High Tech Startup John L. Nesheim, 1992 The phenomenal success of the initial public offerings (IPOs) of many new internet companies obscures the fact that fewer than six out of 1 million business plans submitted to venture capital firms will ever reach the IPO stage. Many fail, according to start-up expert John Nesheim, because the entrepreneurs did not have access to the invaluable lessons that come from studying the real-world venture experiences of successful companies. Now they do. This revised and updated edition of Nesheim's underground Silicon Valley bestseller incorporates twenty-three case studies of successful start-ups, including tables of wealth showing how much money founders and investors realized from each venture. Acclaimed by entrepreneurs the world over, this practical handbook is filled with hard-to-find information and guidance covering every key phase of a start-up, from idea to IPO: how to create a winning business plan, how to value the firm, how venture capitalists work, how they make their money, where to find alternative sources of funding, how to select a good lawyer, and how to protect intellectual property. Nesheim aims to improve the odds of success for first-time high-tech entrepreneurs, and offers an insider's perspective from firsthand experience on one of the toughest challenges they face - convincing venture capitalists or investment banks to provide financing. This complete, classic reference tool is essential reading for first-time high-tech entrepreneurs, and entrepreneurs already involved in a start-up who want to increase their chances of success to rise to the top.

Launch! Kathy Maher,Gretchen Wilson,2021-01-25 This is the sort of book I wish every entrepreneur read before starting a company. It brings together so much good advice and experience but doesn't sugar-coat the challenges. Many startup authors are self-glorifying and nauseatingly brash, but not Gretchen and Kathy. I've watched so many startups that have the bug but not the team, structure, values, or discipline to be successful. This book lays out what you need to turn your big idea into a successful startup the right way. Rather than pretend that success is guaranteed and available to everybody if only you want it badly enough, it shows what you can achieve with hard work and solid business principles when you find yourself with the right insight and the right connections at the right time. Jason Garber, Co-founder, Promptworks LLCSoftware developer, product designer, operations executive, author, and speakerEvery great dream begins with a dreamer. Always remember, you have within you the strength, the patience, and the passion to reach for the stars to change the world. - Harriet Tubman Winning is great, sure, but if you are really going to do something in life, the secret is learning how to lose. Nobody goes undefeated all the time. If you can pick up after a crushing defeat, and go on to win again, you are going to be a champion someday. - Wilma RudolphHave you ever thought about joining the startup scene? Whether you are starting out in your career or looking for a career pivot, there are around 750,000 new businesses started annually in the US. BUT less than 25% survive so it's clearly hard. Launch! is written by two former executives with over 60 years of combined experience in large financial institutions, coupled with stints in early stage companies, who tried their hand at launching a FinTech startup from scratch. Large company experience is invaluable, but translating it to the startup world is an adventure with lots of ups and downs. Launch! looks at the types of people that thrive and the types that struggle in the world of startups.The book challenges you to discover whether the startup environment is right for you. Learn what is required to successfully launch including moving from concept to product, team dynamics, company culture, fundraising, day to day operational requirements, etc. Filled with valuable tips and real-life stories that provide lessons learned and examples to emulate, Launch! is a good read for both newbies and seasoned veterans.

24-hour Business Plan Template Steven Fies,2015-09-03 Writing a business plan should be simple, dynamic, and straightforward. More importantly, it must be a FUNCTIONAL tool that advances you forward towards your goals -- rather than holding you back due to endless tinkering and perfecting of your plan without taking action. Enter the 24 Hour Business Plan Template, your functional tool to get you there as efficiently as possible. This is a complete guide that includes a downloadable pre-formatted business plan template and cash flow spreadsheet to help you get started. In the book, I lay out the method I personally used to plan my own business - and in doing so, leave my full-time job and start my business on a full-time basis within seven months. My plan itself was constructed in under 24 hours on January 1, 2015 as my new years resolution; the remainder of the time spent was executing this plan over time. In the book you'll learn how to do the same, or close to it at the very least - and you'll begin to understand why this efficiency in the beginning is so important. To reiterate, it's important to get to the action-taking phase as soon as possible. This cannot be overstated enough. Successful entrepreneurs and authors like Eric Ries, Gabriel Weinberg, and Justin Mares tout this very principle in their books The Lean

Startup and Traction -- the simple fact is, it's much easier to make progress by taking action and adapting over time vs. trying to get everything perfect the first time around. Too much time can be spent getting stuck in your head due to information paralysis or perfectionism, only to wake up one day realizing you've actually done nothing concrete at all to advance your goals. Don't be this person! Get up out of your chair and take action to make your goals happen. Realize that it may take several iterations of creating a business plan, or cycling through various ideas, before you feel confident in moving forward with one in particular. This is okay -- and in fact, it's the exact reason why you need to be efficient during the initial planning and evaluation stage. Much better to spent one or two weeks cycling through 5-10 ideas than an entire year getting nowhere. In this book, we'll cover the following topics: -The importance of validation, and how to validate your business idea. -The key elements of designing an amazing cover page for your business plan. -How to write an executive summary, and why it must be written last after everything else. -The proper elements that make up your Company Objectives section. -The right approach to laying out your Products & Services section. -How to setup a target customer profile including the right questions to ask. -Websites and tables that will greatly simplify your industry and competitor analyses. -Several possibilities for getting started with sales and marketing, and the difference between each. -The key elements that will comprise your operational plan and any business logistics. -What roles need to be defined in your Management section. -The preferred formats and metrics to use in your business capitalization (initial funding) section. - How to lay out your financial plan, both for your business and your personal finances. Please know fat was trimmed from every section of this book to ensure you can get through it and understand the key principles quickly and move on to actually creating your own plan. Only the critical elements were left in, with additional explanation added at key junctions to ensure comprehension. Whether you're venturing out for your first time as an entrepreneur, or you're a seasoned veteran looking for a no-nonsense way to manage the planning process for your next venture, 24 Hour Business Plan Template belongs on your tool belt.
