A Critical Analysis of the Efficacy of Law as a Tool to Achieve Gender Equality Natalie Persadie,2012-07-26 In this book, Natalie Persadie explains that, among developing countries, the achievement of legal advances for women—at either the international or national levels—is particularly difficult where practical measures are not subsequently implemented. She examines the need for financial and human resources to make such legal measures effective.

Navies in Modern World History Lawrence Sondhaus,2004-05-04 Navies in Modern World History traces the role of navies in history from the early nineteenth century, through both World Wars, to the dawn of the twenty-first century and beyond. In a series of case studies Lawrence Sondhaus examines the national fleets of Britain, France, Germany, the United States, Japan, Brazil, Chile and the Soviet Union, and demonstrates the variety of ways in which each country has made decisive use of naval power. In each case the author argues that the navy in question helped change the course of modern world history; he also systematically analyses the challenges navies faced in assembling matériel, training personnel and performing their mission. This book discusses the leading role of navies and shipbuilders in key technological innovations of the nineteenth and early twentieth centuries, including advances in steam power, armor, artillery and torpedoes, and looks at aircraft carrier design and naval aviation in general in the second half of the twentieth century. It also explains how, today, technological breakthroughs are centered around naval stealth and maritime propulsion systems. Special attention is devoted to the evolving state of naval technology, and the book shows how the relative industrial capabilities of seafaring countries have been reflected in their maritime building programs, providing an important link between the evolution of modern national fleets and the broader history of the period.

Marginal Workers Ruben J. Garcia,2013-09-13 In *Marginal Workers*, Ruben Garcia goes further than any previous work in describing the various ways in which [U.S. labor and employment laws] fail to protect some of the most vulnerable workers in the country.—JOTWELL: Worklaw Undocumented and authorized immigrant laborers, female workers, workers of color, guest workers, and unionized workers together compose an enormous and diverse part of the labor force in America. Labor and

employment laws are supposed to protect employees from various workplace threats, such as poor wages, bad working conditions, and unfair dismissal. Yet as members of individual groups with minority status, the rights of many of these individuals are often dictated by other types of law, such as constitutional and immigration laws. Worse still, the groups who fall into these cracks in the legal system often do not have the political power necessary to change the laws for better protection. In *Marginal Workers*, Ruben J. Garcia demonstrates that when it comes to these marginal workers, the sum of the law is less than its parts, and, despite what appears to be a plethora of applicable statutes, marginal workers are frequently lacking in protection. To ameliorate the status of marginal workers, he argues for a new paradigm in worker protection, one based on human freedom and rights. Ruben J. Garcia is Professor of Law at the University of Nevada, Las Vegas, William S. Boyd School of Law.

The Global Workplace Roger Blanpain, Susan Bisom-Rapp, William R. Corbett, Hilary K. Josephs, Michael J. Zimmer, 2007-01-15 With the forces of globalization as a backdrop, this casebook develops labor and employment law in the context of the national laws of nine countries important to the global economy - the US, Canada, Mexico, UK, Germany, France, China, Japan and India. These national jurisdictions are highlighted by considering international labor standards promulgated by the International Labor Organization as well as the rulings and standards that emerge from two very different regional trade arrangements - the labor side accord to NAFTA and the European Union. Across all these different sources of law, this book considers the law of individual employment, collective labor law dealing with unionization as well as the laws against discrimination, the laws protecting privacy and the systems used to resolve labor and employment disputes. This is the first set of law school course materials in English covering international and comparative employment and labor law.

War Crimes and Justice Howard Ball, 2002-11-15 A thorough introduction to the laws of war, the savagery of war crimes, and the international system that demands justice. How do you speak of the unspeakable and defend the indefensible? *War Crimes and Justice: A Reference Handbook* thoroughly examines the laws of war and how the world community handles the monstrous brutalities of war through the international justice system. Highlighted are 20th century war crimes and trials including Yugoslavia, Kosovo, and the Kerry incident in Vietnam. Also covered are the four international tribunals established to punish violators in Nuremberg, Tokyo, Yugoslavia, and Rwanda. Pulitzer Prize-nominated author Howard Ball discusses those who committed unspeakable acts during war, others who sought justice for victims, and case studies portraying both victims and perpetrators. Significant treaties and conventions are explored, as well as all the options available to nations emerging from the throes of bloody civil wars to ensure peace with justice.

