Making the Modern World Vaclav Smil,2013-12-16 How much further should the affluent world push its material consumption? Does relative dematerialization lead to absolute decline in demand for materials? These and many other questions are discussed and answered in Making the Modern World: Materials and Dematerialization. Over the course of time, the modern world has become dependent on unprecedented flows of materials. Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living. This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies. Making the Modern World: Materials and Dematerialization considers the principal materials used throughout history, from wood and stone, through to metals, alloys, plastics and silicon, describing their extraction and production as well as their dominant applications. The evolving productivities of material extraction, processing, synthesis, finishing and distribution, and the energy costs and environmental impact of rising material consumption are examined in detail. The book concludes with an outlook for the future, discussing the prospects for dematerialization and potential constraints on materials. This interdisciplinary text provides useful perspectives for readers with backgrounds including resource economics, environmental studies, energy analysis, mineral geology, industrial organization, manufacturing and material science.

Chu,2023-07-28 Between 1984 and 2021, elite athletes from the member regions of Greater China – China, Taiwan, and Hong Kong – competed at each of the ten Summer Olympics. By winning 263 gold medals, 199 silver, and 173 bronze, China became a global sports superpower. Taiwan and Hong Kong pocketed 7 gold medals, 10 silver, and 17 bronze and 2 gold medals, 3 silver, and 4 bronze, respectively, displaying their world-leading statuses in archery, badminton, baseball, cycling, fencing, gymnastics, Judo, karate, sailing, Taekwondo, table tennis, and weightlifting. In response, the leaders of the three regions delivered high-profile praise. Their administrations awarded cash, badges, and/or honorary titles to the medalists. By reviewing journalistic reports, key-players’ memoirs, official documents, and scholarly works, this book aims to understand the significance of the Olympic medal haul to the Chinese, Taiwanese, and Hong Kong authorities. Its findings detail the context in which the Olympic medal haul was leveraged for the political change of the three regions and their relations with each other. They also reveal that the praise and rewards bestowed by the respective authorities on the medalists not only celebrated their jurisdictions’ sporting excellence, but served broader strategic goals across domestic politics and international relations.
