discussion by addressing how tourism research comes together as a collaborative achievement and by exploring different ways of collaborative knowledge production in tourism research. It is structured to offer, on one hand, an introduction to the ontological basis for collaborative research and, on the other hand, a set of empirical examples of how collaborative knowledge creation can inform tourism design, management, policy and education. The theoretical accounts and empirical cases of this book display how research collaborations can offer modest, local yet often impactful insights, traces and effects. It therefore will be of value for students, researchers and academics in tourism studies as well as the wider social sciences.

Chinese Fans of Japanese and Korean Pop Culture Lu Chen, 2017-09-05 How can Japanese popular culture gain numerous fans in China, despite pervasive anti-Japanese sentiment? How is it that there's such a strong anti-Korean sentiment in Chinese online fan communities when the official Sino-Korean relationship is quite stable before 2016? Avid fans in China are raising hundreds of thousands of dollars in funding to make gifts to their idols in foreign countries. Tabloid reports on Japanese and Korean celebrities have been known to trigger nationalist protests in China. So, what is the relationship between Chinese fandom of Japanese and Korean popular culture and nationalist sentiment among Chinese youth? Chen discusses how Chinese fans of Japanese and Korean popular culture have formed their own nationalistic discourse since the 1990s. She argues that, as nationalism is constructed from various entangled ideologies, narratives, myths and collective memories, popular culture simply becomes another resource for the construction of nationalism. Fans thus actively select, interpret and reproduce the content of cultural products to suit their own ends. Unlike existing works, which focus on the content of transnational cultural flows in East Asia, this book focuses on the reception and interpretation of the Chinese audience.

The Economics of Climate Change in China Fan Gang, Nicholas Stern, Ottmar Edenhofer, Xu Shanda, Klas Eklund, Frank Ackerman, Lailai Li, Karl Hallding, 2013-09-13 China faces many modernization challenges, but perhaps none is more pressing than that posed by climate change. China must find a new economic growth model that is simultaneously environmentally sustainable, can free it from its dependency on fossil fuels, and lift living standards for the majority of its population. But what does such a model look like? And how can China best make the transition from its present macro-economic structure to a low-carbon future? This ground-breaking economic study, led by the Stockholm Environment Institute and the Chinese Economists 50 Forum, brings together leading international thinkers in economics, climate change, and development, to tackle some of the most challenging issues relating to China's low-carbon development. This study maps out a deep carbon reduction scenario and analyzes economic policies

that shift carbon use, and shows how China can take strong and decisive action to make deep reductions in carbon emission over the next forty years while maintaining high economic growth and minimizing adverse effects of a low-carbon transition. Moreover, these reductions can be achieved within the finite global carbon budget for greenhouse gas emissions, as determined by the hard constraints of climate science. The authors make the compelling case that a transition to a low-carbon economy is an essential part of China's development and modernization. Such a transformation would also present opportunities for China to improve its energy security and move its economy higher up the international value chain. They argue that even in these difficult economic times, climate change action may present more opportunities than costs. Such a transformation, for China and the rest of the world, will not be easy. But it is possible, necessary and worthwhile to pursue.