North America's Environment, 2002 At head of title : A regional product of the Global Environment Outlook 3 report process.

The Rules, Practice, and Jurisprudence of International Courts and Tribunals Chiara Giorgetti, 2012-02-17 This book examines existing international disputes resolution institutions of both general and specific subject-matter jurisdiction. Transfer Pricing in a Post-BEPS World Michael Lang, Alfred Storck, 2016-04-20 The OECD's Base Erosion and Profit Shifting (BEPS) project promises to make effective inroads into the much criticized corporate tax strategy known as aggressive transfer pricing, whereby the profitability of subsidiaries in different jurisdictions is "managed" via mispricing with the intent of minimizing the corporation's overall tax burden. Although the OECD BEPS project is an ongoing endeavor, its accomplishments to date and developing trends are discernible. This book, including contributions by outstanding and renowned transfer pricing experts both from practice and academia, analyses these trends, and proposes reforms which would ensure that transfer pricing outcomes are better aligned with economic activities and value creation, which achieves a more equitable distribution of profits among different countries. Each chapter is dedicated to specific sections of the OECD's BEPS Action Plan. Among the topics and issues covered are the following: - arm's length principle and its ongoing development; - allocation of risk and recharacterization; - intangibles (both license model and cost contribution

arrangements); – interest deductions and intra-group financing; – low value-adding services; – commissionaire arrangements and low-risk distributors; – attribution of profits to permanent establishments; – documentation requirements (including Country-by-Country Reporting). Within these topics, measures to identify the commercial and financial relationships inside multinational enterprises, to accurately delineate actual transactions, as well as guidance on defining risk and its allocation among entities of a multinational enterprise are discussed. The book is based on papers presented and discussed at the first Global Transfer Pricing Conference hosted in February 2016 by the WU Transfer Pricing Center at the Institute for Austrian and International Tax Law at WU (Vienna University of Economics and Business). The most up-to-date and thorough consideration of transfer pricing yet published, this book will prove invaluable for all parties currently facing questions related to transfer pricing in a post-BEPS world, especially those in charge of finding an ideal answer to them: academics, practitioners (including in-house and advisory counsel), international organizations, CEOs and CFOs of multinational enterprises, and government officials who are tax and transfer pricing experts.

All courses at the Academy are, in principle, published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law. This volume contains: - La loi applicable à la garantie bancaire à première demande, par O. ELWAN, professeur à l'Université de Heidelberg; - The North American Free Trade Agreement: A Comparative Analysis by A.L.C. DE MESTRAL, Professor at McGill University, Montreal.

International Law in the 21st Century Christopher C. Joyner, 2005 In the freshest new international law text in 20 years, Christopher C. Joyner offers a critical assessment of international legal rules in the early 21st century as they are applied by governments to the real world. Looking at concepts and principles, processes and critical problems, Joyner steers clear of an old-time case method approach, preferring to treat issues thematically. He shows the challenges of international law in terms of peace, security, human rights, the environment, and economic justice. Particular features of the book include engaging vignettes, clearly defined key terms, and special coverage of emerging topics including common spaces; international criminal law; rules, norms, and regimes; and trade relations and commercial exchange. Through it all, Joyner maintains an intent focus on the role of the individual in the evolving international legal order.

Core Labour Standards and International Trade Kofi Addo, 2014-11-24 This book examines the labour standards provisions in a number of Regional and Bilateral Trade Agreements, and assesses the potential of using the relevant clauses in these trade agreements as a benchmark for a multilateral approach. Based on the lessons learned from the Regional model, the book proposes a Global Labour and Trade Framework Agreement (GLTFA) combined with a joint ILO/WTO enforcement mechanism to resolve the contentious issue of the link between the CLS and international trade. The history of the linkage between the Core Labour Standards (CLS) and international trade dates back roughly 150 years, and has recently become one of the most vexing issues facing policy-makers. At the heart of the debate is the question whether or not trade sanctions should be imposed on countries that do not respect the CLS as embodied in multilateral conventions administered by the International Labour Organization (ILO). Concretely, this would entail inserting a social clause in the World Trade Organization (WTO) rules, and would trigger the imposition of sanctions on those countries that do not adhere to the CLS.
