Handbook of Compliance & Integrity Management Prof. S.C. Bleker-van

Eyk, R.A.M. Houben, 2017-08-25 This handbook is the first resource to provide a scientific analysis of the nature of compliance. It examines the subject from such crucial and varied perspectives as ethics, behavioral science, risk management, accounting, and European and international law. Much more than a critical approach to the existing practice of supervision, it provides a wealth of information, guidance, and valuable insights for the day-to-day work of compliance officers. With chapters contributed by lecturers of VU University Amsterdam's flourishing post-doctoral Executive Master Program in Compliance and Integrity Management – which fosters alternatives such as greater trust in self-regulation and market discipline – the book explores such aspects of compliance and integrity management as the following: • monitoring risk compliance and integrity; • stakeholder and reputation management; • conflicts of interest; • anti-bribery; • export controls; • extraterritorial jurisdiction of U.S. legislation; • fraud; • duty of care; • market abuse; • privacy; and • competition. The analysis throughout is supported by a comprehensive study of the literature concerning the *raison d'être* of supervision and regulation. Meeting the need for an in-depth analysis of the expanding field of compliance and integrity management, this book is a milestone in a field that is rapidly growing in importance across a wide spectrum of business and professional activity. It will prove an

essential practical resource for company or institutional officers worldwide in setting up a compliance function in their organization. Well known as a consultant in compliance-related matters, Sylvie C. Bleker-van Eyk is currently Senior Director at PricewaterhouseCoopers Forensic Services, Chair of the Supervisory Committee on Monitoring Anti-Money Laundering Policy at WODC, the Research and Documentation Centre of the Netherlands Ministry of Security and Justice, and Professor and Program Director of Postgraduate Education in Compliance and Integrity Management at VU University Amsterdam. Raf A. M. Houben is Head of Compliance and Security at HDI Global SE-The Netherlands in Rotterdam, and program coordinator and lecturer at the same Postgraduate Education in Amsterdam.

China, Arms Control, and Non-Proliferation Wendy Frieman, 2014-04-08 China, Arms Control, and Non-Proliferation is an empirically and conceptually path-breaking book that documents China's participation in international arms control and non-proliferation regimes from 1985 to 2001. The book focuses on the distinction between US expectations of Chinese compliance, which China has not always met, and international standards, against which Chinese performance is acceptable. This will be the standard staple work dealing with China and international arms control and will be invaluable to those dealing with Chinese security studies, foreign policy, international relations and arms control and disarmament.

Small Nations and Colonial Peripheries in World War I , 2016-02-02 This

edited volume examines the experience of World War I of small nations, defined here in terms of their relative weakness vis-à-vis the major actors in European diplomacy, and colonial peripheries, encompassing areas that were subject to colonial rule by European empires and thus located far from the heartland of these empires. The chapters address subject nations within Europe, such as Ireland and Poland; neutral states, such as Sweden and Spain; and overseas colonies like Tunisia, Algeria and German East Africa. By combining analyses of both European and extra-European experiences of war, this collection of essays provides a unique comparative perspective on World War I and points the way towards an integrated history of small nations and colonial peripheries. Contributors are Steven Balbirnie, Gearóid Barry, Jens Boysen, Ingrid Brühwiler, William Buck, AUde Chanson, Enrico Dal Lago, Matias Gardin, Richard Gow, Florian Grafl, Dónal Hassett, Guido Hausmann, Róisín Healy, Conor Morrissey, Michael Neiberg, David Noack, Chris Rominger, Danielle Ross and Christine Strotmann.

Rewriting the Chicano Movement Mario T. García, Ellen McCracken, 2021-03-09
The Chicano Movement, el movimiento, is known as the largest and most expansive civil rights and empowerment movement by Mexican Americans up to that time. It made Chicanos into major American political actors and laid the foundation for today's Latino political power. *Rewriting the Chicano Movement* is a collection of powerful new essays on the Chicano Movement that expand

and revise our understanding of the movement. These essays capture the commitment, courage, and perseverance of movement activists, both men and women, and their struggles to achieve the promises of American democracy. The essays in this volume broaden traditional views of the Chicano Movement that are too narrow and monolithic. Instead, the contributors to this book highlight the role of women in the movement, the regional and ideological diversification of the movement, and the various cultural fronts in which the movement was active. Rewriting the Chicano Movement stresses that there was no single Chicano Movement but instead a composite of movements committed to the same goal of Chicano self-determination. Scholars, students, and community activists interested in the history of the Chicano Movement can best start by reading this book. Contributors: Holly Barnet-Sanchez, Tim Drescher, Jesús Jesse Esparza, Patrick Fontes, Mario T. García, Tiffany Jasmín González, Ellen McCracken, Juan Pablo Mercado, Andrea Muñoz, Michael Anthony Turcios, Omar Valerio-Jiménez

Invented Religions Carole M. Cusack, 2016-05-06 Utilizing contemporary scholarship on secularization, individualism, and consumer capitalism, this book explores religious movements founded in the West which are intentionally fictional: Discordianism, the Church of All Worlds, the Church of the SubGenius, and Jediism. Their continued appeal and success, principally in America but gaining wider audience through the 1980s and 1990s, is chiefly as a result of underground publishing and the internet. This book deals with

immensely popular subject matter: Jediism developed from George Lucas' Star Wars films; the Church of the Flying Spaghetti Monster, founded by 26-year-old student Bobby Henderson in 2005 as a protest against the teaching of Intelligent Design in schools; Discordianism and the Church of the SubGenius which retain strong followings and participation rates among college students. The Church of All Worlds' focus on Gaia theology and environmental issues makes it a popular focus of attention. The continued success of these groups of Invented Religions provide a unique opportunity to explore the nature of late/post-modern religious forms, including the use of fiction as part of a bricolage for spirituality, identity-formation, and personal orientation.

Remix Theory: The Aesthetics of Sampling Eduardo Navas, 2014-11-04 Sampling and remixing are now common in art, music and new media. Assessing their aesthetic qualities by focusing on technical advances in 1970s and 80s music, and later in art and media, the author argues that 'Remix' punches above its deemed cultural weight.

Commerce Business Daily ,1998-05

The Other 1980s Brannon Costello, Brian Cremins, 2021-06-02 Fans and scholars have long regarded the 1980s as a significant turning point in the history of comics in the United States, but most critical discussions of the period still focus on books from prominent creators such as Frank Miller, Alan Moore, and Art Spiegelman, eclipsing the work of others who also played a key

role in shaping comics as we know them today. The Other 1980s offers a more complicated and multivalent picture of this robust era of ambitious comics publishing. The twenty essays in The Other 1980s illuminate many works hailed as innovative in their day that have nonetheless fallen from critical view, partly because they challenge the contours of conventional comics studies scholarship: open-ended serials that eschew the graphic-novel format beloved by literature departments; sprawling superhero narratives with no connection to corporate universes; offbeat and abandoned experiments by major publishers, including Marvel and DC; idiosyncratic and experimental independent comics; unusual genre exercises filtered through deeply personal sensibilities; and oft-neglected offshoots of the classic “underground” comics movement of the 1960s and 1970s. The collection also offers original examinations of the ways in which the fans and critics of the day engaged with creators and publishers, establishing the groundwork for much of the contemporary critical and academic discourse on comics. By uncovering creators and works long ignored by scholars, The Other 1980s revises standard histories of this major period and offers a more nuanced understanding of the context from which the iconic comics of the 1980s emerged.

The University of Google Tara Brabazon, 2016-02-17 Looking at schools and universities, it is difficult to pinpoint when education, teaching and learning started to haemorrhage purpose, aspiration and function. Libraries and librarians have been starved of funding. Teachers cram their curriculum

with 'skill development' and 'generic competencies' because knowledge, creativity and originality are too expensive to provide to unmotivated students and parents obsessed with league tables, not learning. Meanwhile, the internet offers a glut of information on everything-under-the-sun, a mere mouse-click away. Bored surfers fill their cursors and minds with irrelevancies. We lose the capacity to sift, discard and judge. Information is no longer for social good, but for sale. Tara Brabazon argues that this information fetish has been profoundly damaging to our learning institutions and to the ambitions of our students and educators. In *The University of Google* she projects a defiant and passionate vision of education as a pathway to renewal, where research is based on searching and students are on a journey through knowledge, rather than consumers in the shopping centre of cheap ideas. Angry, humorous and practical in equal measure, *The University of Google* is based on real teaching experience and on years of engaged and sometimes exasperated reflection on it. It is far from a luddite critique of the information age. Tara Brabazon celebrates the possibilities of digital platforms in education, but deplores the consequences of placing funding on technology and not teachers. In doing so, she opens a new debate on how to make our educational system both productive and provocative in the (post-) information age.

A War of Sections Steve Suitts, 2023-10 In a sweeping reinterpretation of the history of disfranchisement, Steve Suitts illuminates how a century of

political conflicts in Alabama came to shape both some of America's best achievements in voting rights and its continuing struggles over voter suppression. A War of Sections tells the unknown political history symbolized today by the annual pilgrimage of presidents and celebrities across the Edmund Pettus Bridge. It is the story of how that crucial, tragic day in Selma in 1965 was only the flashpoint of a much longer history of failures and successes involving conflicts not only between blacks and whites in Alabama but between white political factions warring in the state over voting rights. Suitts recasts the context and much of the content of disfranchisement in Alabama as an unremitting, decades-long sectional battle in white-only politics between the state's rural Black Belt and north Alabama counties. He uncovers important Black and white heroes and villains who collectively shaped the arc of voting rights in Alabama and ultimately across the nation. A War of Sections offers a new understanding of the political dynamics of resistance and change through which a southern state's long-standing democratic failures ironically provided motivation for and instruction to a reluctant nation regarding unmatched ways to advance universal voting. Along the way, the book introduces from this unheard past some prophetic voices that speak to the paramount issues of America's commitment to the universal right to vote-then and now.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel,

Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Newspapers - 2018 Sherlockians of Baltimore,

Children's Literature in Translation Jan Van Coillie, Walter P.

Verschueren, 2014-07-16 Children's classics from Alice in Wonderland to the

works of Astrid Lindgren, Roald Dahl, J.K. Rowling and Philip Pullman are now generally recognized as literary achievements that from a translator's point of view are no less demanding than 'serious' (adult) literature. This volume attempts to explore the various challenges posed by the translation of children's literature and at the same time highlight some of the strategies that translators can and do follow when facing these challenges. A variety of translation theories and concepts are put to critical use, including Even-Zohar's polysystem theory, Toury's concept of norms, Venuti's views on foreignizing and domesticating translations and on the translator's (in)visibility, and Chesterman's prototypical approach. Topics include the ethics of translating for children, the importance of child(hood) images, the 'revelation' of the translator in prefaces, the role of translated children's books in the establishment of literary canons, the status of translations in the former East Germany; questions of taboo and censorship in the translation of adolescent novels, the collision of norms in different translations of a Swedish children's classic, the handling of 'cultural intertextuality' in the Spanish translations of contemporary British fantasy books, strategies for translating cultural markers such as juvenile expressions, functional shifts caused by different translation strategies dealing with character names, and complex translation strategies used in dealing with the dual audience in Hans Christian Andersen's fairy tales and in Salman Rushdie's *Haroun and the Sea of Stories*.

Teacher of Civil War Generals Allen H. Mesch, 2015-07-11 From West Point to Fort Donelson, General Charles Ferguson Smith was a soldier's soldier. He served at the U.S. Military Academy from 1829 to 1842 as Instructor of Tactics, Adjutant to the Superintendent and Commandant of Cadets. During his 42-year career he was a teacher, mentor and role model for many cadets who became prominent Civil War generals, and he was admired by such former students as Grant, Halleck, Longstreet and Sherman. Smith set an example for junior officers in the Mexican War, leading his light battalion to victories and earning three field promotions. He served with Albert Sidney Johnston and other future Confederate officers in the Mormon War. He mentored Grant while serving with him during the Civil War, and helped turn the tide at Fort Donelson, which led to Grant's rise to fame. He attained the rank of major general, while refusing political favors and ignoring the press. Drawing on never before published letters and journals, this long overdue biography reveals Smith as a faithful officer, excellent disciplinarian, able commander and modest gentleman.

Ponyville Confidential Sherilyn Connelly, 2017-03-14 Beloved by young girls around the world, Hasbro's My Little Pony franchise has been mired in controversy since its debut in the early 1980s. Critics dismissed the cartoons as toy advertisements, and derided their embrace of femininity. The 2010 debut of the openly feminist My Little Pony: Friendship Is Magic renewed the backlash, as its broad appeal challenged entrenched notions about

gendered entertainment. This first comprehensive study of My Little Pony explores the history and cultural significance of the franchise through Season 5 of Friendship Is Magic and the first three Equestria Girls films. The brand has continued to be on the receiving end of a sexist double standard regarding commercialism in children's entertainment, while masculine cartoons such as the Transformers have been spared similar criticism.

Forgotten British Film Philip Gillett, 2017-05-11 Some films are remembered long after they are released; others are soon forgotten, but do they deserve oblivion? Are factors other than quality involved? This book exhumes some of the films released in Britain over the last seventy years from Daybreak (1948) to 16 Years of Alcohol (2003), and considers the reasons for their neglect. As well as exploring the contributions of those involved in making the films, the book examines such issues as marketing and the response of critics and audiences. Films are grouped loosely into categories such as "B" films and television films. Some works were little seen when they were first released and have stayed that way; others were popular in their day, but have slipped into obscurity. In some cases, social change has overtaken them, making the attitudes or subjects they depict seem dated. Even being released as a DVD does not guarantee that a title will be rehabilitated. In addition, how significant is the American market? This book should appeal to lovers of British film, as well as to film studies students and everybody curious about the vagaries of success and failure in the arts.

You Are Not American Amanda Frost, 2021-01-26 Shortlisted for the Mark Lynton History Prize Citizenship is invaluable, yet our status as citizens is always at risk—even for those born on US soil. Over the last two centuries, the US government has revoked citizenship to cast out its unwanted, suppress dissent, and deny civil rights to all considered “un-American”—whether due to their race, ethnicity, marriage partner, or beliefs. Drawing on the narratives of those who have struggled to be treated as full members of “We the People,” law professor Amanda Frost exposes a hidden history of discrimination and xenophobia that continues to this day. The Supreme Court’s rejection of Black citizenship in Dred Scott was among the first and most notorious examples of citizenship stripping, but the phenomenon did not end there. Women who married noncitizens, persecuted racial groups, labor leaders, and political activists were all denied their citizenship, and sometimes deported, by a government that wanted to redefine the meaning of “American.” Today, US citizens living near the southern border are regularly denied passports, thousands are detained and deported by mistake, and the Trump administration is investigating the citizenship of 700,000 naturalized citizens. Even elected leaders such as Barack Obama and Kamala Harris are not immune from false claims that they are not citizens eligible to hold office. *You Are Not American* grapples with what it means to be American and the issues surrounding membership, identity, belonging, and exclusion that still occupy and divide the nation in the twenty-first century.
